EARLY ADVANCE LOST AT CLOSE

Stocks, However, Showed Firm Undertone at End of Trading.

COPPER HOLDS INTEREST

Gold Ore of Low Grade Said to Have Been Discovered in Anaconda's Property.

New York, Nov. 15—Stocks were active and strong during the early trading today, but receded in the afternoon on offerings by traders who sold on the theory that the recent rise had weakened the technical position of the general list and had rendered it vulnerable to attack. Copper stocks, under leadership of Anaconda, attracted attention throughout the day for their strength, which was largely due to further improvement in the copper metal market. A strong undertone prevailed at the close, but good judges of the market expect a see-saw throughout the week until there is some ammunition to excite additional speculation.

War Issues in Good Demand.

War stocks were in good demand and rose from 2 to 7 points. Low-priced rails were also strong. Missouri Pacific, Chicago, Rock Island and Pacific and Missouri, Kansas and Texas being higher. At the end of the second hour the general list suffered a recession from the best owing to rumors that another steamer with Americans aboard had been sunk by a German submarine. Lack of confirmation was followed by a rally, but in the late afternoon the list again receded on professional offerings. Owing to improvement in the demand for copper metal and an advance in the price of copper metal to 18 3-4c a pound by large producers, the copper shares were the center of attention. Sales of copper are said to be very large, and the marking up of quotations for the metal is said to be genuine and due to the big demand. Anaconda was at the front of the advancing coppers, with Utah a close second. The former rose more than 2 points and closed within an eighth of the best figure. Utah rose more than a point and also held practically all of its gain.

Gold Ore in Anaconda.

Buying of Anaconda, according to brokers, represented accumulation, in anticipation of some important discovery. It is learned from an insider that this important discovery has been the discovery of a large quantity of low-grade ore in the company's property. The profits that are expected to result from this gold ore are estimated by insiders at approximately $50,000,000 a year. A small pool is also said to be in process of formation in the stock in anticipation of announcement of the discovery.

Brokers report that many insiders of different companies are trying to get back stocks lost many weeks ago. This is said to be particularly true with regard to American Can, which has had a comparatively narrow range of price fluctuations within recent weeks. Coincident with the reported accumulation rumors are current that the earnings for last year will not make as favorable a showing as generally expected.

Some Mystery About Erie.

Bulls on Erie shares are at a loss to explain the failure of the first preferred to advance in proportion to the common and second preferred. Professionals who trade in Erie usually figure their respective market values ten points apart, the second preferred selling ten points above the common and the first preferred ten points above the second. The laggardness of the first preferred in the recent rise has upset this theoretical trading.

Next to the war stocks the bond market is attracting attention for maintenance of prices at high levels.

The Safest Investments

Are those that do not fluctuate during disturbed conditions of the money or stock markets. First deed of trust notes (first mortgages), well secured on real estate in the District of Columbia, constitute "gilt-edge" investments. They do not depend upon the financial responsibility of individuals or corporations for their stability, and are exempt from taxation as personal property. We can supply such investments in amounts from $100 upward. Send for booklet, "Concerning Loans and Investments."

COTTON MARKETS.

New York, Nov. 15.—Trade in cotton was quiet today. The market opened steady at an advance of 4 to 8 points on buying by Wall Street interests and room traders. The weather in the cotton belt was unfavorable and the cables from Liverpool were better than had been expected. The news as to the weather, however, did not bring in any material volume of fresh buying and this encouraged reactionary sentiment, prices declining to a level of about 7 points under Saturday's close. January dropped from about 11.95, the high point early, to 11.61, and later months sold off in about the same proportion. Covering checked the decline around midday. Later selling by the South and pressure from room traders were absorbed by scattered commission house orders to buy, influenced in part by rumors that the forthcoming report by the National Ginners' Association would be bullish. Near the close the market did better on good support from wire houses, local covering, and further talk of bullish ginning returns. Final prices here were unchanged to 3 points net higher. Spot here was quiet at a decline of 10 points to 11.90c, with sales of 88 bales. Spot at Liverpool advanced 7 points, to the basis of 7.06d for American middling. Futures there closed easy at a net gain of 1½ points to a loss of 1½ points.

Port receipts for the day were 25,220 bales, compared with 34,991 last week and 59,726 a year ago. New York warehouse stocks were 263,176 bales, against 46,151 bales last year. Exports for the day aggregated 47,702 bales, against 46,804 a year ago. Today's total included 25,006 bales to Great Britain, 11,695 to France, and 11,601 bales to other points on the continent. Total clearances thus far amount to 1,286,493 bales, contrasted to 290,000 bales for the corresponding period last season.

NEW YORK MONEY.

New York, Nov. 15.—Call money opened at 2 per cent; high, 2 per cent; low, 1¾ per cent; last, 2 per cent; ruling rate, 2 per cent; renewals, 2 per cent.

Time money is distinctly easier and rates are ¼ per cent lower owing to the excessive supply of funds. At the same time, borrowers are out of the market at the moment for mixed money, while their requirements of industrial funds also are falling off. Virtually the only demand is for a restricted amount of the latter class of money at 3 per cent. Rates for mixed loans are 2½ per cent for sixty days, 2¾a3 per cent for ninety days, four, five, and six months.

A lower trend is noted in commercial paper, but the ordinary rate for prime six months paper is unaltered at 3 per cent. Only the highest grade of paper which has not been offered in the market in any amount can command a lower rate. For the shorter dates the quotation is 2¾a2¾ per cent, but the volume moving is practically nil owing to the scant offerings.

CHICAGO GRAIN MARKETS.

Chicago, Nov. 15.—In round numbers the visible supply of wheat increased 3,000,000 bushels the past week to a total of 34,000,000 bushels, compared with 13,670,000 bushels a year ago. The amount of this grain in the show windows of the country is comparatively small. On the other hand, if the wheat crop of over 1,000,000,000 bushels is considered, the situation may be called bearish. The undertone of the market was one of pronounced strength and quiet of 1 to 1¾c were shown, with the highest prices well held at the close. Some of the largest houses sold considerable December and May wheat early, which temporarily depressed prices, but eventually the buying power asserted itself and the market closed strong. Chicago stocks of wheat increased 752,000 bushels the past week, and gradually the empty bins are being filled. Those on the bear side predict that within another month the stocks will show another large increase.

Corn was irregular and unsettled, closing ⅝ to ⅞c lower to unchanged. There was a weather market in corn, with conditions favorable for finishing and harvesting the crop. Cash corn was dull everywhere and sales at Chicago were 165,000 bushels. Car lots here were ¼a¾c lower.

Oats were up ¼ to ⅜c, but the market was quite narrow.

The principal influence in the provision market was the lower prices for hogs and the big run of receipts in the West. Smaller packers led in the selling. There was a fair commission house demand for January deliveries, as well as for May lard.

LOCAL TRADING DULL.

Only 3.1 Shares of Stock Sold at Call.

Trading was dull on the Washington Stock Exchange yesterday, there being practically no demand for the usual week-end lots. Only 3.1 shares of stock were disposed of on the regular call. The principal changes in price affected Capital Traction and Lanston Monotype stocks. The former eased off half a point, to 86 1-2, and Lanston was offered at 78, a drop of two points from the prices established last week.

Three shares of Washington Gas were disposed of at 72 5-8 and at 72 3-4. One-tenth of a share of American Graphophone preferred sold at 112. Other sales consisted of $5,000 worth of Riggs Realty (long) 5 per cent bonds, $1,500 worth of Washington Gas 5s at 105 7-8 and fifteen shares of Mergenthaler Linotype stock at 181 1-2.
