U. S. STEEL SETS PACE FOR DAY IN WALL STREET

Shares of Biggest Corporation in World Feature of Trading in Market.

REACHES 121, WHERE IT CLOSES

Series of New High Records Scored, and Organization of Several New Pools to Carry on Campaigns Announced—Confidence Until Close.

BY BROADAN WALL.

NEW YORK, November 1.—Although some speculative made larger net gains to-day than United States Steel, the shares of the biggest corporation in the world were the feature of the day. The stock opened rather heavy, but buying was confident from the beginning. Late in the afternoon a buying movement of violence set in that put it to 121, where it closed. Professionals forgot they had been disappointed at the earnings for the third quarter. What they remembered was that the corporation is earning about 50 per cent on its common stock, and, with the extra, is really a 9 per cent dividend payer.

Steel set the pace for the day. Wall Street was uncertain what to do until the heavy buying of that stock was observed. Then confident buying of many leaders was begun. The result was a series of new high records, and the organization of several new pools to carry on campaigns. Conspicuous among the active shares to-day were American Locomotive, Westinghouse, Crucible and Atlantic, Gulf and West Indies. Trading gained in volume and confidence to the very close of the market, and final prices in most issues were the best of the day.

Another thing that helped the stock market was the rain in Argentina. The drought in that country has been a potent bull argument on wheat, and when the rain was reported to-day wheat broke 2c to 6c a bushel in Chicago. This worried the cotton traders, and there was some cotton trading a break of $2.00 a bale. Funds thus released went into the bull side of the stock market.

What happened to American Locomotive, Railway Steel Springs, Baldwin, Car Foundry and Pressed Steel Car was surprising chiefly because of the delay. American Locomotive in particular has been in strong position for months. Not only is it making handsome profits from war materials, but it is getting all the others for locomotives it can possibly fill. In addition to this, there is the assurance, as the result of litigation begun by Isaac M. Gates, that the profits will go to the shareholders.

Crucible's movement was accompanied by a report of a strange for control. There is no need of such a yarn to account for the strength of the stock in the face of British and German statements regarding the probable length of the war.

Westinghouse woke up. It has been neglected and is far under its correct quotation in comparison with other stocks. The buying of to-day was the best seen in months.

Traders sold Central Leather, but insiders bought it with confidence. The Boston book of which much is heard, is a tool of insiders who really want the stock.

Accumulation of Great Northern Ore is going on for good accounts. There is no danger, as report said, that the iron ore of the country will be exhausted for iron and copper ore seem to be the commonest things in nature.

Copper quotations were up ¼c a point, and all copper shares were strong as a result.

There is a feeling in high banking circles that Pennsylvania Railroad stock ought to do better in view of its remarkable earnings. An increase of dividend is expected next year.

Smelters is also expected to pay larger dividends next time.
