Patent Roofing.

Important to Architects and Builders.

W. E. CHILDS & CO.'S Patent Elastic Water and Fire Proof

CEMENT ROOFING.

WE would respectfully announce to the citizens of Memphis, and the surrounding country, that we are prepared to contract and put on, our FIRE and WATER PROOF CEMENT ROOFING, being the only article yet invented, that will successfully resist the action of the atmosphere in every climate. It is perfectly Fire and Water Proof, and in point of durability, equal if not superior to any metallic roofing. We can put it on over old tin, tar or shingle roofs, it making no difference how flatter steep the roof may be. We put on our roof for seven dollars per hundred square feet. We will apply our cement on tin and tron roofs for two dollars and twenty-five cents per square, it being on account of its elasticity and durability, the cheapest paint that can be used. Our cement is the best lighter extant, for patching around fire walls, chimneys, skylights, &c. We warrant all our work.

We provide all that want new roofs, or their old ones repaired, to call at Rick's stove store, No. 284 Main street, and examine samples and satisfy themselves of the durability and practicability of using the roofing.

N. B. We are prepared to fill orders for our cement, to those residing at a distance, with printed directions for using it.

Those wishing roofs or repairing done, will please call at Rick's stove store, or address us through the Post Office.

CINCINNATI, January 7th, 1857.

We have W. E. Childs & Co's. Cement Roofing upon some of our buildings. It gives entire satisfaction, and we consider it the best roofing of which we have any knowledge. We are extensively engaged in building in this city, and have within the last five years, covered buildings with all the various metallic and other roofings which have been introduced, and from experience and investigation, we, without hesitation, pronounce Childs & Co.'s, preferable to any other.

CINCINNATI, O., May 29th, 1857.

W. E. CHILDS & CO.—The roof on our park house gives entire satisfaction. It has stood well both Fire and Water Proof.

Some four months since, a large fire occurred directly adjoining us, and our roof was severely tried by the flames and burning brands, but stood the test unharmed. We cordially recommend this roof as a good thing.

CINCINNATI, May 8th, 1857.

We have fully investigated W. E. Childs & Co.'s Patent Cement Roofing, and we consider that it is superior to any other kind now in use, not excepting the metals. We recommend it to all who wish a cheap, durable and handsome roof.

The Greatest Invention of the Age!

PERFECT PROTECTION FROM THE ELEMENTS.

WEST'S PATENT GALVANIC CEMENT FOR ROOFING.

THE subscriber is now prepared to cover roofs of buildings, with a more and better article than ever before known. The public are aware that our Government has had scientific men experimenting, and that it has been the study of Architects and Builders for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than ordinary roofs, and in consequence, expansion and cracking of metal roofs, are so great it changes the climates, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Composition and Cement that have been brought into use for roofing, do not stand the action of the weather, but they can when it is warm, and crack when frosty, and are one or two years become useless, and worthless. Now, the inventor of the Galvanic Cement has labored twenty years to combine articles to obviate these difficulties, and can testify from his long experience, and from the testimonials from reliable persons, who have had his combination applied to their buildings, that his Cement is the cheapest and best article ever before offered, as the combination of this Cement is such, that it is calculated for entire new roofs, felt or shingle-covering over old shingles without removing them, tin, iron, sides of houses, around battlements, chimneys and sky lights. Covering carriages, steamboats, &c. Its cheapness, ease of application and durability, prevents metal roofs from rusting and undermining, and resists the extremes of heat and cold, better than the metals, and superior to metal roofs or for covering metal and the out-side of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the rich, and cheap for the humble cottage.

The undersigned having secured the right to the State of Tennessee, will sell rights of Territory, by Counties or Single Rights, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at short notice.

This roof is now being put on in this city, for the benefit of all concerned, and warranted to excel all other modes of roofing. The Cement has been molded in the city of Memphis one year, and has had his mode of roofing tested as to its qualities, which has proved satisfactory, to which a number of the most prominent citizens can testify.

See testimonials of the following gentlemen who have had it applied to their roofs.

For further information enquire at the office, where samples may be seen in J. L. Morgan's Architectural Rooms, No. 3 Walker's Block, Memphis, Tenn., or address, Box 320, P. O.

C. W. STURDIVANT & CO., Proprietors.
[Successors to W. B. Bennett.

Attached is a note from John L. Morgan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrated Architect, and writer upon Architecture, whose experience with this mode of roofing, without a could, is satisfactory to all.

MEMPHIS, March 12, 1857.

MR. W. B. BENNETT: When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and author of the Book Work on Architecture, I asked his opinion as to the durability &c., of West's Patent Roof, which as you are aware is the city of Memphis, under test and has not had no hesitation in saying to me that it is a good and durable roof, and is all that its advocates claim it to be; farther saying that he would use it on a fire building for himself.

Respectfully, JOHN L. MORGAN, Architect.

MEMPHIS, March 3, 1857

W. B. BENNETT, Esq.—Dear Sir: The facts within our knowledge of the durability, &c., of West's Galvanic Cement, are as follows: The building put covered on last Spring, we are happy to state has answered our expectations. We can therefore, recommend it to the public for all roofing purposes; as a light, cheap, fire and water proof roof. It does not get sort and run from the effects of the heat of the sun; nor does it harden and crack from the effects of the cold. Any persons wishing to know more of this article, can call at our manufactory.

N. S. ARICK & CO.,
Carriage Manufactory, Monroe St., Memphis, Tenn.

MEMPHIS, TENN., Dec. 6, 1856.

TO WHOM IT MAY CONCERN: This is to certify that W. B. Bennett, covered two roofs on my premises, with a composition called West's Patent Galvanic Cement; one of these was at my office, the other at the Eagle Hotel, which are giving perfect satisfaction. He also repaired a dormant window, which leaked badly, and had stood the skill of carpenters to prevent its leaking, which he succeeded in making perfectly tight. I do most cheerfully recommend his mode of roofing to the public, for all roofing purposes, and believe it to be a permanent fixture against fire and water.

D. COCKRILL,
Proprietor Commercial Hotel.

SUPERINT'T'S OFFICE, MEMPHIS AND HERNANDO R. R.,
MEMPHIS, TENN., Feb. 19, 1857.

MR. BENNETT, Dear Sir: Our Company having been troubled very much with leaky cars, put some of your Patent Paint upon them, and so far as my knowledge extends, it has proved perfectly satisfactory to any who wish a dry roof of any sort.

Yours, &c.,
H. COFFIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

TO THE PUBLIC: W. B. Bennett has made application to us last summer to cover our buildings with West's Galvanic Cement; it being a new thing we would try it; but it applied to our Blacksmith Shop and Engine Worker attached to the Foundry. They have proved all Rightful as a Fire, and Water Proof without some of the greatest storms, and are giving good satisfaction. We can only add, try it and you will be satisfied.

CUTHBERT & KNAPP, Iron Founders.

MEMPHIS, Jan. 14, 1857.

Mr. Bennett has done some small amount of roofing for me in his peculiar way, with Cement, and I can say a preparation the basis of which appears to be Coal Tar, it is a very durable and tight roof, and appears to promise considerable durability, from the preservative qualities of the composition, which penetrates the cloth and protects it from the heat of the sun, and from the cold. Composition does not liquify and run from the effects of the heat of the sun in summer; nor does it harden and crack from the influence in the cold of winter.
