NEWS OF THE FINANCIAL WORLD—NEW YORK AND PHILADELPHIA STOCK PRICES

SURPRISING STRENGTH SHOWN ON THE NEW YORK EXCHANGE

Position Taken by Bears Disregarded and Prices Move Without Reference to Their Opinion

New York, Sept. 9.—The stock market movements in today's trading indicated a resumption of the strength which prevailed all through the first half of the year. The speculative element had been taken a position on the bear side and looked for a quiet market. Their position was disregarded and prices moved without reference to their opinion.

It had been assumed by strong interests, for some days past, that in some way a steel strike would be averted and all the steel issues were in urgent demand from the start, there being a long list of advances in those issues ranging from 1 to 18 points.

The assertions that the short interest in Crucible had been privately settled were forgotten when that stock started an upward movement and was carried to 189, against 171 the close yesterday. Baldwin Locomotive made a gain of more than 10 points, crossing 128, and Republic Iron and Steel advanced more than 5 points, crossing 95.

United States Steel was heavily traded in, moving up nearly 3 points to 106½, with the buying becoming more urgent after the publication of the tonnage report.

Mexican Petroleum was in demand, Pan American interests and an English syndicate both buying the stock and forcing it up nearly 7 points to above 212.

Many other groups of stocks were active and strong, including the rubber issues and the low-priced railroads.

The bond market continued virtually unchanged. Transactions in railroad industrial issues continued small, with some of the low priced railroad bonds in demand from speculative sources.

STOCKS STRONGER ON SHORT COVERING

Wall Street in More Cheerful Mood Over Current Developments

ACCUMULATION LIMITED

New York, Sept. 9.—The New York Evening Sun's financial review this afternoon is as follows:

Covering by shorts, which was represented urgent at intervals because of the limited supply of stocks, imparted pronounced strength to virtually the entire list in today's securities market.

Wall street was equally if not more cheerful than yesterday over current developments, but, whereas opportunity was lacking Monday to give full expression to the better feeling prevailing in financial circles, today the impending holiday accelerated the covering movement which frequently assumed proportions to prove alluring to some portion of the public at least.

Outside accumulation was limited, of course, and those who bought in the first hour when the forward swing was in full career were disposed to take profits at midday.

The bears have been in a more or less nervous state all along and now signs are multiplying that there will not be a steel strike. The representatives of union labor within the steel industry met in Washington today, according to schedule, but the absence of Mr. Gompers at the bier of his father was generally accepted as sufficient reason why either definite action would be postponed or the union men would defer to the wishes of the labor leaders to leave the matter of a meeting with Judge Gary to be adjusted at the conference which President Wilson has called for October 6.

There was a report that Judge Gary might be present at the October gathering. The strong probability of such action tended to confirm the street in its belief that there would not be a strike in the steel trade.

The monthly statement of the United States Steel Corporation unfilled orders, issued at noon, discloses a further substantial increase in such orders on the books of 539,442 tons over July, the total orders being 6,109,103. The increase in July over June was 685,806 tons. The showing may be regarded as encouraging considering the labor unrest and its certain effect on output. The influence was directly reflected in the price of steel shares, which were 2 to 3 points higher.

Crucible Steel and Baldwin Locomotive were again in the limelight, the former running up to 188 in the first hour, a gain of 17 points, and the latter crossing 125 early in the session to a gain of more than 7 points. Lorillard Tobacco, Chandler Motor, Mexican Petroleum, Studebaker, Industrial Alcohol and the tire shares were conspicuously strong. The rails were quite neglected, although the tone in that list was firm.

Realizing sales were restricted and covering operations were renewed in the afternoon with an urgency which carried the industrial list, in the last hour, to still higher levels. Gains in the steel group were extended to 3 to 5 points, United Steel pushing through 106 and Baldwin through 127. Crucible more than recovered its midsession setback of some 4 points, crossing 189.

The oils did not quite hold their own, Mexican Petroleum dropping back to 209 after touching 212. Total transactions exceeded 1,000,000 shares.

War bonds were less active than yesterday. Prices were steady to firm.

The money market was featured by increasing business in time funds. Considerable sums changed hands at 6 per cent for the nearer dates, a circumstance associated with the improved treasury position as disclosed yesterday by Secretary Glass. Call loans renewed at 5½ per cent and the rate quickly advanced to 6 per cent for both mixed and industrial collateral.

The offering of city bills and corporate stock notes attracted numerous bids, the whole lot of $22,000,000 going to a triple banking syndicate on a basis of 4.30 per cent. The moment seemed peculiarly propitious for such an offering.

There was further improvement in all the foreign exchanges except marks, which yielded some 20 points to 4.20 cents the mark. Sterling advanced a cent to $4.15¼, francs 2 centimes to 8.29 and pesetas 5 points to 19. Lire held steady.

OUTSIDE INTEREST IS GREAT ON CURB

American Marconi Again the Most Active Issue—Oils Generally Strong

SINCLAIRS IN DEMAND

New York, Sept. 9.—The character of the trading on the Broad street curb today showed pronounced improvement, there being a material increase in outside interest and, at the same time, important operators, concerned with the various properties, seemed to be desirous of adding to their holdings.

American Marconi was again the most prominent feature, sales of the stock being even larger than yesterday, although the price did not advance into any new ground, most of the business being transacted at 7 and 6¾.

The oils were generally strong with a good demand for Sinclair Gulf and Sinclair Consolidated in connection with the completion of the consolidation of the Sinclair properties.

There was a moderate amount of business in the packing stocks without material change in prices.

Aetna Explosives was steady at 10⅞. New York Shipbuilding rose from 56 to 60.

Raw Sugar Situation Improves

New York, Sept. 9.—The refined sugar market is unchanged both as to conditions and prices. Local refiners, as a rule, refrained from acceptance of new business, efforts being made to catch up on old contracts. Prices are quoted at 9c, less 2 per cent for cash, for fine granulated. The raw situation, however, continues to improve with arrivals of large amounts almost daily. Raws are unchanged at 7.28c for 96 degree centrifugals.

Local Exchange Closed Tomorrow

At its meeting today at noon the Philadelphia Stock Exchange governing committee voted to close the exchange tomorrow.
