Patent Roofing.

Important to Architects and Builders.

W. E. CHILDS & CO.'S

Patent Elastic Water and Fire Proof

CEMENT ROOFING.

WE would respectfully announce to the citizens of Memphis, and the surrounding country, that we are prepared to contract and put on, our FIRE and WATER PROOF CEMENT ROOFING, it being the only article yet invented, that will successfully resist the action of the atmosphere in every climate. It is perfectly Fire and Water Proof, and in point of durability, equal if not superior to any metallic roofing. We can put it on over old tin, tar or shingle roofs, it making no difference how flat or steep the roof may be. We put on our roof for seven dollars per hundred square feet. We will supply our cement on tin and iron roofs for five dollars and twenty-five cents per square, it being on account of its elasticity and durability, the cheapest paint that can be used. Our cement is the best thing for calking decayed shingles, gutters, chimneys, skylights, &c. We warrant all our work.

We invite all that want new roofs, or their old ones repaired, to call at Nick's store above, No. 284 Main street, and examine samples and satisfy themselves of the durability and practicability of using this roofing.

N. B. We are prepared to bid orders for our cement, to those residing at a distance, with printed directions for using it.

Those wishing roofs or repairing done, will please call at Nick's store above, or address us through the Post Office.

The Greatest Invention of the Age!

PERFECT PROTECTION FROM THE ELEMENTS.

WEST'S

PATENT GALVANIC CEMENT

FOR ROOFING.

THE subscriber now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had scientific men experimenting, and that it has been the study of Architects and Builders for years, to discover an article for roofing purposes, that would stand the climate of the Weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the price will bear. The contraction, expansion and rending of metal roofs, are so great in changeable climates, that they become useless, most being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years become useless. The subscriber's Whereas, the inventor of the Galvanic Cement, has labored twenty years to compose an article to obviate those difficulties and can testify from his long experience, and numerous testimonials from reliable persons, who have had his combination applied to their buildings, that his Cement is the cheapest and best article ever before known. The combination of this Cement is such that it is calculated for entire new roofs, flat or steep; secondly over old shingles without removing them; lining save troughs, seaming around battlements, chimneys and sky lights. Covering cut water tables, cornices, &c. This Cement, by its non-conduction and galvanism, prevents metal roofs from rusting and corroding, and resists the extremes of heat and cold, better than anything ever invented, for entire roofs or for covering metal and the out-side of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humble cottage.

The undersigned having secured the right to the State of Tennessee, will sell rights of Territory, by Counties or towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at short notice.

This roof is now being put on at this city, for the benefit of all concerned, and warranted to equal all other modes of roofing. The subscriber having resided in the city of Memphis one year, and has had his mode of roofing tested to his satisfaction, which has proved satisfactory, to which a number of the most prominent citizens can testify.

See testimonials of the following gentlemen who have used it, with houses of them.

For further information enquire at the office, where samples may be seen in J. L. Morgan's Architectural Rooms, No. 2 Walker's Block, Memphis, Tenn., or address, Box 520, P. O.

MEMPHIS, March 12, 1857.

MR. W. S. BENNETT: When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect and author of the Model Work on Architecture. I asked his opinion as to the durability Art, of West's Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying that it was the best thing of the kind he knew of, and that he advocates claim it to be; further saying that he is using it on a fine building for himself.

JOHN L. MORGAN, Architect.

Sometime in November, 1856, I put on a roof of West's Patent Roofing, which I warrant to be fire and water proof, and in point of durability, equal if not superior to any metallic roofing. We can put it on over old tin, tar or shingle roofs, it making no difference how flat or steep the roof may be. We put on our roof for seven dollars per hundred square feet. IMPORTANT INSTRUCTIONS.—The single rate of letter postage by either of the above lines, (and the same is true of all the British lines) is or from any point in the United States, or from any point in the United Kingdom of Great Britain, to or from any point in Great Britain, is 24 cents—pre-payment optional. Newspapers, each two cents (United States, and two cents British); each country to collect its own postage, whether the paper is sent from or received in the United States, or Great Britain. Newspapers, each British postage paid by a penny stamp (equal to two cents.) They must be sent in narrow bands open at the ends. Letters for France, Switzerland, Italy, to pass through Great Britain, in the open mail, must be prepaid 24 cents when the Atlantic conveyance is by United States packets, and 5 cents when the British packets, except from California or Oregon, when the same is to be paid in, in the foreign mission, 36 cents, and in the latter, 10 cents. Thus in the one case, the Atlantic postage is to be collected at the mailing office, in the United States; and in the other, it is to be collected, together with the British transit and other foreign postage, at the office of delivery. Between Great Britain and Greece and California, the single rate of letter postage is 29 cents.

Periodical works and pamphlets may be sent from the United States to Great Britain, and vice versa, at two cents of United States postage each, if they do not exceed two ounces in weight, and at 1 cents per ounce, or fraction of an ounce, when they exceed that weight; to be collected in all cases in the United States; and the same will be subject to an additional like charge in the United Kingdom. When sent to France, Algeria, or other in Turkey, Syria and Egypt, in which France has possessions, via Southampton, Marseilles, Rhodes, Salonica, Samoun, Smyrna, Cairo, Trebizond, Tripoli in Syria, Tultcha Varna and Yolo; all to depend on the option of the parties, or by way of Hamburg, or Government of the United States packets, vice newspapers 2 cents each; periodical works, pamphlets or pamphlets, one cent an ounce, or fraction of an ounce; and all other kinds of printed matter the same as domestic rates; to be in all cases collected in the United States, whether sent or received. France, in like manner, collects its own postage on all kinds of printed matter, whether sent or received. Prussia has an exchange office for French mails, are New York, Boston, Philadelphia, and San Francisco. For rates of postage in French mail to countries by food Brazil, see Foreign Post, p. Table.

Single rate of letter postage by the Prussian closed mail to Prussia, Austria, and all the other German States, 30 cents, being the full postage—pre-payment optional. Newspapers 6 cents each, being also the full postage—pre-payment required. This mail is sent by every steamer, being landed at Liverpool by the Cuxhaven and Hamburg packets, with the lesser of the best lot in Memphis for manufacturer purposes, in the 10 lots, and containing one and three-quarters across it will be sold in one and a half inch, or two inch, or thousand white pine. Also a lot with a fine Brick Dwelling, on Market street near P. Tiles. A List of 27 feet front on Second street north of Adams, and 27 feet front on Linden street, near to J. J. Rawlings, all on long time.

DISSOLUTION.

ON the 1st June, 1856, the firm heretofore existing between F. H. CLARK and A. C. WURZACH was dissolved by mutual consent. F. H. Clark is charged with the settlement of the business of the late firm of F. H. Clark & Co.

F. H. CLARK,
A. C. WURZBACH.

NEW FIRM.

The subscribers have associated themselves together under the firm of F. H. CLARK & CO.,

F. H. CLARK,
JAS. F. WILKINS,
THOS. HILL.

A CARD.

OUR NEW FIRM.

It affords the pleasure to announce to my friends and the public that I have associated with me my former partners, JAS. F. WILKINS, and my well-known assistant, THOS. HILL, under the familiar style of F. H. CLARK & CO.

The new firm will start with an efficient force in each mechanical branch, the Watch department being under the supervision of Mr. Wilkins.

We intend to keep all the latest fashions, and present a lot as the same quality and style of goods can be purchased in Philadelphia or New York.

I am thankful for the liberal patronage extended to me during my fifteen years' residence in Memphis, and my aim will be to merit its continuance.

F. H. CLARK.

ESTABLISHED 1841.

OUR aim has been to keep pace with our growing city, good articles, and at fair prices. Our assortment, for years, has been but little if any behind our Eastern cities. It is more extensive this season than ever. Our leading brands are always reliable.

WATCHES,

Of which we have every variety in general use, together with a large assortment made to our order, which for neatness of style and time-keeping, are surpassed by none. In our assortment will be found the Right Day Watch and the Repeating Chronometer, giving the time to a minute in the dark.

JEWELRY.

Our assortment in this important branch is kept full by frequent receipts of all the new styles, whether of foreign or domestic production.
