Patent Roofing.

Important to Architects and Builders.

W. E. CHILDS & CO.'S

Patent Elastic Water and Fire Proof

CEMENT ROOFING.

WE would respectfully announce to the citizens of Memphis, and the surrounding country, that we are prepared to contract and put on, our FIRE and WATER PROOF CEMENT ROOFING, it being the only article yet invented, that will successfully resist the action of the atmosphere in every climate. It is perfectly Fire and Water Proof, and in point of durability, equal if not superior to any metallic roofing. We can put it on over old tin, tar or shingle roofs, it making no difference how flat or steep the roof may be. We put on our roof for seven dollars per hundred square feet. We will supply our cement on tin and iron roofs for two dollars and twenty-five cents per square, it being on account of its elasticity and durability, the cheapest paint that can be used. Our cement is the best three extant, for painting around fire walls, chimneys, skylights, &c. We warrant all our work.

We invite all that want new roofs, or their old ones repaired, to call at Rick's store above, No. 264 Main street, and examine samples and satisfy themselves of the durability and practicability of using this roofing.

N. B. We are prepared to fill orders for our cement, to those residing at a distance, with printed directions for laying it.

Those wishing roofs or repairing done, will please call at Rick's store above, or address us through the Post Office.

☞ County rights for sale.

We have W. E. Childs & Co.'s Cement Roofing upon some of our buildings in this city, which we have carefully examined, and consider it the best roofing of which we have any knowledge. We are extensively engaged in but-ding in this city, and have seen the lack due years, covered buildings with all the various metals and other roofings which have been introduced, and from experience and investigation, we believe Mr. Stewart Hotel, proprietor Childs & Co.'s, preferable to any other.

W. E. CHILDS & CO.—The roof on our pork house gives entire satisfaction. It has proved itself both Fire and Water Proof.

Some four months since, a large fire occurred directly adjoining us, and our roof was severely tried by the sparks and burning brands, but stood the test in triumph. We cordially recommend this roof as a good thing.

The Greatest Invention of the Age!

PERFECT PROTECTION FROM THE ELEMENTS.

WEST'S PATENT GALVANIC CEMENT FOR ROOFING.

THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had scientific soft experimenting, and that it has been found that sixty of Architects and Builders have adopted it for the use of the Government, and have proved it to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be imperviously to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the price of tin. The contraction, expansion and rending of metal roofs, are so great in changeable climates, that they become useless, unless being repaired at great expense. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought forward, have not stood the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years become crumbly, and worthless. Perceiving the inventor of the Galvanic Cement has labored for six years to overcome difficulties to obviate those difficulties, and can testify from his long experience, and numerous testimonials from reliable persons, who have had his combination applied to their buildings, that his Cement is the cheapest and best article ever before known. The combination of this Cement is such, that it is calculated for entire new roofs, flat or pitched, covering over old shingles without removing them; filling gave troughs, covering around battlements, cornices and skylights, covering for tops, steamer decks, &c. The Cement, by its non-conduction and calcinism, prevents metal roofs from rust, tin and sheet iron roofs from decay, and resists the extremes of heat and cold, better than anything ever invented, for entire roofs or for covering metal and the outside of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humble cottage.

The undersigned having secured the right to the State of Tennessee, will sell rights of Territory, by Counties or towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at short notice.

The roof is now being put on a large scale, for the benefit of all concerned, and warranted to excel all other modes of roofing. The subscriber having resided in the city of Memphis one year, and had his health of rapidly ten-ed as to its qualities, which has proved satisfactory to a number of the most prominent citizens can testify.

See testimonials of the following gentlemen who have used the roofing for years:

For further information enquire at the office, where samples may be seen in J. L. Morgan's Architectural Room, 3 Walker's Block, Memphis, Tenn., or address, Box 230, P. O.

C. W. STURDIVANT & CO., Proprietors,
[Successors to W. S. Bennett.]

Attached is a note from John L. Morgan, Esq., Architect, by which you can see the opinion of Mr. Sloan, the celebrated Architect, and writer upon Architecture, whose experience with this mode of roofing, without a doubt, is satisfactory. Read:

MEMPHIS, March 12, 1857.

MR. W. S. BENNETT: When in Philadelphia, Pa., a few months ago, I called on Mr. Thomas Sloan, the celebrated Architect, and author of the Sloan Work on Architecture. I asked his opinion as to the durability of the West's Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying to me that the Galvanic roof, properly put on, was the best article of the kind that he knew of, and that its attractive claim it to be; further saying that he is using it on a fine building for himself.

JOHN L. MORGAN, Architect.

MEMPHIS, March 2, 1857.

W. S. BENNETT, Esq., Dear Sir: I take this opportunity of expressing my knowledge of the durability, &c., of West's Galvanic Cement, are these: The building you covered for me last spring, is still in good order, and stands all weather conditions. We can therefore, recommend it to the public for all roofing purposes, and if any persons wishing to know more of this article, can call at our manufactory.

W. S. BENNETT & CO.

Carriage Manufactory, Monroe St., Memphis, Tenn.

MEMPHIS, TENN., Dec. 8, 1856.

TO WHOM IT MAY CONCERN: This is to certify that W. S. Bennett, covered two roofs for me last Spring, with a composition called West's Patent Galvanic Cement, one of 1500 and the other of 1000 feet superficial, which stand every effect satisfaction. He also repaired a plank shed roof, which leaked badly and had baffled the skill of carpenters to prevent its leaking, which he succeeded in making perfectly tight. I do most cheerfully recommend the inventor of this roofing to all for all roofing purposes, and believe it to be a permanent fixture against fire and water. J. COCKRELL,
Superintendent Commercial Road.

BEPPER'S'T'S OFFICE, MEMPHIS & OHIO R. R. }
MEMPHIS, TENN., Feb. 19, 1857. }

MR. BENNETT, Dear Sir: Our Company having been troubled very much with leaky cars, put some of your Patent Paint Roofing on one of our cars, and after two months, I can cheerfully recommend it to any who wish a dry roof of any sort. Yours, &c.

H. COFFIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

TO THE PUBLIC: W. S. Bennett made application to me last summer to cover our buildings with West's Galvanic Cement; it being a new thing thought we would try it; and it proved a complete success. Brunner Blacksmith Shop and Engine House attached to the Foundry. They have proved all required of a water proof roof, having withstood some of the greatest storms, and are strong and adhesive. We can only add, try it and you will be satisfied.

CURTIS & KNAPP, Iron Founders.
MEMPHIS, Jan. 14, 1857.

Mr. Bennett has done some small amount of roofing for me in the city of Memphis, with Galvanic Cement, and with a preparation the basis of which appears to be Coal Tar. It is a very effectual and lightroof, and appears to promise considerable durability, from the preservative qualities of the composition, which penetrates the cloth and protects it from the influences of the air and water. The Composition does not liquify and run from the effects of the heat of the sun in summer; nor does it harden and crack from the influence in the cold of winter.

FINE ARTS.

MRS Virginia J. Sullivan, the well known Artist of the South, late of the West, would feel leave to inform the Ladies of Memphis that she has taken a studio in one of the rooms connected with the Photographic Gallery of Messrs. F. H. Clark & Co., where she proposes to teach the new and beautiful art of Grecian Painting. This art, of the highest order, is superior to all of Mezzotint Engravings. Also, French Lithographs and Photographs into a most magnificent Oil Painting, which is unsurpassed in beauty and durability.

Mrs. Sullivan also teaches the Oriental Glass Painting, and Porcelainania Glass Painting; also every variety of Embroidery done with worsted, silk, chenille, linen, and in gold. Mrs. Sullivan also teaches the beautiful arts of Leather Embossing and making Wax Fruit and Flowers. Also Stamping taught on improved plan. A thorough knowledge of either of the above arts can be obtained in from ten to fifteen lessons.

☞ Mrs Sullivan invites the Ladies to call and see her specimens and terms.
