### Valuable Property for Sale.

I DESIRE to improve in the country. I offer for sale my place on which I now live, at the foot of Poplar street, just outside the city. The lot is opposite the residence of F. W. Newnan, and adjoining Dr. Wm. Y. Taylor, Sr., fronting 264 feet on the street, running back 660 feet, has complete but two acres. It has a good house, kitchen and outbuildings, and a choice selection of fruit trees. A beach can be had in this property, by an early application at my office in Walker's Row, Main street.

W. S. DELANY.

### For Sale.

IN consequence of the determination of my nephew to return to the North, I offer my STEAM SAW AND GRIST MILL for sale. The Mill is situated about one half mile north of W. M. Shipmon's ferry, on the Tallahatchie river, and about the same distance from the town of Greenville. The machinery is all new and in complete running order; having cost upwards of $1,000 last year. The Mill is a circular Worker one—60 inch saw, and is capable of sawing daily, when properly run, at least 5000 feet. There is also attached to the Mill a set of Lath Saws, capable of cutting 8000 laths daily.

I offer for sale 275 acres of LAND; 60 acres of which are cleared and in cultivation. The land will be sold with the Mill if desired; otherwise, in parcels to suit purchasers.

For further information, terms, &c., apply to or address the undersigned at this place.

WM. L. THOMPSON.

### 2,500 ACRES OF LAND FOR SALE.

A AGENT for Mrs. V. W. Alexander, of North Carolina, I offer for sale 1100 acres of Land (the same we bought of Mr. John Ballard, he lives Mason and Hamlet's Depot.

Any one wishing to purchase a high, dry, healthy home, would do well to examine this Land. Only about 200 acres of the tract are cleared, the remainder well timbered.

I have also lands of my own directly on the Railroad that I will sell on lots of any size to suit purchasers.

A few miles further west in Fayette county, on the Wesley and Somerville road six miles from Wesley and eleven miles from Somerville, containing three hundred and fifty acres, with good improvements.

Address the undersigned at Mason's Depot for further information, or call and examine the land.

### Important to Planters & Millers.

### FELTON'S IMPROVED Self-Sharpening Portable Grist Mill.

*Improvement on all Other Patents.*

THIS is the most valuable invention of the day. Possessing all the qualifications requisite to make it valuable to the farmer. It is destined to supply a want in the country in consideration, that any person of ordinary capacity can build and keep it in order. The principle is simple and strong and not subject to wear of other machinery, and will not fail to grind corn and cob alternately, or shelled corn and cob mixed together. The mill can be well grounded together. The mill is adapted to small power, will grind from 8 to eight bushels of superior corn meal per hour, and requires but little attention, and may be run by gin-boy without increase of expense. The large size frame mill is adapted to water power, and will grind from 20 to 25 bushels in grinding—a valuable feature. Prices for the mill, from $100 to $200. We have the right for the United States of Ala. vs. Mississippi, Louisiana, Arkansas, Tennessee, Kentucky, and a portion of Texas. A new character to agents, competent and responsible persons can engage in the sale of Mills.

County and Districting sold on accommodating terms. All orders addressed to the undersigned, Memphis, and Mills addressed to us will be promptly responded to.

P. S. Barrels, Hoops & Staves, Flour Barrels and Forwarding Merchants, are our agents in Memphis, Tenn.

### Premium Cotton Gin

THEM attention of Cotton Planters is respectfully called to the above superior Gins, manufactured by E. Carver, Prairie Depot, Ohio. Having received the premium, the Carver Gins are regarded as the best now in general use; their superiority needs no comments from us, as Shelby county, where they are almost universally used, will testify to their superior qualities.

Also 10 and 12 foot screwed bolts, washers, &c., complete, all of which we offer to our friends upon the most liberal terms and times.

JAMES BOYD.

### Important to Planters.

HAVING been informed that, owing to the prices at Gin Factories, Cotton Gins, in fact all, have advanced so as to skip their Cotton to Memphis at present, I do hereby inform you, or all who are interested, to ship your Cotton by the Memphis and Ohio Railroad; that the ruling stock of the Company is of such a character that they will be entirely ready to furnish you to get the cotton off, should it suffocate in price, (which is of course doubtful,) when every one would want to get their cotton to market.

Therefore, to avoid detention or complaint, ship your cotton to me, and in week of six days, receive your Gins, or you can send your screws, or it at once.

### The Greatest Invention of the Age!

PERFECT PROTECTION FROM THE ELEMENTS.

### WEST'S PATENT GALVANIC CEMENT FOR ROOFING.

THE subscriber is now prepared to cover roofs of buildings, with a new and valuable article of roofing, before known. The public are aware that our Government has had scientific men experimenting, and that it has been the study of Architects and Builders for years, to discover an article for roofing purposes, that would stand the sudden changes of the climate, and be impervious to fire and water, and remain a permanent article. As yet, nothing has been attained without costing more than the purse will bear. To meet the demand for a roofing of metal roofs, are so great in changeable climates, that they become useless, notwithstanding reported at great expense nearly. Shingles are but little good, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and of no one or two years incomparable, and worthless; whereas, the invention of the Galvanic Cement, has labored nearly years to combine articles to obviate those difficulties, and can boldly from his long experience, and extensive testimonial from reliable persons, who have had his composition applied to their buildings, that the Cement is the cheapest and best article ever before known. The combination of this Cement is such, that it is calculated for entire new roofs, flat or steep, covering over old shingles without removing them; lining gave troughs, sending around battlements, chimneys and sky lights. Covering carriage, steamer decks, &c., &c. Cement, by its incomparable adhesion and salvation, prevents metal roofs from rusting and embrittlement, and renders the exterior of brick and cobs, better than anything ever invented, for entire roofs or for covering metal and the outside of wood buildings making them fireproof. Its application is of the simplest character, and its cheapness is within the reach of the rich palace or the humble cottage.

The undersigned having secured the right to the State of Tennessee, will sell rights of Territory, or Counties or towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at short notice.

This roof is now being put on in this city, for the benefit of all concerned, and warranted to cancel all other modes of roofing. The subscriber having resided in the city of Memphis one year, and has had his mode of roofing tested as to its qualities, which has proved satisfactory, to which a number of the most prominent citizens can testify.

See testimonials of the following gentlemen who have used it, with both of others.

Attached is a note from John L. Morgan, Esq., Architect, by which employs seen the opinion of Mr. Samuel Sloan, the celebrated Architect, and writer upon Architecture, whose experience with this mode of roofing without a Gutsh, is satisfactory to all.

MEMPHIS, March 12, 1857.

MR. W. S. BENNETT: When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and author of the Great Work on Architecture. I asked his opinion as to the durability of West's Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and is all that its advocates claim it to be; further saying that he is using it on a fine building for himself.

Respectfully, JOHN L. MORGAN, Architect.

MEMPHIS, March 2, 1857.

W. S. BENNETT, Esq.: *Dear Sir:* The facts within our knowledge of the durability, &c., of West's Galvanic Cement, are these: The buildings covered last year in Spring, we am happy to state has answered our expectations. We can therefore, recommend it to the public for all roofing purposes, as a light, cheap, and durable waterproof roof. It does not get hot and run from the effects of the heat of the sun, like a tin roof, nor does it harden and crack the shingles of the roof. Any person wishing to know more of this article, can call at our manufactory.

H. B. BRIGGS & CO.,

Carriage Manufactory, Monroe St., Memphis, Tenn.

MEMPHIS, TENN., Jan. 8, 1856.

TO WHOM IT MAY CONCERN: This is to certify that W. S. Bennett, covered two roofs for me last Spring with a composition called West's Patent Galvanic Cement; one of 1700 was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a dormer window, and I believe it will stand a battle the shift of carpenters to prevent its leaking, which he succeeded in making perfectly tight. I do most cheerfully recommend the Galvanic Cement, as a good article for all roofing purposes, and believe it to be a valuable fixture such as fire and water.

D. COCKRILL,

Superintendent of Police, Memphis & Ohio R. R.

MEMPHIS, TENN., Jan. 18, 1857.

MR. BENNETT, *Dear Sir:* Our Company having been troubled very much with leaky cars, yet some of your Patent Paint upon them, for the last two years, we find it tends. I can cheerfully recommend it to any who wish a dry roof of any sort.

H. COFFIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

TO WHOM IT MAY CONCERN: This is to certify that I have used West's Galvanic Cement; it being a new thing thought we would try it; that it applied to our large tin roof, and other tinwork attached to the Foundry. They have proved all required of a new paint, and have stood the test of the strongest winds, and are giving good satisfaction. We can only say, try it and you will be satisfied.

CURRIE & ALLEN, Foundry.

MEMPHIS, Jan. 14, 1857.

Mr. Bennett has done some small amount of roofing for me in his peculiar way, with which I am well pleased with a preparation the basis of which appears to be Coal Tar. It is a very effectual and light roof, and should prove to be comfortable durability, from the preservative qualities of the composition, which penetrates the cloth and protects it from the influence of the air and water. The Composition does not liquify and run from the effects of the heat of the sun to complain; nor does it harden and crack from the contrast to the cold of winter.

A. P. MERRILL.
