Real Estate.

For Sale.

I WILL SELL on SATURDAY, December the 5th, on the premises, one thousand acres of LAND in Tipton county, lying six miles north-west of Mason Depot on the Memphis and Ohio Railroad, and seven miles from Covington. The above land is known as the May's tract of land. There is about eighty or a hundred acres cleared, and tolerably well improved, with good and lasting water. The above land will be divided to suit purchasers. For further particulars apply to J. R. Shaw, G. G. Pentkster, Memphis; M. Johnston Nashville; Col. Chas. Hill, adjoining the place; David Nunn, Somerville, or the undersigned at Belmont, Tenn.

G. M. WHITTHORNE.

P. S. Terms, one-third cash, the balance in one, two and three years with interest.

Valuable Property for Sale.

IN order to improve in the country, I offer for sale the place on which I now live, at the head of Poplar street, just outside the city. This lot is opposite the residence of Prof. Forster, and adjoining Dr. Wm. V. Taylor, fronting 264 feet on the street, running back 660 feet, and containing four acres. It has a good house, cistern and outbuildings, and a choice selection of fruit trees. A bargain can be had in this property, by an early application to my office in Walker's building, Main street.

For Sale.

IN consequence of the determination of my nephew to return to the North, I offer for sale the STEAM SAW and GRIST MILL for sale. The STEAM SAW is situated about one half mile north of W. N. Sherman's Ferry, on the Tallahatchia river, and about the same distance from the town of Eve ala. The machinery is all new and in complete running order. Saws best cut timber from the 15th of May last. The Mill is a circular working one—46 inch saw, and is capable of averaging daily, when properly run, at least 4000 feet. There is also attached to the Mills a set of Lath Saws, capable of cutting 6000 in the daily.

I also offer for sale 320 acres of LAND; 80 acres of which are cleared, and in cultivation. The land will be sold with the Mill if desired; otherwise, in parcels to suit purchasers.

Apply for further information, terms, &c., apply to or address the undersigned at this place.

FELTON'S IMPROVED

Self-Sharpening Portable Grist Mill.

An Improvement on all Other Patents.

THIS is the most valuable invention of the day, possessing all the qualifications requisite to make it valuable to the farmer. It is declined to supply a want that has long existed by the portion of community. It is so simple, so construction, that any person of ordinary skill can run it and keep it in order. The grinding surfaces are of the most durable character, having no any temporal steel, and not liable to be out of order. It will grind hard corn, soft corn, buckwheat, corn and spices, crush and grind corn and cob admirably, or shelled oats and corn, and cob may be well ground together. The small side frame mill, with two-horse power, will grind from five to eight bushels of good feed for stock, and requires but little attention, and may be run by children. Persons desirous of purchasing a mill of the above description will attend over twice that amount per hour. The meal is not heated, but comes from the mill in a fine, flaky state, for small size $125; large size $200. We have the right to sell the States of Alabama, Mississippi, Louisiana, Arkansas, Tennessee, Kentucky, and a portion of Texas. A rare chance is here offered for competent and responsible men to engage in the sale of Mills.

Counties and State rights can be purchased on reasonable terms. All orders, communications, and applications for Rights and Mills addressed to us will be promptly responded to.

Patent Elastic Water and Fire Proof

CEMENT ROOFING.

WE would respectfully announce to the citizens of Memphis, and the surrounding country, that we are prepared to contract and put on our FIRE and WATER PROOF CEMENT ROOFING, it being the only article yet invented, that will successfully resist the action of the atmosphere in every climate. It is perfectly Fire and Water Proof, and in point of durability, equal if not superior to any metallic roofing. We can put it on over old tin, tar or shingle roofs, it making no difference how flat or steep the roof may be. We put on our roof for seven dollars per hundred square feet. We will apply our cement on tin and iron roofs for two dollars and twenty-five cents per square, it being an accompliment to metallic and durability, the cheapest paint that can be used. Our cement is the best thing extant, for patching around fire walls, chimneys, skylights, &c. We warrant all our work.

We invite all that want new roofs, or their old ones repaired, to call at Rick's store chair, No. 264 M in street, and examine samples and satisfy themselves of the durability and practicability of using this roofing.

N. B. We are prepared to fill orders for our cement, to those residing at a distance, with printed directions for using it.

Those wishing roofs or repairing done, will please call at Rick's store chair, or address us through the Post Office.

The Greatest Invention of the Age!

PERFECT PROTECTION FROM THE ELEMENTS.

WEST'S

PATENT GALVANIC CEMENT FOR ROOFING.

THE subscriber is now prepared to cover roofs of buildings, with a new and better article than any before known. The public are aware that our Government has had scientific men experimenting and that it has been the study of Architects and Builders for years to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and yet be not so burdensome as to rival, nothing has been attained without costing more than the people will stand. The contractor, expansion and contraction of roofs, are a great disturbance to citizens, and they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the varieties of composition and other roofs that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frozen, and after one or two years become crumbly, and worthless; whereas, the invention of this Galvanic Cement has labored for years to remove these difficulties, and can testify from his long experience, and numerous testimonials from citizens and others, who have had its application applied to their buildings, that his Cement is the cheapest and best article ever before known. The combination of this Cement with the felt of which it is made, is vital. The roofs, flat or steep, covering over old shingles without removal, are there; losing cases troughs, seeming around hatchways, chimneys and sky lights. Covering the tops, seams, decks, &c. This Cement, by its non-conduction and pliableness, prevents metal roofs from rust and undermilking, and resists the expansion of heat and cold, better than anything ever invented, for entire roofs or for covering metal and tin roofs of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humble cottage.

The undersigned having secured the right to the State of Tennessee, will sell rights of Territory, by Counties or towns, on reasonable terms.

The undersigned is also prepared to cover roofs of buildings, in any part of the State, at a reasonable price.

This roof is now being put on this city, for the benefit of all concerned, and warranted superior to all other modes of roofing. The subscriber having resided in the city of Memphis one year, and having put his roofs of roofing tested as to its qualities, which has proved satisfactory, to which a number of the most prominent citizens can testify.

See testimonials of the following gentlemen who have used it, with heated others.

For further information, inquire at the office, where samples may be seen in J. L. Morgan's Architectural Rooms, No. 3 Walker's Block, Memphis, Tenn., or address, B. L. WEST,

C. W. STURDIVANT & CO., Proprietors,

[Successors to W. S. Bennett.

Attached is a note from John L. Morgan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrated Architect, and writer upon Architecture, whose experience with this mode of roofing without a doubt, is satisfactory to all.

MEMPHIS, March 12, 1857.

MR. W. S. BENNETT: When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and author of the Sloan Work on Architecture. I asked his opinion as to the durability &c., of West's Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and he adds that the advocates claim it to be; farther saying that he is using it on a fine building for himself.

Respectfully, JOHN L. MORGAN, Architect.

MEMPHIS, March 2, 1857.

W. S. BENNETT, Esq.: *Dear Sir:* The facts within my knowledge of the durability, &c., of West's Galvanic Cement, are these: The building you covered for me last Spring, we am happy to state has answered our expectation. We can therefore, recommend it to the public for all roofing purposes; as it light, cheap, fire and water proof roof. It does not get soft and run from the effects of the heat of the sun, as do the Felt Roofs, and stands from the effects of the cold. Any one wishing to know more of this article, can call on me at my office.

N. S. BRUCE & CO.,

Carriage Manufactory, Monroe St., Memphis, Tenn.

MEMPHIS, TENN., Feb. 3, 1856.

TO WHOM IT MAY CONCERN: This is to certify that W. S. Bennett, covered two roofs for me last Spring, with a compositional called West's Patent Galvanic Cement, one of them was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a decayed mansard roof, which had baffled the skill of carpenters to prevent its leaking, which he succeeded in making perfectly tight. I do most cheerfully recommend the use of this article, as a good for all roofing purposes, and believe it to be a permanent future and S. Eve and water. D. COOPER,

Proprietor Commercial Hotel.

SUPERINT'D'T'S OFFICE, MEMPHIS & OHIO R. R.,

MEMPHIS, TENN., Feb. 18, 1857.

MR. BENNETT, *Dear Sir:* Our Company having been troubled very much with leaky cars, put some of your Patent Paint upon them, and so far as our knowledge extends, I can cheerfully recommend it to any who wish a dry roof of any sort. TOOTE, Jr.,

H. COOPER, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

TO THE PUBLIC: W. S. Bennett made application to me to put his compositional cement upon Mr. West's Galvanic Cement; it being a new thing therefore we would try it; had it applied to our Blacksmith Shop and Engine House attached, by Mr. Bennett, and so far as our knowledge extends, I can cheerfully recommend it to any who wish a dry roof of any sort.

TOOTE, Jr.,

H. COOPER, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

Mr. Bennett has done some improvement upon our roofing for me in his peculiar way, with Cotton stuff united with compositional cement, and it has stood the test. The roof is a very effectual and tight roof, and appears to promise considerable durability, from the preservative qualities of the compositional cement, which appears to have protected it from the influence of the air and water. The Composition does not liquify and run from the effects of the heat of the sun as do other roofs, does it harden and crack from the influence in the cold of winter.
