WALL STREET NEWS

Union Pacific Stock Suddenly Takes Big Drop.

RECENT SEGREGATION BLAMED

Violence of Decline in Shares of Steel Common Also Attributed to Similar Causes—Fluctuation Has No Great Effect on Market—Buying of Granger Railroad Shares.

New York, Aug. 16.—Union Pacific common and preferred sold even higher than at the close last week in the early part of to-day's stock exchange session, but in the last hour broke violently, the common declining five points, and the preferred eight and one-half points from the high prices of the day, and the close showing net losses of three and three-eighths points for the common and four and three-fourths points for the preferred.

It was in these stocks that speculation was most violent in the latter part of last week, and the only reason or excuse offered for the extraordinary gains in them was that decision had finally been reached on the long pending and long discussed plan for the segregation of Union Pacific's investment stocks.

Report Flatters Speculators.

This morning speculators, who have been extremely credulous in the matter of these Union Pacific rumors, were flattered by a report that the segregation plan would be announced before the close of banking and market hours.

It was not announced, and in the closing hour the lack of any indication of its appearance either to-day or in the near future may have provided a reason for the profit taking and professional selling under which the stock declined.

The break in this last hour was as violent as was the advance in any similar period last week.

Important contributory causes of the spasmodic fluctuations were undoubtedly the construction of that weak long account which always accompanies a furiously speculative advance, and which is "protected," as Wall street parlance has it, "by stop-loss orders," and the bearish operations of professional traders whenever opportunity arises to uncover the orders of many traders of indecisive mind.

Similar causes, no doubt, contributed in part to the decline of 1⅞ points in Steel common, and the reactionary movement seemed due to the so-called technical position of the market induced by an increase of speculative activity which leaves stocks at times vulnerable to such attacks as those to-day which impair the stability or even course of prices, but which often has but a temporary influence on the general trend.

No Effect on Stocks.

At any rate, to-day the violence of the decline in those shares in which speculation had produced the greatest number of weak bull accounts had no great effect on stocks as a whole.

There was much impressive buying of the shares of the Granger railroads, some of which scored gains on the day, and there was also a continuation of the healthy buying of the purely investment stocks, which has been noted since the enactment of the new tariff and the government report on grain.

NEW YORK MONEY.

New York, Aug. 16.—Money on call at the stock exchange to-day opened at 2½ per cent; highest, 2½; lowest, 2; closing, 2¼. Most of the day's loans were made at 2¼ per cent.

There was no change of consequence in the time loan branch of the money market. A continuance of the strong tone which recently developed was the noteworthy feature, but as trading was dull, and as supply was sufficient to meet demand, such as arose, there was no change in rates. Lenders held firmly to rates asked, and, while over-the-year money was still obtainable at a shade below 4 per cent, loans at such concessions were rare, banks being particularly careful in the scrutiny of collateral. Rates, 2¾a3 per cent for sixty days, 3¼a3½ for ninety days, 3½a3¾ for four months, and 4 for five and six months.

Foreign exchange—The market for sterling to-day was firm, with rates 5 points higher.

Rates for actual business closed as follows: Sixty days, 4.85a4.8510; demand, 4.8600a4.8660; cables, 4.8680 a4.8690.

Commercial bills were 4.83⅞ for ninety days and 4.84⅞a4.85 for sixty days. Flour bills were 4.84½ for sixty days; grain, 4.84⅞. Grain and cotton bills were moderate.

COTTON MARKET.

Quotations furnished by W. B. Hibbs & Co., members of the New York Stock Exchange, Hibbs Building, 725 Fifteenth street northwest.

New York, Aug. 16.—At the outset the cotton market was steady and first prices were 3 to 5 points higher. The failure of Texas to get the general rains mentioned in some of the press dispatches gave bulls an opportunity to support the list vigorously, causing a sharp rise, led by October.

A rally in Liverpool helped the bulls. Offerings increased on the advance, reflecting the persistency of the selling by leading bears, and the market during the middle of the morning acted nervous and unsettled at a reaction of 3 to 4 points from the best.

The market was quiet late in the forenoon, with prices ruling about 3 to 5 points higher. The crop condition report at midday made the average condition 70 per cent, comparing with the report of 75 per cent by the same authority toward the end of July. This report, while very bullish on its face, caused only a bulge of 2 or 3 points, which was quickly lost.

The market practically sold out soon after the noon hour, and prices rallied about 10 points on October and were firm on later months. August closed strong and higher.

Receipts at the ports were 900 bales, against 1,207 bales last week, and 4,817 bales last year. For the week, 15,000 bales, against 11,028 bales last week and 43,937 bales last year. Receipts at New Orleans were 218 bales, against 810 bales last year. At Houston 2,066 bales, against 4,033 bales last year.

LOCAL FINANCIAL GOSSIP.

Trading on the Washington Stock Exchange yesterday was both lively and in good volume. Bonds were picked up in some quantity, and in stocks all the old favorites were on the record, with Lanston much in the lead.

In the bond trading one small registered United States 3 per cent was bought in at 50 cents above par; two Metropolitan 5s brought 111; five Potomac Electric Consolidation 5s went on record at 103 3-8, and one Chesapeake and Potomac 5 was knock down at 104. Bids showed a very active demand for bonds, but otherwise than in the instances mentioned they were not for sale. After call two Railway 4s were offered at 85 5-8 and promptly taken.

On call Railway preferred sold at 92, and a quarter of a point higher on bids which aggregated several hundred shares.

Washington Gas came out in moderate volume, and the price advanced from 72 1-2 to 72 7-8 on the transactions recorded. The buying broker of Gas seemed in a responsive mood, and it is probable that much more of the stock could have been sold had it been offered.

Merganthaler was active for so high a priced stock, selling some five-share lots and one ten-share lot at 213 1-2 to 212 3-4.

Lanston came out to the extent of about 1,600 shares, and was promptly taken at 16 3-4 to 17.

Trading in bank shares was confined to two small sales of Metropolitan Bank and Washington Loan and Trust.
