A Valuable Plantation for Sale

ON THE HERNANDO PLANKROAD,

Six and a half miles south of Memphis.

THIS plantation contains 646 acres, about half of which is cleared, and in a good state of cultivation. It has a good six house, cabins, stables, &c., excellent freestone well and spring, a branch never failing water and a lake, with a fine range for stock. Its health and pleasantness are unsurpassed, there not having been a case of chills or fever for four years past, to my physician. The plantation is in good best condition for a Cotton crop next season. Purchaser can have possession at Christmas.

Premium Cotton Gin

THE attention of Cotton Planters is respectfully called to the above superior Gins, manufactured by E. Carter & Co., Rock Bridge, Mass. Under a recent improvement, the Carver Gins are regarded as the best now in general use; their superiority needs no comments from us, as thousands are now in successful operation in the Southern country.

We have on hand first class Gins, containing all the different sizes and numbers of saws.

Also 10 and 12 feet screwed bolts, washers, &c., complete, all of which we offer to our customers upon the usual terms and time.

Self-Sharpening Portable Grist Mill.

An Improvement on all Other Patents.

I AM possessing all the qualifications requisite to make it valuable to the farmer. It is declined to supply a want that has long been felt by that portion of community. It is as simple in construction, that any person of ordinary skill can run it and keep it in order. The grinding surfaces are of the most durable character, harder than any imported stone, and not liable to go out of order. It will grind wheat, corn, oats buckwheat, drugs and spices, crush and grind corn and cob admirably, or shelled corn and cob meal, and not separate the ground together. The small size frame mill, with two-horse power, will grind from five to eight bushels of superior corn meal per hour, and from eight to ten bushels of good flour per hour, and requires but little attention, and may be run by kids without increase of expense. The large size frame mill will grind over twice that amount per hour. The meal is not heated in grinding—a valuable feature. Prices are, for small size $125; large size $200. We have the right to sell the States of Alabama, Mississippi, Louisiana, Arkansas, Tennessee, Kentucky, and a portion of Texas. A rare chance to have agents in these States, who are responsible men to engage in the sale of Mills.

County and State rights sold on accommodating terms. Agents, commissioners, and applications for Rights and Mills addressed to us will be promptly responded to.

W. E. CHILDS & CO.'S

Patent Elastic Water and Fire Proof

CEMENT ROOFING.

WE would respectfully announce to the citizens of Memphis, and the surrounding country, that we are prepared to contract and put on our FIRE and WATER PROOF CEMENT ROOFING, it being the only article yet invented, that will successfully resist the action of the atmosphere in every climate. It is perfectly Fire and Water Proof, and in point of durability, equal if not superior to any metallic roofing. We can put it on over old tin, tar or shingle roofs, it making no difference how flat or steep the roof may be. We put on our roof for seven dollars per hundred square feet. We will apply our cement on tin and iron roofs for two dollars and twenty-five cents per square, it being on account of its elasticity and durability, the best paint that can be used. Our cement is the best thing extant, for patching around fire walls, chimneys, skylights, &c. We warrant all our work.

We invite all that want new roofs, or their old ones repaired, to call at Rick's stove store, No. 264 Main street, and examine samples and satisfy themselves of the durability and practicability of using this roofing

N. B. We have on hand a large supply of our cement, to those residing at a distance, with printed directions for using it.

Persons having roofs or repairing done, will please call at Rick's stove store, or address us through the Post Office.

CINCINNATI, January 7th, 1857.

We have W. E. Childs & Co's. Cement Roofing upon some of our buildings. It gives entire satisfaction, and we consider it the best roofing of which we have any knowledge. We are extensively engaged in building in this city, and have within the last five years, covered buildings with all the various metallic and other roofings which have been introduced, and from experience and investigation, we, without hesitation, pronounce Childs & Co.'s, preferable to any other.

CINCINNATI, O., May 29th, 1857.

W. E. CHILDS & Co.—Your roof on our park house gives entire satisfaction. It has proved itself both Fire and Water Proof.

Some four months since, a large fire occurred directly adjoining us, and our roof was severely tried by the flames and burning brands, but stood the test unharmed. We cordially recommend this roof as a good thing.

TESTIMONIALS.

We have fully tested the merits of W. E. Childs & Co's. Patent Cement Roofing, and are confident that it is superior to any other kind now in use. We speak from the experience of two years, during which time it has withstood a cheap, flimsy, metallic roof, and has proved itself a durable and excellent roof.

MR. BENNETT, Dear Sir: Our Company having been troubled very much with leaky cars, put some of your Patent Paint upon them, and we find it to be all you have claimed. I can cheerfully recommend it to any who wish a dry roof of any sort.

TOBIN, Jr., H. COFFIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

TO THE PUBLIC: W. R. Bennett made application to us last summer to cover our building with Childs' Cement. We consented, and it being a new thing thought we would try it; had it applied to our Blacksmith Shop and Engine House, extensive to the Foundry, and have improved as required of a water proof roof, having withstood some of the greatest storms, and are giving good satisfaction. We can only add, try it and see for yourselves.

CURTIS & KNAPP, Iron Founders.

MEMPHIS, Jan. 14, 1857.

Mr. Bennett has done some small amount of roofing for me in his peculiar way, with Cotton stuff coated with a preparation the basis of which appears to be Coal Tar. It is a very effectual and light roof, and appears to possess considerable durability, from the preservative qualities of the coal tar, which completely penetrates the cloth, and protects it from the influence of the air and water. The Composition does not lightly and run from the effects of the sun, as other compositions do, nor does it harden and crack from the influence in the cold of winter.

W. H. PASSMORE

TAKES this method of informing the citizens of Memphis that he has permanently located himself here to carry on the above business, and solicits a share of the patronage of the public. He will do his work in the most fashionable and approved style, and warrants all his work to stand the test of time. Shop on Second street, between Madison and Monroe, next door to Mr. Fowlkes' Grocery.

Memphis, March 12, 1857.

MR. W. S. BENNETT: When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Stout, the celebrated Architect, and author of the Stout Work on Architecture. I asked his opinion as to the durability &c., of Wood's Patent Roof, such as you are putting on the city of Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and he also said that the advocates claim it to be; further saying that he is using it on a fine building for himself.

Respectfully, JOHN L. SUGGAN, Architect.

MEMPHIS, March 2, 1857.

W. S. BENNETT, Esq., *Dear Sir:* The facts within our knowledge of the durability, &c., of Wood's Galvanized Cement, are these: The building put covered for me last Spring, we am happy to state has answered our expectations. We can therefore, recommend it to the public for all roofing purposes, as a light, cheap, durable and water proof roof. It does not get wet and run from the effects of the heat of the sun, nor does it become brittle and crack from the effects of the cold. Any person wishing to know more of this article, can call at our manufactory.

Respectfully, CURTIS & KNAPP & CO.,

Carriage Manufactory, Monroe St., Memphis, Tenn.

MEMPHIS, TENN., Dec. 8, 1856.

TO WHOM IT MAY CONCERN: This is to certify that W. S. Bennett, covered two roofs for me last Spring, with a composition called 'Wood's Patent Galvanic Cement.' One of these roofs was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a dormer window, which had leaked badly, and had baffled the skill of carpenters to prevent its leaking, which he succeeded in making perfectly tight. I do most cheerfully recommend his kind of roofing to the public for all roofing purposes, and believe it to be a permanent fixture against fire and water. D. COCKRELL,

Proprietor Commercial Hotel.

SUPERINTENDENT'S OFFICE, MEMPHIS & OHIO R. R.

MEMPHIS, TENN., Feb. 19, 1857.

MR. BENNETT, *Dear Sir:* Our Company having been troubled very much with leaky cars, put some of your Patent Paint upon them, and we find it to be all you have claimed. I can cheerfully recommend it to any who wish a dry roof of any sort. TOBIN, Jr.,

H. COFFIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

TO THE PUBLIC: W. S. Bennett made application to us last summer to cover our building with Wood's Galvanic Cement; it being a new thing thought we would try it; had it applied to our Blacksmith Shop and Engine House, extensive to the Foundry, we have improved as required of a water proof roof, having withstood some of the greatest storms, and are giving good satisfaction. We can only add, try it and see for yourselves.

CURTIS & KNAPP, Iron Founders.

MEMPHIS, Jan. 14, 1857.

Mr. Bennett has done some small amount of roofing for me in his peculiar way, with Cotton stuff coated with a preparation the basis of which appears to be Coal Tar. It is a very effectual and light roof, and appears to possess considerable durability, from the preservative qualities of the coal tar, which completely penetrates the cloth, and protects it from the influence of the air and water. The Composition does not lightly and run from the effects of the sun, as other compositions do, nor does it harden and crack from the influence in the cold of winter.
