FELTON'S IMPROVED

Self-Sharpening Portable Grist Mill,

As Improvement on all Other Patents.

THIS is one of the most valuable inventions of the day, possessing all the qualifications requisite to make it valuable to the farmer. It is destined to supply a want that has long been felt by that portion of community. It is so simple in construction, that any person of ordinary skill can run it and keep it in order. The grinding surfaces are of the most durable character, harder than any imported steel, and not liable to get out of order. It will grind wheat, corn, oats buckwheat, drugs and spices crush and grind corn and cob for meal, grind corn and cob, and cob may be well ground together. The small size frame mill, with two-horse power, will grind from five to eight bushels per hour, according to the meal and from eight to ten bushels of good feed for stock, and requires but little attention, and may be run by sixteen without increase of expense. The large size frame mill will grind over twice that amount per hour. The meal is not heated in grinding, as the stones turn but 150 times per minute. Price of small size $125; large size $200. We have the right to sell the States of Alabama, Mississippi, Louisiana, Arkansas, Tennessee, Kentucky, and a portion of Texas. A rare chance is here offered for competent and responsible men to engage in the sale of Mills.

County and State rights will be sold on reasonable terms. All orders, communications, and applications for Rights and Mills addressed to us will be promptly responded to.

Sale of the Western MILITARY ASYLUM, AT HARRODSBURG, KENTUCKY.

AS AGENT for the Government, I will offer for sale on the premises, to the highest Bidder,

On the 12th Day of November, 1857,

the above property, recently occupied by the United States as a Military Asylum. The land consists of about

196 Acres,

adjoining the town of Harrodsburg, handsomely improved with commodious buildings and groves, and a mineral spring long celebrated for the virtues of its waters. Before this property was purchased for the Government it was one of the most celebrated Watering Places in the South West. It is admirably adapted to such a purpose, being situated in a picturesque and healthy country, and in the midst of a cultivated and hospitable community. It is deemed unnecessary to describe the property more particularly, since it is so extensively known as any other in the West.

At the same time and place will be sold a large quantity of

Valuable Furniture

of every kind, together with live stock, consisting of

HORSES, CATTLE, &c.,

and among them a number of valuable cattle of the *Alderney breed*.

TERMS OF SALE.—The land and improvements will be sold on a credit of one third in hand and the remainder in two equal annual payments, bearing six per cent. interest from the day of sale, the payments to be secured by the promissory notes of the best paymnt in hand.

The personal property will be sold for cash.

NEW CITY DIRECTORY, 1857-'58,

BY J. B. MOSELEY.

THE subscriber is now engaged preparing for publication, and will issue by the middle of November next, a complete and full DIRECTORY OF MEMPHIS. It will, in addition to the usual contents of a Directory, contain a history of the commerce and trade of Memphis, by one who has lived it every year and his hand to the commercial paper most of several of our city papers, besides other matters of interest to the business man.

Our intention is to have it out in a few days for cards. It is intended that the Directory shall compare favorably with those of the principal cities.

Orders for cards left at either of the city or mines offices will be attended to.

The Greatest Invention of the Age!

PERFECT PROTECTION FROM THE ELEMENTS.

WEST'S PATENT GALVANIC CEMENT FOR ROOFING.

THE subscriber is now prepared to cover roofs of buildings, with a cheap, and better article than ever before offered. The public are aware that our Government has had scientific men, experimenting for years, to find a cheap and efficient roofing and Boilers for years, one to prevent an article for roofing purposes, that would stand the sudden changes of our climate, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the roofing was. The cracking, contraction, expansion of roofing of metal roofs, are so great in changeable climates, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use, are not fit to stand the action of the weather, but in a year or two years it warm, and crack when frosty, and after one or two years of use of metal roofs, are worthless; whereas, the inventor of the Galvanic Cement has labored for many years to overcome these difficulties, and can testify, from long experience, and numerous testimonials from the first people, who have had his cement in use for the last five years, that it is the cheapest and most durable article for roofing purposes, that would stand the sudden changes of our climate, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the roofing was. The cracking, contraction, expansion of roofing of metal roofs, are so great in changeable climates, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use, are not fit to stand the action of the weather, but in a year or two years it warm, and crack when frosty, and after one or two years of use of metal roofs, are worthless; whereas, the inventor of the Galvanic Cement has labored for many years to overcome these difficulties, and can testify, from long experience, and numerous testimonials from the first people, who have had his cement in use for the last five years, that it is the cheapest and most durable article for roofing purposes, that would stand the sudden changes of our climate, and be impervious to fire and water, and remain a permanent fixture.

I do not hesitate to say, that it is equal to any roofing, and cheaper than any roofing, and will last as long as any roofing, and can be put on by any person, at half the cost of any roofing, and can be put on by any person, at half the cost of any roofing, and can be put on by any person, at half the cost of
