AT R. NATHANSON'S TOMORROW,

NEW "ALUMINUM" WARE.
SUPERIOR TO SILVER PLATE.

Have you heard of the new metal, "Aluminum?" It threatens to revolutionize the entire silver-plated ware industry. Not that silver-plated ware will not always be used, but its expensiveness has confined it almost entirely to the rich and well-to-do. Today "Aluminum" Ware makes a bold bid for a large portion of the silver-plated ware trade, *and asks for it solely upon its merits.*

"Aluminum" is a substance extracted from clay, and articles manufactured from it have many advantages over silver-plated ware. Silver-plated ware tarnishes and "Aluminum" does not. "Aluminum" is considerably lighter, is more readily worked into shapes and is also more durable. Yet the greatest feature of "Aluminum" ware is its inexpensiveness, for although better than silver-plated ware it is sold at about *half* its price. Ours is the only house in Washington that had the foresight to secure a large lot of this ware, we having just received our own direct importation from Carl Obermann & Co. of Germany. This importation embraces Bon-bon Boxes and Dishes, Necklaces, Bracelets, Jewel Cases, Card Cases, Comb and Brush Cases, Purses, Cigarette and Cigar Cases, Card Trays, Match Safes, Ash Receivers, Toothpick Holders, Individual Salts, Individual Butters, Napkin Rings, Wine and Water Sets, Butter Dishes, Combination Pepper, Salt and Butter Sets, Envelope Holders, Hand Mirrors, Hairpins, Pen Holders, Crumb Tray and Brush, Drinking Cups, Thimbles, &c. These are now on exhibit, and will be sold at exceptionally low prices to introduce this most excellent ware.
