MAKES BEST SCORE IN HORSTMANN CUP TOURNEY.

SAMUEL DALZELL.

SAMUEL DALZELL CAPTURES F. ODEN HORSTMANN CUP

Plays Consistently Throughout the Four Rounds of 72 Holes Over the Chevy Chase Club Course.

Continuing the same steady game yesterday afternoon that characterized his play throughout the tournament, Samuel Dalzell captured the F. Oden Horstmann memorial cup, over the beautiful Chevy Chase Club course, with a total score on the two days of medal play of 328. Walter Tuckerman was second with a score of 335, Allan Lard third with 337 strokes and Wolcott Tuckerman brought up the rear with 357.

When the final round started yesterday afternoon, Allan Lard was six strokes back of Dalzell and Walter Tuckerman was seven strokes in the rear. As was setforth in The Star last evening, it would have required sensational golf to overcome Dalzell's lead, and as it was not forthcoming he was returned an easy winner. The scores of the final round were: Dalzell, 80; Walter Tuckerman, 80; Lard, 84, and Wolcott Tuckerman, 94.

The totals for the two days' play of four rounds, 72 holes, were as follows:

	Round. 1st	2d	3d	4th	Ttl.
Samuel Dalzell	83	85	80	80	328
Walter Tuckerman	94	75	86	80	335
Allan Lard	85	85	83	84	337
Wolcott Tuckerman	86	89	87	95	357

Conditions Were Bad.

When the fourth round started yesterday afternoon it was still drizzling and it continued throughout the trip over the course. As a result the greens were slowed up somewhat and the footing was insecure, providing conditions that prevented play out of the ordinary.

The result of the morning round had thrown Allan Lard into second place, his score of 83 being three strokes better than that of Walter Tuckerman, who had held second place on account of a great 75 on the second round. There was a shift of players for the final round, Dalzell having Wolcott Tuckerman for a partner and Allan Lard and Walter Tuckerman pairing up.

At the start off all did fairly well except Wolcott Tuckerman, who followed his brother's experience of the morning round, taking eight strokes on the first hole. Wolcott continued off his game after getting a par 4 on the second hole, while the other three battled almost on even terms. After a half dozen holes had been covered "the handwriting on the wall" could be seen, as Dalzell refused to slip back and neither Walter Tuckerman nor Allan Lard could shoot ahead.

Dalzell Always Good.

Dalzell did not once play poor golf on any of the holes, as his score will show. Eight holes he ran down for exactly one over par, and on the other ten he equaled the correct figures for the course. Several of the experts who watched the match remarked that it was a pity that Dalzell could not have been pushed so that still better scoring would have resulted. Dalzell knows golf from every angle, and his experience told him that safety play was the best for the final round. He frequently displayed this on the green, as when he missed a putt he was never far enough away to require two strokes to go down. In driving and approaching Dalzell gave a splendid exhibition, and he seldom went in the rough. Just how consistently Dalzell played throughout the tournament can be gleaned from the cards covering the four rounds of play:

FIRST ROUND.

Samuel Dalzell—
Out ..... 5 5 4 5 5 5 6 5 5—45
In ..... 4 4 4 5 3 4 5 6 3—38—83

SECOND ROUND.

Out ..... 5 4 4 5 6 3 6 5 5—43
In ..... 4 3 5 5 5 4 5 7 4—42—85

THIRD ROUND.

Out ..... 5 5 3 5 6 4 5 6 4—43
In ..... 4 3 4 6 3 4 4 5 4—37—80

FOURTH ROUND.

Out ..... 5 4 3 5 4 3 5 6 5—40
In ..... 5 3 4 5 4 4 5 6 4—40—80

Lard in Bad Luck.

Allan Lard, on the final round, developed the "pit habit" and he was so frequently in bad lies that it made him laugh. No matter how good his tee shot would be an unexpected carry would land the ball bad and on the approach the little white ball appeared to be magnetized, hunting spots out of the regular route. Lard simply outdid himself with nice recovery shots, but of course "there was nothing doing" in the way of equaling or bettering par under the conditions.

Walter Tuckerman played good golf on the final round, but it required something extraordinary from him to overcome the beg lead and try as he would he could not get into the sensational habit he contracted on the second round.

The F. Oden Horstmann memorial cup was first played for in 1913 and won by Wolcott Tuckerman with a splendid 321. In 1914 Frank H. Ellis was the winner with 322, just one stroke behind Tuckermann, and this year Samuel Dalzell captures it with a score of 328.

The tournament fields for the cup always are small on account of it being at medal play, never more than eight players entering, which generally covers the cream of the golfers of the Chevy Chase Club.

HOLMEADS WIN GAME.

Holmead Athletic Club defeated the Good Shepherd team in the first game of the season by the score of 32 to 15. Talbert and Parker played the best for the losers. The team work of the Holmeads featured the game. Line-up:

Good Shepherds.	Position.	Holmeads.
Thiele	Right guard	Evans
Parker	Left guard	Pfeiffer
Talbert	Center	Chew
Terry	Left forward	Joyce
Murphy	Right forward	Carr

Goals from floor—Carr (9), Chew (5), Joyce, Pfeiffer, Parker (2), Talbert (4), Terry. Goal from foul—Murphy. Referee—Mr. Cole. Substitution—Nolan for Pfeiffer. Time of halves—20 minutes each.

Cup Defense Yachts Retired.

The America's cup defense pachts Resolute and Vanitie have been retire for another year after a season of trial racing which has left the question of relative merits about where it was at the close of 1914. Between July 3 and July 27 these two yachts met in a series of ten special races, with the result that the Resolute won nine and the Vanitie one. Six of the contests were sailed on Long Island sound and four over ocean courses.

Close followers of yachting express the opinion that of the two single stickers, the Vanitie showed the greater improvement and that further overhauling this winter will improve her chances when the yachts are put overboard next year. Although forced to give the Resolute a time allowance in almost all the 1915 races, the Cochrane sloop showed faster sailing qualities than during the preceding season and may yet prove her right to defend the cup.

"Mud Ball" Popular on Coast.

Pacific Coast League players and fans recently been interested in the controversy as to whether the use of the "mud ball" should be allowed in the hurling repetoire of the far coast twirlers. According to those familiar with this form of delivery, it is the most dangerous pitch yet discovered to baffle the batsman. It is easier to control than either the emery or spit ball and can be thrown with much greater velocity. Owing to the speed and break of the ball, it is said that this delivery endangers the batter to an extent that makes it imperative that the pitchers be prohibited from using it.

ELECTRICIANS BEAT LOW LEVEL QUINT

Northeast League—Union Printers vs. Eagles.
Southwestern League—Brunswicks vs. Mount Rockys.

The Electricians won three straight games from the Low Level team in the Terminal Railroad Y. M. C. A. Bowling League last night. The victors outplayed the losers at every stage of the match and its victories were well deserved.

Miller did the best rolling for the winners and his work was the best of the match. He knocked down 116, 100 and 108 pins in his three games.

In the Commercial League the Southern Railway team was a winner over the Barber & Ross outfit by two games to one. Goldberg and Campbell of the Southern five were the best bowlers of the match.

The Animal Industry team took two out of three from the States Relations quint in the Agricultural Interbureau League, and the Indians defeated the Tiptops in the Knights of Columbus circuit by the same margin.

The Spuds rolled a game of 540 in their match with the Nesline Stars in the District organization. They won two of the three contests, too. Works and McCarthy featured for the winners and Wells rolled well for the defeated quint.

Potter of the Commissioners in the Reclamation League did some good work in two of his games, getting marks of 120 and 112.

Target Tips and Hunting Helps by Alfred P. Lane

This column is open to questions which should be sent in care of the Sporting Editor, and to discussions by the readers on anything connected with hunting or target shooting.

A. B. D.—In your reply to T. M. B. you say that length of barrel does not increase the efficiency. I have always been told that the longer barrels give more room for the powder to burn, and to get the utmost power out of a given charge of powder a barrel is necessary that is long enough for all the powder to burn in the barrel. Kindly explain why a short barrel is as efficient as a long one.

Ans. There is only one way to test the velocities given by various lengths of shotgun barrels properly, and that is by means of the electric chronograph—a very expensive and delicate machine; also, even with finest ammunition, variations in velocity occur between successive shots when fired under identically the same conditions of as much as forty feet per second. It is, therefore, necessary to fire a long series of shots and take an average. Experiments made in this way with the various lengths of barrels, using modern smokeless powder shells, show a variation due to barrel length of about one foot per second per inch, which, if you consider the variation which occurs between different shots fired from the same length barrel, is so small as to be negligible, especially as the shorter barrels handle so much easier. The length of barrel has no effect at all on the pattern. A twenty-six inch full choke barrel will shoot just as close at all ranges as a thirty-two inch barrel.

L. W.—1. I would like to know which one of these two shotguns shoots the stronger, a 12-gauge full choke pump gun or a 12-gauge full choke automatic shotgun.

Ans. The auto-loading shotgun shoots just as hard and close as the pump gun or double gun for the simple reason that in the auto-loading gun the shell remains locked in the chamber until the shell head stops pressing against the breech block. The barrel and breech block recoil, locked together, about a quarter of an inch during the time the shot charge is passing through the barrel. In the double barrel or pump gun, the whole gun recoils instead of just the block and barrel.

2. What is meant by "full choke?"

Ans. The term "full choke" is applied to barrels that will put at least 70 per cent of their charge in a thirty-inch circle at forty yards. This is accomplished by boring the barrel with a constriction at the muzzle.

J. H. M.—1. Is a target pistol more accurate than a target revolver? If so, why?

Ans. The target pistol is more accurate than the target revolver mainly because the bullet starts into the rifling as soon as it leaves the cartridge, whereas in the revolver there is necessarily a short space which the bullet must travel in the cylinder, which is not rifled, before it passes into the barrel.

2. What length of barrel is best for accurate shooting?

Ans. It doesn't make much difference. The popular length for pistols is 10 inches; for revolvers, 6 to 7½ inches.

J. W.—I would like to buy a Krag rifle from the government. Will you kindly advise me how to get one? Do I have to be a member of the National Rifle Association to secure one? What does membership in the association cost?

Ans. Krag rifles can be bought from the government if you are a member of a rifle club affiliated with the National Rifle Association, or by life membership in the N. R. A. Write to Secretary National Rifle Association, 1108 Woodward building, Washington, D. C., for further information.

C. E. H.:

1. I have a 32-20 revolver, 6-inch barrel, and the dealer advised me to shoot soft point; being anxious to know if this is right, will you tell me if this will injure the barrel?

Ans. The 32-20 cartridge is now loaded in three ways—with black powder; with low pressure smokeless powder, which gives the same ballistic results as the black powder cartridge; and the high pressure or high velocity loading. The last mentioned is unsafe in revolvers as revolvers are not designed for the pressure produced by this cartridge. The proper cartridges to use in your revolver are those loaded with black powder, or the low pressure smokeless cartridges loaded with lead bullets. Do not use low-pressure smokeless cartridges loaded with metal jacketed, soft point bullets, as these wear the barrel.

2. At twenty-five steps on a ten-inch target with a five-inch bull's-eye using smokeless powder, factory loaded shots seem to scatter all over the target, whereas with black powder, by holding at the lower right-hand corner of target, shots group in bull. Why is this—defective barrel or error in holding?

Ans. You do not state whether your revolver is a new one or an old one. The old models of the different makes of revolvers manufactured when black powder was used were made with barrels slightly larger than the bullet, the bullets being made with hollow bases as black powder expands the hollow base bullet so that it will fill the rifling. When smokeless powder came into use, it was found that smokeless powder would not expand the hollow point bullet owing to the difference in the way it burnt and the barrels were therefore made smaller. This would possibly account for your trouble. A 32-20 revolver of reputable make is capable of grouping its shots when fired from a machine rest (so that errors of holding are eliminated) into a three or four inch circle at fifty yards.

MARINE CORPS ENGAGES IN RIFLE COMPETITIONS

Officers and Men From Barracks in the East, Including Washington, Participate.

The United States Marine Corps is holding its annual rifle competitions at Winthrop, Md., a short distance down the Potomac from Washington. Officers and men from the marine barracks in the east, including the Portsmouth naval prison, Portsmouth, Boston, New York, Philadelphia, Washington navy yard, Norfolk, Charleston, Port Royal and Indian Head barracks, are in attendance.

Monday was devoted to practice, and Tuesday there was held an individual match, open to members of all teams and to the command at Winthrop. This match is known as the "navy individual competition general." There were ninety-six competitors and the firing was in three stages, all at 200 yards.

The Several Stages.

The first stage consists in firing five shots in each of the four positions—that is, standing, squatting, kneeling and prone, all in slow fire. In the second stage the positions are the same, but the fire is rapid, a limit of thirty seconds to each string of five shots. The third stage is known as changing position—a man fires his first shot standing, the second squatting, the third kneeling on one knee, the fourth kneeling on both knees and the fifth prone. There are twenty shots in each stage.

The scores of the twelve prize winners are as follows:

Sergt. Andrews, J. J., Norfolk, 288; Sergt. Snow, J. E., Norfolk, 287; Sergt. Austin, H., Port Royal, 287; Corp. Renew, J. L., Guantanamo, 286; Gy. Sergt. Schriver, O. M., Winthrop, 286; Private Lytle, J. W., New York, 286; First Sergt. Becker, F. Z., Portsmouth barracks, 284; Corp. Lecuyer, R., Port Royal, 283; Sergt. Mullahy, E. L., Winthrop, 282; Sergt. O'Neil, J. J., New York, 282; Private Carter, R. C., Indian Head, 281; Private Steele, J. P., Norfolk, 281.

Interpost Team Match.

The interpost team match for the Elliott trophy and a money prize of $20 to each member of the winning team, $10 to each member of the second team, and $5 to each member of the third team, was held Wednesday. There are five stages in the match—200 yards slow fire, 200 yards rapid fire, 200 yards changing position, a skirmish run, and 600 yards slow fire. At the end of the first stage the Philadelphia team led by a small margin, Norfolk being in second place and New York in third. At the end of the second stage, Port Royal pulled into the lead, Norfolk being one point behind, and New York in third place. After the changing-position fire, Port Royal led, with Norfolk second and New York third. The skirmish run brought no change, except that New York pulled into second place and the Indian Head team coming up to third. The match finished at 5 o'clock with the Port Royal team victors, with a lead of 56 points over the second team, Philadelphia, New York taking third place.

Individual Scores.

The individual scores of the winning team and the scores for each range for all teams were as follows:

ENDS MUST STOP MAHAN.

Speedy Rush Worrying Over Wing Positions for Harvard Game.

PRINCETON, N. J., November 5.—After the Tigers had gone through a half hour's signal drill on University Field yesterday afternoon the practice was suddenly interfered with by a drizzling rain, which drove the players under cover. The coaches took the squad into the base ball cage, where the practice was continued.

The varsity lined up against the scrub team in dummy scrimmage. There was no tackling allowed and the players were not even permitted to body check. The Harvard plays which the scrubs know were tried against the first team.

The coaches are still uncertain who will start in the doubtful positions. Halsey does not seem to be in such bad shape as was at first thought and in all probability will hold his place at tackle. Parisette paired off with him yesterday, but Halsey had the first call. Kauffmann seems to have fallen back to third choice.

The position at end remains the biggest problem. Speedy Rush realizes that if Princeton is to beat Harvard the Tiger ends will have to stop Mahan. Highley is sure of his position at left end, but it is a toss-up between Brown and Lamberton for the other wing position. The backfield experience which Lamberton got early in the season has speeded him up and made him faster than Brown.

It is evident the rest of the team will remain intact. The backfield will consist of Capt. Glick at quarter, with Shea, Driggs and Tibbott behind him. Gennert will be at center, with Nourse and Hogg on either side as guards, while McLean will be at his old position at tackle.

Army Works Out Notre Dame Plays.

WEST POINT, N. Y., November 5.—Light scrimmage work was all the varsity men indulged in yesterday, except that the big fellows ran through their repertoire of plays for the Notre Dame contest just before the end of practice. Neyland was back at end and if his injured shoulder condtinues to improve, he will start against the westerners tomorrow. Parker displaced Jones at tackle in the signal drill. Oliphant, Ford and Coffin made up the varsity back field and Murrill was at quarterback. Coffin had a long session at punting and there was a half hour's rough work for the second and third elevens. Gerhardt's work at quarterback continues to please the coaches. Timberlake, at tackle on the second eleven, played well. The Notre Dame squad is expected to arrive from South Bend, Ind., today in time to get in a practice on the Plains in the afternoon.

"Y" Athletes in Competition.

Many "Y" athletes turned out last night for the opening events of the bi-weekly team and individual athletic contests at the Y. M. C. A. The team captained by Joe Davis is in the lead with 630 points, with Charles Roberts' team a close second, with 624 points; K. G. Shipley's team next with 543 points and James Buete's team last with 524. Joe Davis is leading for individual honors with 223 points; Charles Roberts, 208; K. G. Shipley, 192; J. Harris, 183; K. Knight, 152; H. Beatty, 139; A. L. Thompson, 139; R. Duncan, 137; J. Buete, 127, and F. C. Rawlin, 117.

Stevenson Defeats Australian.

The match of 18,000 points at English billiards for $500 between George Gray of Australia and Henry W. Stevenson of Hull, England, which took place at Thursaon's Grand Hall, London, in August, resulted in a victory for Stevenson by 1,244 points. In the course of the game the Australian complied breaks of 840, 662, 563, 502 and 406 and seven between 300 and 400, yet was somewhat disastrously defeated. While his general playing demonstrated improvement, his chief asset seemed to be the losing hazard, off the red. Stevenson was more resourceful, finished and brilliant. On fifty-five occasions he scored three-figured breaks, the best being 636, 530, 444, 428, 419, 387, 351 and 301. That Stevenson is playing the best game of his life is the expressed opinion of London's billiard enthusiasts, who cannot fathom why he is unable to master Inman.

Thomas Reece, who is reported to have won largely on races at Newmarket and in Ireland, has issued a challenge to Inman and Stevenson for $2,500 a side.
