IN THE STATE OF ARKANSAS.

THEY will PAY TAXES on lands, and attend to the redemption of forfeited lands.

They will make personal examinations and surveys of land, in any part of the State, and report to parties the character of the soil, timber, quality and extent of any particular tract, and give reliable information in regard thereto; and in cases where owners wish to bring their lands into the market, they will undertake to find a purchaser desirous upon it, and will sell for them, either the plantations or wild lands of those who desire to sell.

Much fine land in this State has been reserved from sale for the last five years, having been reported as swamp and overflowed, which, by act of the last Congress, was restored to the State, and will be subject to entry in a few months. The lists of these lands contain a great deal of very valuable cotton land, cultivation, and the above firm, from their experience as practical surveyors, one of whom has been engaged in the public surveys of this State for many years, and the other in Railroad and Swamp Land Engineering, having thus gained an extensive knowledge of land throughout the State, will be prepared to make good locations for persons desiring to invest money, when this confirmation of Swamp Lands is offered for sale, or subject to entry, either for a stipulated share of the land or commission upon the money invested.

Persons locating homes in Arkansas will find at their office, plats of land surveyed, or farms, with full descriptions of their improvements, quality, locality, &c., so that they can be at once spoken of to strangers and other parties.

They will buy and sell Land Warrants or locate them for holders. Any business in the above line will be promptly attended to.

Patent Roofing.

Important to Architects and Builders.

W. E. CHILDS & CO.'S

Patent Elastic Water and Fire Proof

CEMENT ROOFING.

WE would respectfully announce to the citizens of Memphis, and the surrounding country, that we are prepared to contract and put on, our FIRE and WATER PROOF CEMENT ROOFING, it being the only article yet invented, that will successfully resist the action of the atmosphere in every climate. It is perfectly Fire and Water Proof, and in point of durability, is equal if not superior to any metallic roofing. We can put it on over old tin, tar or shingle roofs, it making no difference how flat or steep the roof may be. We put on our roof for seven dollars per hundred square feet. We will apply our cement, on tin and iron roofs for two dollars and twenty-five cents per square, it being on account of its elasticity and durability, the cheapest paint that can be used on tin roofs. Our cement is in the strongest form, for patching tarred, for nailing down tin, for stopping leaks around fire walls, chimneys, &c. We warrant all our work.

We invite all that want new roofs, or their old ones repaired, to call at Sisk's store room, No. 347 Main street, and examine samples and satisfy themselves as to the durability and practicability of using this roofing.

N. B. We are prepared to fill orders for our cement, put up in cans, and sent to any place in the country, to those residing at a distance, with printed directions for using it.

Those wishing roofs or repairing done, will please call at Sisk's store room, or address us through the Post Office.

CINCINNATI, January 7th, 1867.

We have W. E. Childs & Co.'s, Cement Roofing upon some of our buildings. It gives entire satisfaction, and we consider it the best roofing of which we have any knowledge. We are extensively engaged in roofing in this city, and have within the last five years, covered buildings with all the various metallic and other roofings which have been introduced, and from experience and investigation, we, without hesitation, pronounce Childs & Co.'s, preferable to any other.

The Greatest Invention of the Age!

PERFECT PROTECTION FROM THE ELEMENTS.

WEST'S

PATENT GALVANIC CEMENT

FOR ROOFING.

THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had several years experiment, and that it has been the study of Architects and Builders for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without coming more than the people wish. The continual expansion and contracting of metal roofs, are so great in changeable climates, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and at no one or two years distance can they, and worthless; whereas, the invention of the Galvanic Cement has taken twenty years to combine articles to obviate those difficulties, and can testify to the first long experience, and numerous testimonials from reliable persons, who have had his combination applied to their buildings, that his Cement is the cheapest and best article ever before known. The combination of this Cement is such, that it is calculated for entire new roofs, flat or steep; covering over old shingles without removing them; laying over tarred roofs, mending around battlements, chimneys and sky lights. Covering tar and gravel roofs, and for Cornices, Spouts, Gutters, Conductors and galvanizing, prevents metal roofs from rusting and undermining, and resists the extremes of hot and cold, better than anything known before; for entire roofs or for covering metal and the out-side of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humble cottage.

The undersigned having secured the right to the State of Tennessee, will sell rights of Territory, by Counties or in small lots to suit purchasers.

The subscriber is also prepared to cover roofs of buildings, in the Southern Land, in the country, on the city of Memphis one year, and has had his mode of roofing tested as to its qualities, which has proved satisfactory, to which a number of the most prominent citizens can testify.

See testimonials of the following gentlemen who have used it, with hundreds others.

For further information enquire at the office, where samples may be seen, J. C. Morgan's Architectural Room, No. 3 Walker's Block, Memphis, Tenn., or address, Box 320, P. O.

C. W. STURDIVANT & CO., Proprietors,

[Successors to W. S. Bennett.

Attached is a note from John L. Morgan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrated Architect, and builder upon Architecture, whose experience with this mode of roofing, without a doubt, is satisfactory to all.

MEMPHIS, March 12, 1867.

MR. W. S. BENNETT: When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and author of the Book Work on Architecture. I asked his opinion as to the durability &c., of West's Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and in all that its advocates claim it to be; further saying that he is using it on a fine building for himself.

Respectfully, JOHN L. MORGAN, Architect.

MEMPHIS, March 2, 1867.

W. S. BENNETT, Esq., *Dear Sir:* The facts within relating to the building, &c., of West's Galvanic Cement, are these: The building you covered for me last Spring, we am happy to state has answered our expectations. We can, therefore, recommend it to the public for all roofing purposes; as a tight, cheap, fire and water proof roof. It does not get out and run from the effects of the heat of the sun; nor does it harden and crack from the effects of the cold. Any persons wishing to know more of this article, can call at our manufactory.

Yours, &c., S. S. BRIDGE & CO.,

Carriage Manufactory, Monroe St., Memphis, Tenn.

MEMPHIS, TENN., Feb. 18, 1867.

TO WHOM IT MAY CONCERN: This is to certify that W. S. Bennett, covered two roofs for me last Spring, with West's Galvanic Cement. One of the buildings is a large one, one of them was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a dormer window, which was leaky, and had battled the skill of carpenters to prevent its leaking; which he succeeded in making perfectly tight. I do most cheerfully recommend the above preparation to the public for all roofing purposes, and believe it to be a permanent fixture against fire and water. D. COCKRELL,

Proprietor Commercial Hotel.

SUPERINTENDENT'S OFFICE, MEMPHIS & OHIO R. R.

MEMPHIS, TENN., Feb. 19, 1867.

MR. BENNETT, *Dear Sir:* Our Company having been troubled very much with leaky cars, put some of your Mineral Paint upon them, and so far as my knowledge extends, I can cheerfully recommend it to any who wish a dry roof of any sort. Yours, &c.,

R. COPPINGER, Superintendent.

MEMPHIS, TENN., Jan. 14, 1867.

TO THE PUBLIC: W. S. Bennett made application to us last summer to cover our buildings with West's Galvanic Cement; it being a new thing thought we would try it; had it applied to our Blacksmith Shop and Engine House attached to the Foundry. They have proved all required of a water proof roof, having withstood some of the greatest storms, and are giving good satisfaction. We can only add, try it and you will be satisfied.

CURTIS & KNAPP, Iron Founders.

MEMPHIS, Jan. 14, 1867.

Mr. Bennett has done some work on roofing for me in his peculiar way, with Cotton stuff coated with a preparation the basis of which appears to be Coal Tar. It is a very efficient and cheap article, and appears to promise considerable durability, from the preservative qualities of the tar and the protection of the cloth, and protects it from the influence of the air and water. The Composition does not liquify and run from the effects of heat, nor does it harden and crack from the cold, or harden and crack from the influence in the cold of winter.

HAVING been informed that, owing to the prices at which Cotton is now held, many, in fact all, have decided not to gin their Cotton in Memphis at present, I beg leave to inform you, or all who are interested, to ship their Cotton by the Memphis and Ohio Railroad; that the cotton will be delivered at the Compress in a manner that they will be entirely unable to furnish cars to get the cotton off, should it improve in price, (which is of course possible) when every one would want to get their cotton to market.

Therefore, to avoid detention or complaint, ship your Cotton now, and in event of an increase, your Cotton will be where you all can avail yourselves of it at once.
