Patent Roofing.

Important to Architects and Builders.

W. E. CHILDS & CO.'S Patent Elastic Water and Fire Proof

CEMENT ROOFING.

WE would respectfully announce to the citizens of Memphis, and the surrounding country, that we are prepared to contract and put on our FIRE and WATER PROOF CEMENT ROOFING, it being the only article yet invented, that will successfully resist the action of the atmosphere in every climate. It is perfectly Fire and Water Proof, and in point of durability, equal if not superior to any metallic roofing. We can put it on over old tin, tar or shingle roofs, it making no difference how flat or steep the roof may be. We put on our roof for seven dollars per hundred square feet. We will apply our cement on tin and iron roofs for two dollars and twenty-five cents per square, it being on account of its elasticity and durability, the cheapest paint that can be used. Our cement is the best thing extant, for patching around fire walls, chimneys, skylights, &c. We warrant all our work.

We invite all that want new roofs, or their old ones repaired, to call at Sisk's store store, No. 294 Main street, Memphis, and have within the hour, a specimen of the durability and practicability of using this roofing.

N. B. We are prepared to fill orders for our cement, to those residing at a distance, with printed directions for laying it.

Those wishing roofs or repairing done, will please call at Sisk's store store, or address us through the Post Office.

The Greatest Invention of the Age!

PERFECT PROTECTION FROM THE ELEMENTS.

WEST'S PATENT GALVANIC CEMENT FOR ROOFING.

THE subscriber is now prepared to cover roofs of buildings, with a new and better article than any ever before known. The public are aware that our Government has had scientific men experimenting, and that it has been the study of Architects and Builders for years, to discover an article for roofing purposes, that would stand the sudden changes of weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the ordinary price. The contraction, expansion and rending of metal roofs, are so great in changeable climates, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofs, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years exposure to the sun, and weather, they become the inventor of the Galvanic Cement has labored twenty years to remove these difficulties, and can safely

THIS Institution is now in successful operation, and is in every part of the State, at short notice. This roof is now being put on in this city, for the benefit of all concerned, and warranted to stand the storms of Spring. C. W. STURDIVANT & CO., Proprietors,

[Successors to W. S. Bennett.

Attached is a note from John L. Morgan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrated Architect, and writer upon Architecture, whose experience with this mode of roofing, without a doubt, is satisfactory to all.

MEMPHIS, March 12, 1857.

MR. W. S. BENNETT: Dear Sir—Your roofing, for a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and showed the roofing to him, and he stated that he had no opinion as to the durability &c., of West's Patent Roof, such as you are using in the city of Memphis, and that he had no fear of your roofing, leaving me that it is a good and durable roof, and is all that its advocates claim it to be; further saying that he would use it in a fine building himself.

Respectfully, JOHN L. MORGAN, Architect.

MEMPHIS, March 2, 1857.

W. S. BENNETT, Esq., Dear Sir—Having no doubt in my knowledge of the durability, &c., of West's Galvani Cement, are there a sufficient number of buildings in Memphis, and we are happy to state has answered our expectations. We can therefore, recommend it to the public for all roofing purposes as a light, cheap, fire and water proof roof. It does not get soft and run from the effects of the heat of the sun; nor does it harden and crack in cold weather. We have no hesitation in the above more of this article, can call at our manufactory.

W. E. CHILDS & CO. J. D. BREAD & CO.,

Carriage Manufactory, Monroe St., Memphis, Tenn.

MEMPHIS, TENN., Dec. 8, 1856.

TO WHOM IT MAY CONCERN: This is to certify that W. S. Bennett, covered two roofs for me last Spring, with a composition called West's Patent Galvanic Cement; one of them was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a dormant window, which leaked badly, and had rotted the sash of decayed wood, and prevented leaking, which he succeeded in making perfectly tight. I do most cheerfully recommend this mode of roofing to the public, for all roofing purposes, and believe it to be a permanent fixture against fire and water. D. COCKRELL,

Superintendent Memphis Commercial Hotel.

SUPERINT'S OFFICE, MEMPHIS & OHIO R. R.

MEMPHIS, TENN., Feb. 19, 1857.

MR. BENNETT: Dear Sir: Your Company having been troubled very much with leaky cars, put some of your Patent Paint upon them, and so far as my knowledge extends I can cheerfully recommend it to any who wish a dry roof of any sort. Yours, &c.,

H. COOPER, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

TO THE PUBLIC: W. S. Bennett made application to us last summer to cover our building with West's Galvanic Cement; it being a new thing thought we would try it; had it applied to our Blacksmith Shop and Engine House, attached to the Depot. They have proved all required of a water proof roof, having withstood some of the greatest storms, and are giving good satisfaction. We can only add, if any more, it will be satisfied.

CUTTS & KNAPP, Iron Founders.

MEMPHIS, Jan. 14, 1857.

Mr. Bennett has done some small amount of roofing for me in his peculiar way, with Cotton stuff coated with a preparation of his own, which proves to be Coal Tar. It is a very effectual and tight roof, and appears to promise considerable durability, from the preservative qualities of the composition, which penetrates the cloth and protects it from the influence of the air and water. The Composition does not injure and rots from the effects of the heat of the sun in summer, and does not crack and crack from the influence in the cold of winter.
