Have associated themselves for the transaction of a

General Land Agency Business

IN THE STATE OF ARKANSAS.

THEY will PAY TAXES on lands, and attend to the redemption of forfeited lands.

They will make personal examinations and survey of lands, in any part of the State, and report, to parties the character of the soil, timber, quantity of arable land upon any particular tract, and any desirable information required. They will endeavor to accommodate with lands, those who may be in search of a home, and will be pleased to receive a share of the patronage of the public in the purchase and sale of lands.

Work for hand in this State has been reserved for sale for the last five years, having been reported as swamp and overflowed, and which, by an act of the last Legislature was restored to the public domain, and subject to entry in a few months. The lists of the lands contain a great deal that has become valuable since its restoration, and the above firm from their experience in practical surveyors, one of whom has been engaged in the public surveys of the State for many years and other in Railroad and Swamp Land Surveying, and having raised an extensive knowledge of and throughout the State, will be prepared to make good locations for persons desiring to travel through the wild regions of Swamp Lands in order to find for sale, or subject to entry, either for a stipulated share of the land or a compensation in the money received.

Persons having business in Arkansas will find at their office, plats of lands subject to entry, with full descriptions of their improvements, quality, locality, &c., so that they can be at once directed to cheap and suitable places.

They will buy and sell Land Warrants or locate them for holders. Any business in the above line will be promptly attended to.

Patent Roofing.

Important to Architects and Builders.

W. E. CHILDS & CO.'S Patent Elastic Water and Fire Proof

CEMENT ROOFING.

WE would respectfully announce to the citizens of Memphis, and the surrounding country, that we are prepared to contract and lay on our FIRE and WATER PROOF CEMENT ROOFING. It being the only article yet invented, that will successfully resist the action of the sulphurous gases in every climate. It is perfectly Fire and Water Proof, and in point of durability, equal if not superior to any metallic roofing. We can put it on cotton duck, tar or shingle roofs, it making no difference how flat or steep the roof may be. We put on our roof for an outlay of from 25 to 40 cents per yard, according to our convenient on tin and iron roofs for two dollars and twenty-five cents per square, it being on account of its exceedingly elastic nature, and its adhesive qualities, that can be used. For cornices to the best finer extent, for painting around fire walls, chimneys, skylights, &c. We warrant all our work.

We invite all that want new roofs, or their old ones repaired, to call at Rick's above store, No. 384 N. in street, and examine our specimens and satisfy themselves of the durability and fire invulnerability of using this roofing.

N. B. We are prepared to fill orders for our cement, to those residing at a distance, with printed directions for using it.

Those taking roofs or repairing done, will please call at our store, or address us through the Post Office.

CINCINNATI, January 7th, 1857.

We have W. E. Childs & Co.'s Cement Roofing upon some of our buildings; it gives entire satisfaction, and we consider it the best roofing of which we have any knowledge. We are often very embarrassed in building in this city, and have within the last five years, covered our dwelling with all the various specimens and other roofing which have been introduced, and from experience and investigation, we without hesitation, pronounce Childs & Co.'s, preferable to any other.

WEST'S

PATENT GALVANIC CEMENT

FOR ROOFING.

THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had extensive experimenting and that it has been the study of Architects and Builders for years, to discover an article for roofing purposes, that would stand the weather changes of the climate, and be superior to fire and water, and remain a permanent fixture. As yet, nothing has been attained without coating more than the people wish. The present expensive and cumbersome of tin, iron, are so great in changeable climates, that they be no use, unless better repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, and the cracks will open, warm, and crack when frosty, and at or one or two years become crumbly, and worthless; whereas, the inventor of the Galvanic Cement, has labored for years to combine articles to obviate these difficulties, and can testify from his long experience, and numerous testimonials from middle portions, who have had the article applied to their buildings, that his Cement is the cheapest and best article ever before known. The substitution (this Cement) is such that it is calculated for new roofs, flat or steep; covering over old shingles without removing them; lining cave troughs, cisterns, privies, bottlemouts, chimneys and sky lights; covering cottage, smoke stacks, &c. This Cement, by its non-combustion and gas proof, prevents metal roofs from rusting and underscalding, and resists the extremes of heat and cold, better than anything ever invented, for either water or fire proofing metal and the outside of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humble cottage. The undersigned has purchased the right for the State of Tennessee, will sell rights of Territory, by Counties or towns, on reasonable terms.

The subscriber has also prepared to cover roofs of buildings, in any part of the State, at short notice.

☞ Any Gentleman that is desirous of seeing the article, samples may be seen in J. L. Morgan's Architectural Room, No. 3 Walker's Block, Memphis, Tenn., or address, Box 230, P. O.

Attached is a note from Samuel Sloan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrate Architect, and writer upon Architecture, when experienced with this mode of roofing, without a doubt, is satisfactory to all.

MEMPHIS, March 12, 1857.

MR. W. S. BENNETT: When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and author of the Slate Work on Architecture. I asked his opinion as to the durability &c., of West's Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and in all that its advocates claim it to be; farther saying that he is willing to use it on a fine building for himself.

Respectfully, JOHN L. MORGAN, Architect.

MEMPHIS, March 2, 1857.

W. S. BENNETT, Esq., Dear Sir: The facts within my knowledge of the durability, &c., of West's Galvanic Cement, are these: The Building you covered for us last Spring, we are happy to state has an overall our expectations. We can therefore, recommend it to the public for all roofing purposes; as a light, cheap, fire and water proof roof. It does not get wet and run from the effects of the heat of the sun; nor does it harden and crack from the effects of the cold. Any one desiring to know more of this article, can call at our manufactory.

MEMPHIS, TENN., Dec. 3, 1856.

TO WHOM IT MAY CONCERN: This is to certify that W. S. Bennett, now has on his roof at his dwelling, with a composition called West's Patent Galvanic Cement; one of them was a new deck, the other an old shingle roof, which was very much decayed. He also removed a dormant window, which leaked badly, and had lathed the old, or surface, and plastered it, and it leaks; which he succeeded in making perfectly tight. I do not cheerfully recommend the mode of roofing to the public, as being a good, durable, and beautiful, and a permanent fixture against fire and water.

MR. BENNETT, *Dear Sir:* Our Company having been troubled very much with leaky decks, put upon one of your Patent Paints more than, and so far as my knowledge extends, I can cheerfully recommend it to any who wish a dry roof of any sort. Yours &c.

H. COFFIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

TO THE PUBLIC: W. S. Bennett has applied to me to put his cement in cover our buildings with West's Galvanic Cement; it being a new thing thought we would try it; and it applied to our Blacksmith Shop, Engine House and Cotton attached to the Foundry. They have proved all required of a water proof roof, having withstood some of the severest storms, and we are well pleased with it. We can only add, try it and you will be satisfied.

CURTIN & KNAPP, Iron Founders.

MR. Bennett has done some small amount of roofing for me in this peculiar way, with Cotton cloth sealed with a preparation the basis of which appears to be Coal Tar. It is a very efficient and light roof, and appears to promise considerable durability. It is far more effective than the tin of the composition, which promises to be very effective against the influence of the sun and water. The roofing is cool from the reflection of the rays of the heat of the sun in summer; nor does it harden and crack from the influence in the cold of winter.
