Self-Sharpening Portable Grist Mill.

An Improvement on all Other Patents.

THIS Mill is the most valuable invention of the day, possessing all the qualities that are required and wanted by the farmer. It is designed to supply a want that has long been felt by that portion of community. It is so simple in construction that any person of ordinary skill can run it and keep it in order. The grinding surfaces are of the most durable character, harder than any metals, and, of course, not liable to get out of order. It will grind wheat, corn, oats buckwheat, grass and spices; coarse and fine; and adapted to grinding meal, oats and corn, and oth mas be well ground together. The small size frame mill, with two-horse power, will grind from five to eight bushels of superior meal per hour, and from eight to ten bushels of good feed for stock, and requires but little attention, and may be run by gin-bell attachment of a single horse power. The large size will grind over twice that amount per hour. The mill is not liable to get out of order, and, if properly used, for small size $125; large size $200. We have the right to sell the States of Alabama, Mississippi, Louisiana, Arkansas, Tennessee, Kentucky, and a portion of Texas. A rare chance is here offered for competent and responsible men to engage in the sale of Mills.

Patent Elastic Water and Fire Proof

CEMENT ROOFING.

WE would respectfully announce to the citizens of Memphis, and the surrounding country, that we are prepared to contract and put on, our FIRE and WATER PROOF CEMENT ROOFING. It being the only article manufactured, that will successfully resist the action of the atmosphere in every climate. It is perfectly Fire and Water Proof, and in point of durability, equal if not superior to any metallic roofing. We can put it on over old tin, tar or shingle roofs, it making no difference how flat or steep the roof may be. We put on our roof not seven dollars per hundred square feet. We will apply our cement on tin and iron roofs for two dollars and twenty-five cents per square, it being on account of its elasticity and durability, the cheapest paint that can be used. Our cement is the best fire-proof cement, for patching up old roofs, chimneys, skylights, &c. We warrant all our work.

We invite all that want new roofs, or their old ones repaired, to call at Rich's store above. No. 184 Main street, and examine samples and satisfy themselves of the durability and practicability of using this roofing.

PATENT GALVANIC CEMENT

FOR ROOFING.

THE subscribers have now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had scientific non experimenting, and that it has been the study of Architects and Builders for years, to discover an article, that would withstand the sudden changes of the weather, and be impervious to fire and water, and remain a permanent fixture. At last, nothing has been attained without some defect than the people wish. The contraction, expansion and rotting of metal roofs, are exposed to changeable climates, that no roof can stand, noise being repelled at great expense nearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when it is cold, and at every one or two years become cracked, and worthless; whereas, the invention of the Galvanic Cement has taken off twenty years to complete, in order to obviate these difficulties, and can boast from his long experience, and numerous testimonials from eminent persons, who have had to combine him employed to their buildings, that his Cement is the cheapest and best article ever before known. The combination of this Cement is such, that it is calculated for entire new roofs, flat or steep; covering over old shingles without removing them; filling gave troughs, sending around battlements, chimneys and skylights. Covering canals, steamer decks, &c. This Cement, by its non-conduction and expansion, prevents metal roofs from rusting and underscalding, and resists the extremes of heat and cold, better than anything ever invented, for entire roofs or covering metal and the out-side of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humble cottage. The undersigned have purchased the right to the State of Tennessee, will sell rights of Territory, by Counties or Towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings in any part of the State, at short notice.

The roof is now put on this city, for the benefit of all concerned, and warranted to excel all other modes of roofing. The subscriber having resided in the city of Memphis one year and a half, and better than any Dyeing Establishment in the South. Dyes every kind of stuffs, according to patterns, and finishes them equal to new. He removes spots or stains from silk dresses in a dry way, without injuring the color or stuff. He also cleans and refinishes Curtains, in Silk and Woolen Tulle de Paris and Tarlan.
