Paint Roofing.

Important to Architects and Builders.

W. E. CHILDS & CO.'S

Patent Elastic Water and Fire Proof

CEMENT ROOFING.

WE would respectfully announce to the citizens of Memphis, and the surrounding country, that we are prepared to contract and put on our FIRE and WATER PROOF CEMENT ROOFING, it being the only article yet invented, that will successfully resist the action of the atmosphere in every climate. It is perfectly Fire and Water Proof, and in point of durability, equal if not superior to any portable roofing. We can put it on over old tin, tar or shingle roofs, blistering no difference how flat or steep the roof may be. We put on our roof for seven dollars per hundred square feet. We will apply our cement on tin and iron roofs for ten dollars and twenty-five cents per square, it being on account of its elasticity and durability, the cheapest paint that can be used. Our cement is the best fiber extant, for patching around tin walls, chimneys, skylights, &c. We warrant all our work.

We invite all that want new roofs, or their old ones repaired, to call at Rick's store, store, No. 151 Main street, and examine samples and satisfy themselves of the durability and practicability of using this roofing.

N. B. We are prepared to fill orders for our cement, to those residing at a distance, with printed directions for using it.

Those wishing roofs or repairing done, will please call at Rick's store store, or address us through the Post Office.

MEMPHIS, TENN., Jan. 7th, 1887.

We have W. E. Childs & Co.'s Cement Roofing upon some of our buildings. It gives entire satisfaction, and we consider it the best article of which we have any knowledge. We are extensively engaged in laying in Memphis, and have within the last five years, covered buildings with all the various metallic and other roofings which have been introduced, and from experience and investigation, we, without hesitation, pronounce Childs & Co.'s, preferable to any other.

W. E. CHILDS & CO.—The roof on our pork house gives entire satisfaction. It has proved itself both Fire and Water Proof.

Some four months since, a large fire occurred directly adjoining us, and our roof was severely tried by the flames and burn-brands, but stood the test unharmed. We cordially recommend this roof as a good thing.

The Greatest Invention of the Age!

PERFECT PROTECTION FROM THE ELEMENTS.

WEST'S PATENT GALVANIC CEMENT FOR ROOFING.

THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our government has had scientific war experimenting, and that it has been the study of Architects and Builders for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and yet remain a permanent fixture. As yet, nothing has been attained without costing more than the people wish. The contraction, expansion and making of metal roofs, are an great a therapeutic element, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and are a great disappointment. A cement that have been brought into use for roofing, do not stand the action of the weather, but decay run when it is to attempt to use it, and crack worse than in one or two years become crazy, by and worthless; whereas, the inventor of this Galvanic Cement, has spent many years to overcome difficulties and can testify from his long experience, and numerous testimonials which are on file, that he has at last succeeded in compiled to their buildings, that his Cement is the cheapest and best article ever before known. The combination of a fluid article, and a dry powder, which is mixed for entire roofs, flat or steep; covering over old shingles without stripping, and nailing down the loose shingles, and repairing battlements, chimneys and any leaks. Covering carpenter tops, sheeting decks, &c. This Cement, by its non-combustion and adhesion, will prevent fire from spreading and undermining, and resists the extremes of heat and cold, better than anything ever invented, for entire roofs of tin, covering metal and the outside of wood buildings, making them fire proof. Its appearance is like slate; limited for the trade and for the home consumer.

The undersigned having secured the right to the State of Tennessee, will sell rights of Territory, to Counties or towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at short notice.

The roof is now being put on at the Jail in this city, for the benefit of all concerned, and warranted to cancel all other modes of roofing. This Cement is being roofed in the city of Memphis one year and has had no mode of roofing brought so to its qualities, which has proved satisfactory, to which a number of the most prominent citizens can testify.

See testimonials of the following gentlemen who have used it, with boiled oil:

For further information apply at the office, where samples may be seen, or address the undersigned, J. L. Morgan's Architectural Room, No. 8 Walker's Block, Memphis, Tenn., or address, Box 288, P. O.

C. W. STURDIVANT & CO., Proprietors.

[Successors to W. S. Bennett.

Attached is a note from John L. Morgan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrated Architect, and writer upon Architecture, whose exposure with this mode of roofing, without a cobbl, is satisfactory to all.

MEMPHIS, March 12, 1887.

MR. W. S. BENNETT: When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated architect, and author of the Sloan Work on Architecture, and asked his opinion as to the durability &c., of West's Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and in all that its advocates claim it to be; further saying that he is using it on a flat building for himself.

Respectfully, JOHN L. MORGAN, Architect.

MEMPHIS, March 2, 1887.

W. S. BENNETT, Esq., Dear Sir: The facts within our knowledge of the durability, &c., of West's Galvanic Cement Roofing, are as follows: The building you covered for me last Spring, we are happy to state has answered our expectations. We can therefore, recommend it to the public for all those purposes for which it is claimed, to be a good roof. It does not get out and run from the effects of the heat of the sun; nor does it harden and crack from the effect of the cold. Any person wishing to know more of this article, can call at our manufactory.

W. S. BRUCK & CO.,

Carriage Manufactory, Wonder St., Memphis, Tenn.

MEMPHIS, TENN., Dec. 8, 1886.

TO WHOM IT MAY CONCERN: This is to certify that W. S. Bennett, covered two roofs for me last Spring, with a composition called West's Patent Galvanic Cement; one on them was a new roof, the other on an old shingle roof, which are giving perfect satisfaction. He also repaired a dormant window, which leaked badly, and had rotted the wood to such an extent that the repair is holding which he succeeded in making perfectly tight. I do most cheerfully recommend his mode of roofing to the public, for all roofing purposes, and believe it to be a permanent fixture against fire and water. D. COCKRELL,

Proprietor Commercial Hotel.

SUPER'NT'D'T'S OFFICE, MEMPHIS & OHIO R. R.

MEMPHIS, TENN., Feb. 19, 1887.

MR. BENNETT, Dear Sir: Your Company having been troubled very much with leaky cars, put some of your Patent Paint upon them, and so far as my knowledge extends, I can cheerfully recommend it to any who wish a dry roof of any sort. Yours, &c.,

H. CORNELL, Superintendent.

MEMPHIS, TENN., Jan. 14, 1887.

MR. BENNETT has done some important work for me in his peculiar way, with Cotton-cloth coated with a preparation he makes and which appears to be Coal Tar. It is very efficient and light cost, and appears to promise considerable durability, from the preservative qualities of the Tar, which permeates the cloth and protects it from the influence of the air and water. The Composition does not liquify and run from the effects of the heat of the sun, nor does it harden and crack from the influence in the cold of winter.

THOS. HILL.

A CARD.

OUR NEW FIRM.

It affords me pleasure to announce to my friends and the public that I have associated with me my late partner, JAS. A. WILKINS, and my well-known assistant, THOS. HILL, under the familiar style of F. H. CLARK & CO.

The firm will start with no efficient force in each mechanical branch, the Watch department being under the supervision of Mr. Wilkins.

Our Stock will be assorted of the latest fashions, and prices low, as the same quality and style of goods can be purchased in Philadelphia or New York.

Each thankful for the liberal patronage extended to us during my fifteen years' residence in Memphis, and my aim will be to merit its continuance.

F. H. CLARK.

ESTABLISHED 1841.

OUR aim has been to keep pace with our growing city, and furnish those who want Goods in our line with good articles, and at low prices. Our assortment, for years, has been but little at any behind our Eastern cities, as our goods will show to any critical eye. Our leading branches are as follows:

WATCHES,

Of which we have every variety in general use, together with a large assortment made to our order, which for neatness of style and thin-keeping, are surpassed by none. In our assortment will be found the Night Day Watch and the Repeating Chronometer, giving the time to a minute in the dark.

JEWELRY.

Our assortment in this important branch is kept full by frequent receipts of all the new styles, whether of foreign or domestic production.

GUNS, GUNS.

We have made this branch of our business a study for years, not only considering quality with regard to the different qualities and merits of the different styles and makers, but of the kinds best suitable to our market. Our assortment, for a number of years, has been larger, to which we have recently made many additions of our own importation. We can furnish our customers with SHOT GUNS from $5 to $100; RIFL
