In the World of Finance and Trade

STOCKS SHOW DECLINE ON NEW YORK LIST

Several Securities Establish New Low Records—War Talk Quiet.

(By the International News Service.)

New York, Feb. 9.—In a dull professional market, lower prices were made in Wall Street today. Nearly every active stock on the list showed a net loss at the end of the day and in some specialties, the losses were material. Anglo-French bonds sold down to 90 3-4, which is a new low record price. St. Paul stock, by touching 78 1-2, also made a new low record for recent years. Interboro Metropolitan, both common and preferred, sold to the lowest prices recorded since the boom that followed the remarkable reorganization of the company about two years ago.

Final trading was irregular. Nearly all the professionals are bullish, on the theory that war will put stocks up, but they are trying to talk them up, rather than buy them up. Genuine buying orders are scarce and customers with stocks in commission houses are nervously anxious to get out. Only a few genuine investors are in the street with money, buying at this level.

Bank clearings are sustained in noteworthy volume and remain in excess of the then unprecedented figures of 1915, the gain at leading centers outside New York this week being 50.6 per cent.

NEW YORK CURB MARKET.

New York, Feb. 9.—Trading on the curb market today was exceedingly quiet and dull, all interests being centered on Washington. Midvale Steel was under pressure throughout the day and yielded, and the same applied to practically all of the other war stocks with the exception of Aetna Explosives, which was strong.

CALVES—Receipts, 100 head; steady; top, 15.00.

TRADING IS LIMITED ON LOCAL EXCHANGE

Only Unimportant Changes in Bid and Asked.

Trading was etxremely limited at yesterday's session of the Washington Stock Exchange. Changes in the bid and asked prices were unimportant. Capital Traction stock changed hands at 83 1-2, and Continental Trust shares were transferred at 125. Railway 4s were sold at 81 and 80 7-8.

General Electric Dividend.

General Electric has declared a regular quarterly dividend of 2 per cent, payable April 15, to shareholders of record March 17.

Urges Caution.

The following analysis of the New York market situation was received yesterday by W. B. Hibbs & Company from a New York correspondent:

"With the country practically on the verge of war with Germany it has been deemed advisable to reduce speculative commitments rather than to increase them. This is why there has been a moderate predominance of selling pressure over the demand for stocks generally in the market during the last half of this week.

"The sharp recovery from the big break of early last Saturday was mostly due to aggressive buying support to rally prices for the beneficial effect on general sentiment such a movement was calculated to have. The further rise in prices during Monday and Tuesday trading seemed to be merely a continuance of that market movement. From Wednesday morning there has not only been considerable local liquidation, but also rather a large amount of selling by international houses. A good deal of this has been credited to the closing of some rather large investment holdings of stocks and bonds held here since the outbreak of the European war for German interests. It has also been noted that gold shipments have lately been on a large scale to South American sources, and that a good many balances are being transferred to Spain, Switzerland and the Scandinavian countries.

"Price for bonds have gone off 2 to 4 points the past ten days from the high records established during the closing week of January for the past three years. This has been due to liquidation and the falling off in the demand for bonds from the higher money rates, which in turn have been the result of anticipation that our government will soon be obliged to put out a bond issue for upwards of $500,000,000 of 3 1-2 per cent bonds. Today's cables from London also report that the Bank of England's proportion of reserve to liability is now down to only 13 per cent, and that the British government is preparing to put out another bond issue for $1,000,000,000. The belief now prevails in usually the best informed quarters here and at Washington, that we will be eventually drawn into war with Germany and as a consequence of this situation the best policy would be to continue a readjustment of speculative commitments."

COTTON MARKETS.

New York, Feb. 9.—There was no enlargement in operations in the cotton market today. Commitment continued to be evened up, reducing the outstanding interest to small proportions.

Aside from moderate buying for Liverpool account, there was practically nothing worthy of attention at the opening. The early tone was barely steady, 5 points higher to 5 points lower. After the call there were declines of 4 to 5 points in March and May with other positions holding steady.

Port receipts for the day were 14,853 bales, compared with 16,824 bales last week and 32,411 bales last year. New York warehouse stocks are 131,958 bales, contrasted with 222,934 bales a year ago. Exports for the day were 1,000 bales, all to France. Clearances for the season to date aggregate 3,830,124 bales, against 3,136,032 bales for the corresponding period last season.

NEW YORK MONEY.

New York, Feb. 9.—Money on call at the stock exchange opened at 2½ per cent; high, 2½ per cent; low, 2 per cent; closed, 2 per cent. Most of the day's loans were made at 2½ per cent.

Time money was obtainable in moderate volume. Lenders preferred, however, the short maturities. The rates here quoted are on mixed collateral, the recent discrimination between that and all industrials being less of a feature. Rates were quoted at 3½a4 per cent for sixty days, 4 per cent for ninety days and four months, 4a4½ per cent for five and six months.

Mercantile paper was bought sparingly, lenders insisting on full rates. The market was not overburdened with offerings, but some attractive names were seen. Rates: 4a4½ per cent for the best names.
