ROBUST HEALTH

is not always enjoyed by those who seem to possess it. The taint of corrupted blood may be secretly undermining the constitution. In time, the poison will certainly show its effects, and unless the more virulent forms of disease are to be entailed to permeate the system. Such pimple, sty, boil, skin disorder and sense of unnatural lassitude, or languor, is one of Nature's warnings of the consequences of neglect.

Ayer's Sarsaparilla

is the only remedy that can be relied upon in all cases where the blood is vitiated by hereditary disease and the special corruptions of the blood. It is the only alterative that is intelligently and positively known to cleanse the system of scrofulous and Mercurial impurities and the pollution of Contagious Blood Poisons. It neutralizes the poisons left by Diphtheria and Scarlet Fever, and eradicates rapid prostration from the enfeeblement and debility caused by these diseases.

Myriads of Cures

Achieved by AYER'S SARSAPARILLA, in the past forty years, are attested, and there is no blood disease, at all possible of cure, that will not yield to it. Whatever the ailments of this class, and wherever found, from the scurvy of the Arctic circle to the "veld-sores" of South Africa, this remedy has afforded health to the sufferer by whom it was employed. Druggists everywhere can cite numerous cases, within their personal knowledge, of remarkable cures wrought by it, where all other treatment had been unavailing. People will do well to

Trust Nothing Else

than AYER'S SARSAPARILLA. Numerous crude mixtures are offered to the public as "blood purifiers," which only allure the patient with the pretense of many cheap doses, and with which it is folly to experiment while disease is steadily becoming more desperate and difficult of cure. Some of these preparations contain baneful harm. Bear in mind that the only medicine that can radically purify the vitiated blood is

Ayer's Sarsaparilla,

FINANCE AND TRADE

WEEKLY REVIEW.

The only noticeable change in the financial market the past week is a fulfillment of the prediction of an easier condition of money, apparent in the fact that bankers are honoring all first-class paper, but are not pressed by any unusual demand. Of local securities there is but little to say, the exception being increase of inquiry for Taxing-District bonds. Values of other stocks are nominally as quoted. The business at the banks shows the usual increased aggregate characteristic of the first week of the month. The Clearing-house statement for the week is appended, indicating the business of the week as compared with previous years:

	Last Week.	Per Previous
Monday	$368,137 12	$322,996 11
Tuesday	392,769 62	296,371 61
Wednesday	369,579 41	294,579 81
Thursday	369,1 41 11	275,469 41
Friday	386,931 41	299,371 41
Saturday	273,042 22	261,885 42
Total for the week	$1,913,522 24	$1,751,162 24
Corresponding week 1884	1,572,262 24	1,572,262 24
Same week 1883	1,345,147 62	1,345,147 62

The continued fair and apparently settled weather which prevailed the first half of the week, coupled with the near approach of planting time, produced good effects on business in every department of general trade. A general revision of price lists was made early in the week, provisions and feed stuffs advancing, but produce and general supplies being a shade lower. In first hands, however, ruled in all departments. J. La Croix reports as follows concerning the live-stock market: "Receipts of cattle the past week, although quite liberal, were not as heavy as the previous week. Prices remained firm and unchanged at last quotations. There is on hand a fair supply of good butchers' grades, while the market is about bare of thin steers and medium grades, which are still in good demand. The outlook for the coming week is rather favorable. Receipts of hogs have been very light. Prices were stronger, some choice butchers' grades selling as high as 5c. At present the market is about bare. Prices strong, as quoted, with a tendency to go higher. Prospects very good. Sheep in fair supply here, and selling slow." The horse and mule market is livening up and a busy season in that line of business is near at hand. The market is well stocked and facilities have been perfected by which no depletion of stock can result. The weather was less favorable for the planters the latter part of the week, river transportation being very much retarded by the intensely cloudy and foggy condition, which caused a slack-off in aggregate of business in this department.

In the cotton market quietness reigned supreme during the greater part of the week, under the influence of unsteadiness at New York and Liverpool, but confidence in prevailing values was not much shaken, and after the close of the second day there was no disposition to lower prices. The week's transactions were fair in comparison with the previous week's, especially in the absence of any stimulating influences. The average weight of bales in February 1st this season as compared with previous seasons is as follows:

1884	490.83
1883	499.00
1882	490.00
1881	506.00
1880	478.00
1879	500.00

Summarizing the week's business the local market opened steady, middling quoted at 10½c, the price ruling at the close of the previous week, from which 1-16c declines were made, and the market closed quiet at 10 7-16c, as the following comparative tables indicate:

	Feb. 6th	Jan. 30th
Ordinary	Nom.	Nom.
Good Ordinary	9	9
Middling	10 3-16	10¼
Good Middling	10 5-16	10½
Fair	10 11-16	10¾

Sales, 95; receipts, 175; stock, 49,510.

Receipts at Memphis during the official week aggregated 5439 bales, against 6211 bales the previous week, 10,569 bales the corresponding week last season, and 19,049 in 1883. The total receipts since September 1, 1884, were 375,970 bales, against 360,116 bales at the corresponding period last season, an increase of 15,854 bales. At the same time in 1882 the receipts were 400,468 bales.

Shipments during the official week aggregated 7637 bales, against 14,139 bales the previous week, 15,135 bales the corresponding week last season, and 15,929 bales in 1883. The total shipments since September 1st were 272,697 bales, against 297,465 bales in 1884, and 316,985 bales in 1883.

The total stock on hand was 108,011 bales, against 78,490 bales at this time last year, in 1883, 84,038 bales.

Sales in Memphis during the official week aggregated 10,250 bales, of which exporters took 3250 bales, spinners 7000 bales, and speculators 250 bales, of which 12,000 bales were to exporters, and 125,525 bales to spinners and speculators. Middling firm at 10 7-16c.
