Valuable Plantation for Sale.

I OFFER for sale my Plantation in Madison parish, Louisiana. The tract consists of 1630 acres. It is situated on the Tensas river, and the Vicksburg Railroad runs along the northern boundary. There is a depot on the place, and a steamer can ship any day in the year by railroad, or by Tensas, which is the prettiest, with boats and dates to insure perpetual navigation. The land is level bottom—the fertility of which is too well known to require comment, and a better cotton or corn land cannot be found in any place. The place is provided with a good dwelling and gin house, with four stands, cisterns, &c. There are two hundred acres of virgin cypress, which will pay for the price of the place if sawed up. Will sell the whole land at $40 per acre, $20,000 cash, the purchaser to give equal payments, with interest, if I sell prior to the 1st of January next; if not sold before that time, I decline selling at all. The crop now in the ground belongs to a rare chance, as wild lands, even, are selling around it at $15 to $20 per acre. There are on it 180 acres of cotton and 100 in corn. Some two hundred acres can be put in next season.

Persons wishing to become the owner of it are requested to call on G. B. LOCKE, Auctioneer and Real Estate Broker, Memphis, Tenn., or write me at Prentiss, Miss. JAMES S. PEACOCK, M. D.

FELTON'S IMPROVED
Self-Sharpening Portable Grist Mill.
An Improvement on All Other Patents.

THIS is one of the most valuable inventions of the day. It possessing all the qualifications requisite to make it valuable to the farmer. It is designed to supply a want that has long been felt by that portion of community. It is so simple in construction, that any person of ordinary skill can run it, and keep it in order. The manufacturers are of the most distinct character, harder than any tempered steel, and not liable to go well of order. It will grind wheat, corn, oats, buckwheat, dried apples, crush and grind corn and cob admirably, or shelled corn and oats, and cob meal be well ground together. The small size is a fine family mill, with two-horse power, and will grind from five to eight bushels of superior corn meal per hour. The second size is two bushels of meal per hour, and requires but little attention, and may be run by gin-belt without increase of expense. The large size (same mill as original one) twenty-four bushels per hour. The mill is not heated in grinding—a valuable feature. Prices are, for small size $125; large size $200. We have the right to sell the States of Alabama, Mississippi, Tennessee, Arkansas, Tennessee, Kentucky, and a portion of Texas. A few chance to be selected for competent and responsible men to engage in the sale of Mills.

County and State rights sold on accommodating terms. All orders, communications, and applications for Rights and Mills addressed to us will be promptly responded to.

C. W. STURDIVANT & CO., Proprietors.

[Memphis to W. B. Bennett.

Attached is a note from John L. Morgan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrated Architect, of the Roofing of Corrugated Iron, whose experience with this metal entitles his opinion to the weight of a capital, is satisfactory to all.

MR. W. B. BENNETT: When in Philadelphia, Pa., a few days ago, I called upon Mr Samuel Sloan, the Architect, and showed him your Patent Galvanic Work on Arch Corrugated Iron. I asked his opinion as to the durability &c., of Work so made, such as you are putting on the roofs at Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and is all that its advocates claim it to be; I further saying that he is using it on a fine building for himself

Respectfully, JOHN L. MORGAN, Architect.

MEMPHIS, MARCH 2, 1857

W. S. BENNETT, Esq., *Dear Sir:* The facts within my knowledge of the durability, &c., of the Galvanic Corrugated Iron Roofing you covered ter us last Spring, we am happy to state has answered our expectations. We can therefore, recommend it to the public for all roofing purposes; as a light, cheap, fire and water proof roof. It does not get rent and rent from the effects of the heat of the sun; nor does it leak from the effects of the frost of the cold. Any person wishing to know more of this article, can call at our manufactory.

Yours, &c.,
C. W. STURDIVANT & CO.,
Carriage Manufactory, Monroe St., Memphis, Tenn.

MEMPHIS, TENN., Dec. 5, 1856.

TO WHOM IT MAY CONCERN: This is to certify that W. B. Bennett, covered two roofs for me last Spring, with a composition of Corrugated Iron and Felt, the roofs, one of them was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a dormant window, which leaked badly, and had baffled the skill of carpenters to prevent its leaking, which he succeeded in making perfectly tight. I do most thoroughly recommend the above mode of roofing to the public, for all roofing purposes, and believe it to be a permanent future against fire and water. D. COCKRILL,

Proprietor Commercial Hotel.

SUPERINT'D'T'S OFFICE, MEMPHIS & OHIO R. R. MEMPHIS, TENN., Feb. 19, 1857.

MR. BENNETT, *Dear Sir:* Our Company having been troubled very much with leaky cars, put some of your Patent Paint upon them, and so far as my knowledge extends I can cheerfully recommend it to any who wish a dry roof of any sort. Yours, &c.,

H. COPPIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

TO THE PUBLIC: W. S. Bennett made application to us last summer to cover our building with Wood's Galvanic Cement; it being a new thing thought we would try it, but had applied to other Blacksmith Shops and Engine-houses attached to the Foundry. They have probably all equaled or a water proof roof, having withstood some of the greatest storms, and are giving perfect satisfaction. We can only add, try it and you will be satisfied.

CURTIS & KNAPP, Iron Founders.

MEMPHIS, TENN., Jan. 14, 1857.

Mr. Bennett has done some small amount of roofing for me in his peculiar way, with Cotton stuff coated with a preparation the basis of which appears to be Coal Tar. It is a very effectual and light roof, and appears to promise considerable durability, from the preservative qualities of the composition, and protection from the effects of the heat of the sun in summer; nor does it harden and crack from the influence in the cold of winter.

PLAN OF THE LOTTERY.

The Numbers from 1 to 50,000, corresponding with those Numbers on the Tickets printed on separate slips of paper, are enclosed with small tin tubes and placed in one Wheel.

The first 467 Prizes, similarly printed and enclosed, are placed in another wheel.

The Wheels have been thoroughly revolved, and a number is drawn from the wheel of numbers, and at the same time a Prize is drawn from the other wheel. The Number and Prize drawn out are announced to the Assembled Company and registered by the Commissioners—the Prize being placed against the Number drawn. This operation is repeated until all the Prizes are drawn out.

APPROXIMATION PRIZES.—The two preceding and the succeeding Numbers to the Number drawing the first Prize will be entitled to the 28 Approximation Prizes. For example: If Ticket No. 11250 draws the $60,000 Prize, those Tickets numbered 11248, 11249, 11251, 11252, will each be entitled to $400. If Ticket No. 850 draws the $25,000 Prize, those Tickets numbered 848, 849, 851, 852, will each be entitled to $300, and so on according to the above scheme.

☞ The 3,000 Prizes of $20 will be determined by the last figure of the number that draws the $60,000 Prize. For example, if the Numbers drawing $60,000 Prize end with 36, 1, then all the Tickets where the number ends in 1 will be entitled to $20. If the Tickets end with No. 2, then all the Tickets where the number ends in 2 will be entitled to $20, and so on.

Certificates of Packages will be sold at the following rates, which is the risk:

Certificate of Package of 10 Whole Tickets $20 00
" " 10 Half " 40 00
" " 10 Quarter " 20 00
" " 10 Eighth " 10 00

In ordering Tickets or Certificates, enclose the money to our address—for the Tickets ordered, on receipt of which they will be forwarded by return mail. Persons may have Tickets coding in any figure they may designate.

The list of drawn numbers and prizes will be forwarded to purchasers immediately after the drawing.

Purchasers will please write their sign.ures plain, and give their Post Office, County and State.

☞ Remember that every Prize is drawn and payable in full without deduction.

☞ All Prizes of $1,000 and under, paid immediately after the drawing—other Prizes at the usual time of thirty days.

PERFECT PROTECTION FROM THE ELEMENTS.

WEST'S PATENT GALVANIC CEMENT FOR ROOFING.

THE subscriber is now prepared to cover roofs of buildings, with a cheap and better article than ever before known. The public are aware that our Government has had extensive experimenting, and in the full has been the study of Architects and Builders for years to discover an article for roofing purposes, that would stand the test of time, and withstand the expansion and contracting of metal roofs, are so great in changeable climates, that they become useless, unless being repaired at great expense every year. Shingles are not the proper one, as they cannot be used on flat roofs, and the various Compositions and Cements that have been heretofore used, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and at or one or two years have to be repaired, and at great expense. The Patent of the Galvanic Cement, has labored for six years to combine articles to obviate the difficulties and can testify from his long experience, and numerous testimonials from reliable persons, who have had his combination applied to their buildings, that his Cement is the cheapest and best article ever before known. The combination of this Cement is such that it is calculated for entire new roofs, on steep or nearly level roofs, with without removing the old roofing, or ve ter tights, seaming around battlements, chimneys and sky lights. Covering cornices, steamer decks, &c. This Cement, by its solidification and salvanism, prevents metal roofs from rusting and underwriting, and renders it extreme of heat and cold, better than anything ever invented for roofs or covering metal and the a ttendle of wood roofs or for covering metal and the a ttendle of wood roofs, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humble cottage. The undersigned having secured the right, to the State of Tennessee, will sell rights of Territory, to Counties or towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at short notice.

This roof is now being put on in this city, for a warranted for all seasons, and warranted to excel all other modes of roofing. The subscriber having resided 3 years in Memphis, and has had his model of roof, that he used as to its qualities, which has proved satisfactory, to which a number of the most prominent citizens, will testify.

See testimonials of the following gentlemen who have used it, with hundreds others.

[Memphis to W. B. Bennett.

Attached is a note from John L. Morgan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrated Architect, of the Roofing of Corrugated Iron, whose experience with this metal entitles his opinion to the weight of a capital, is satisfactory to all.

MR. W. B. BENNETT: When in Philadelphia, Pa., a few days ago, I called upon Mr Samuel Sloan, the Architect, and showed him your Patent Galvanic Work on Arch Corrugated Iron. I asked his opinion as to the durability &c., of Work so made, such as you are putting on the roofs at Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and is all that its advocates claim it to be; further saying that he is using it on a fine building for himself

Respectfully, JOHN L. MORGAN, Architect.

MEMPHIS, MARCH 2, 1857

W. S. BENNETT, Esq., *Dear Sir:* The facts within my knowledge of the durability, &c., of the Galvanic Corrugated Iron Roofing you covered ter us last Spring, we am happy to state has answered our expectations. We can therefore, recommend it to the public for all roofing purposes; as a light, cheap, fire and water proof roof. It does not get rent and rent from the effects of the heat of the sun; nor does it leak from the effects of the frost of the cold. Any person wishing to know more of this article, can call at our manufactory.

Yours, &c.,

MEMPHIS, TENN., Dec. 5, 1856.

TO WHOM IT MAY CONCERN: This is to certify that W. B. Bennett, covered two roofs for me last Spring, with a composition of Corrugated Iron and Felt, the roofs, one of them was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a dormant window, which leaked badly, and had baffled the skill of carpenters to prevent its leaking, which he succeeded in making perfectly tight. I do most thoroughly recommend the above mode of roofing to the public, for all roofing purposes, and believe it to be a permanent future against fire and water. D. COCKRELL,

Proprietor Commercial Hotel.

SUPERINT'D'T'S OFFICE, MEMPHIS & OHIO R. R. MEMPHIS, TENN., Feb. 19, 1857.

MR. BENNETT, *Dear Sir:* Our Company having been troubled very much with leaky cars, put some of your Patent Paint upon them, and so far as my knowledge extends I can cheerfully recommend it to any who wish a dry roof of any sort. Yours, &c.,

H. COPPIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

TO THE PUBLIC: W. S. Bennett made application to us last summer to cover our building with Wood's Galvanic Cement; it being a new thing thought we would try it, but had applied to other Blacksmith Shops and Engine-houses attached to the Foundry. They have probably all equaled or a water proof roof, having withstood some of the greatest storms, and are giving perfect satisfaction. We can only add, try it and you will be satisfied.

MEMPHIS, TENN., Jan. 14, 1857.

Mr. Bennett has done some small amount of roofing for me in his peculiar way, with Cotton stuff coated with a preparation the basis of which appears to be Coal Tar. It is a very effectual and light roof, and appears to promise considerable durability, from the preservative qualities of the composition, and protection from the effects of the heat of the sun in summer; nor does it harden and crack from the influence in the cold of winter.
