The Evening paper is the paper of Today, the morning paper is the paper of Yesterday.

DESERET EVENING NEWS.

5 O'clock -EDITION.-

TRUTH AND LIBERTY.

NO. 144. MONDAY, MAY 11, 1896, SALT LAKE CITY, UTAH. VOL. XXIX.

FLORIDA TRAGEDIES

Three Persons Killed in a Duel About a Woman.

MURDEROUS WORK OF A MOB.

A Brutal Assault Ends in the Killing of the Assailter by a Young Boy.

PENSACOLA, Fla., May 11.—Four men are corpses, two are dying and one is severely wounded as the result of tragedies in the western section of Florida. Three of the victims were killed in a duel about a woman, another was stabbed in the heart by a boy whose father had been attacked, and the two who are dying were flogged and shot by regulators. The cause over the woman was fought in Calhoun county, near Blountstown. In that county is the home of Mrs. Johnson. Several weeks ago the men fought about the woman and Smith was badly beaten. Smith vowed to get even and Friday went to Mrs. Johnson's home, accompanied by his brother Thomas, and a friend, Dick Thompson. The three men found House and the widow together. House was ordered to leave. He rose as if to go, but quickly drew two pistols and opened fire. The Smiths and Thompson were not slow in getting out their guns. Then a fearful duel followed in the little room. House shot out and straight, and to a few moments the Smith brothers were dead. House fired his last cartridge at Thompson, the bullet breaking his arm. Then House drew a knife and tried to close with his foe, but his foot slipped in the blood, and before he could recover Thompson shot him dead. There was a price on House's head, he having previously killed two men, one in south Florida and one in Alabama.

The second tragedy occurred in Madison county Friday night. A band of white raiders took Harry Wilson in the woods and bound him to a tree. The victim was found Saturday morning still alive, but mortally wounded.

After sawing the white raiders went to the home of Lucy Murray, took her sixteen-year-old son to the woods and flogged him so that death will result.

The boy's skin was literally cut to strips and he was unconscious when found.

The last of this bloody series occurred at Greenwood in Jackson county. Thomas Jones made a brutal assault on Samuel Wilson, an old man. Wilson was knocked down. Jones was preparing to shoot him. Before Jones could pull the trigger, Wilson's son, stationed to the scene by Frank Wilson, the sixteen-year-old son of the old man, was slipped up from the rear.

SOURCE OF THE MISSOURI.

A Hole in the Ground, Velocity in Its Character.

ST. PAUL, Minn., May 11.—Colonel J. V. Brower, Minnesota state geologist, has made the sensational discovery that the source of the Missouri river is not Red Rock Lake, Montana, as has been claimed. Colonel Brower traversed the whole region of the upper Missouri and today made public the result of his discoveries. He says the longest upper branch of the Missouri does not flow through the lower Red Rock Lake in Montana, but comes from a hole in the mountains, which is unlike in its character all the summit of the Rocky mountains, west of Henry's lake, Idaho, and at a point bordering the boundary between that state and Montana. The miniature river at its commencement is flowing in a stone existence from the inner walls of the surrounding volcanic events, near perpetual snow banks, has by its crudities capacity cut its way up from that rugged and precipitous mountain uplift of an enormous size, until an enormous mountain of rock has been cut in twain, a canyon formed, and assuming the proportions of a river, from the lawage of cross coming in at the side, reaches the valleys below flowing into upper Red lake, twenty miles from its source in the mountains, thence westwardly, northerly and northeasterly, part Red Willow and Red Rock lake to Upper Fort, thence to the Mississippi and thence to the Gulf of Mexico, through and not thirteen miles, a distance of 4,220 miles.

McKinley's Residence.

CANTON, Ohio, May 11.—For several weeks rumors have been circulated that when Governor McKinley was nominated at St. Louis, he would take up his residence at Cleveland. On account of these rumors several prominent men made direct inquiry. One of these said in the Repository reporter that he had been assured that there was not the slightest possibility of such an event. He said that Governor McKinley had in no way changed his plans or ever had any intention of leaving his home city during the coming campaign in the event of his nomination.

Killed by Indians.

HERMOSILLO, Mexico, May 11.—Advices received here today from Ures in the southeastern part of this state, that John Lehner and Forest Moss, the two young men who left Nogales, Arizona, two months ago, to walk to Guatemala, have been killed by Yaqui Indians west of that town. Both men are Americans and their route lay nearly 100 miles lay through the Yaqui Indian country. They were warned of the danger of their undertaking before leaving Nogales.

Women Admitted to the Turnerhund.

CLEVELAND, May 11.—At the annual convention of the Lake Erie district of the North American Turnerbund held in this city last evening it was decided after much discussion that women be admitted to all of the societies.

A Well Known Publisher Dead.

NEW YORK, May 11.—Benjamin Urner, a well known publisher, is dead at his home in Fanwood, N. J. Mr. Urner was born in Cincinnati on September 9, 1832. After traveling extensively in the South, he came East in 1851 and settled near Red Bank, N. J. Later he came to the city and established The Producers' Price Current, which published chiefly the reports of the produce markets. In 1862 after the organization of the Urner Publishing company, Mr. Urner retired from active work on the paper and left the business in the management of his son, F. G. Urner, and Wm. C. Taber. About one year ago the Urner Publishing company and the Frank Berry & Sons Publishing company consolidated, forming the Urner-Barry company. Mr. Urner was elected President of the new company and held that place at the time of his death.

WELCOMED BY THE NEGUS.

The Leader of the Red Cross Expedition to Abyssinia.

NEW YORK, May 11.—A dispatch to the Herald from St. Petersburg says:

General Shvendorff, head of the Russian Red Cross society and leader of the expedition to Abyssinia, telegraphs saying that he and his party have been received with open arms and that the Negus Menelik is making extensive preparations for their passage to Harar.

The Novoe Vremya says that England's one about Herat are unfounded. The Red Cross expedition to Abyssinia left Odessa on April 10. This is the third expedition to Abyssinia. The first, under Cossack Assinoff left in December, 1889, and ended by being stricken at the Prince of Saghallo. The second, which was called a scientific mission, left about eighteen months ago and resulted in the arrival in St. Petersburg of an Abyssinian embassy from the Negus with a special mission respecting the religion of the Russian church and the note published by the Czar's ministers. The present mission, under the command of General Shvendorff, assisted by several military officers, consisted of about eighty members, of which the medical staff numbers six doctors and twelve nurses. Of the other members of the expedition little is stated except that one is a prince who is taking twenty thousand small crosses to be distributed among the Abyssinians. It is expected in Russian official circles that this expedition will give Russia that footing in Abyssinia which she has been so patiently trying to obtain.

RAILROAD MEN SHOT.

An Step-cause Gathering in St. Louis Yesterday.

ST. LOUIS, May 11.—One of the most important meetings of railroad employes ever held took place at the headquarters of the Order of Railway Conductors in this city yesterday. It represented officially six national orders and brotherhoods. In fact they may be called international, as the membership of each individual one employed on lines in Canada and Mexico. F. P. Sargent, grand master of the Brotherhood of Locomotive Firemen, presided. Frank Sheehan, of Chicago, grand secretary and treasurer of the order, came from Peoria, Ill., to attend the meeting. Patrick E. Morrissey of Bloomington, Ill., grand master of the Brotherhood of Railway Trainmen, was there, also E. E. Clark, grand chief conductor of the order of Railway Conductors. Grand Master Arthur of the Brotherhood of Locomotive Engineers, was unable to come, but was represented officially, as were the officers of the Switchmen's union of North America and the order of Railway Telegraphers and members of the grand lodge of six orders attended the convention. There were some six hundred present. The chief result of the convention was the adoption of a resolution to form a federation of the six orders named. Every speaker favored the federation, and every man present voted for it. The only difference of opinion was on the question of admitting the American Railway Union. As first submitted the proposition included Eugene V. Debs' order, but a motion carried to strike it out carried with only two or three dissenting votes. The officers of the grand lodges of the six orders represented at the meeting were authorized and instructed to formulate a plan for uniting the six under a general council, similar to the governing body of the Federation of Labor. The convention adopted resolutions favoring arbitration and appeals from decisions of the Federal courts, after which the convention adjourned sine die.

Gold for Germany.

NEW YORK, May 11.—Heidelbach, Ickelheimer & Co. will ship $1,200,000 in gold on the steamer Lahn sailing for Germany tomorrow.

L. Von Hoffman & Co. engaged $700,000, and Muller, Schulz & Co. $500,000 for shipment tomorrow, making a total of $2,600,000.

Soldiers Injured in a Collision.

ANTWERP, May 11.—A train loaded with troops for Madagascar collided yesterday between Adelle and Vieuxlemmen with another train. Five officers were injured. Twelve officers, thirty soldiers and the crew of the train were injured.

Paint Boiler Explosion.

VICKSBURG, Miss., May 11.—The boilers of the large tow boat Harry Brown, expanded twenty-five miles below this city at 11:30 last night, and in less than a minute the sack out of eight. Eleven persons, all white, were killed. The tow boat Wash Hassell brought in the bodies and the survivors to this city. Captain John Kane, Dennis J. Lynch, second mate, and Dan Kane, pilot, who were injured, are in the hospital. Peter Norman, Derby Fitzmorris, first mate, and First engineer William Dougherty were hurt.

When the explosion occurred the tow boat Brown broke in two. Of the crew of forty-two men, three are dead, eight missing, and the engine and four others badly injured. Many were slightly hurt.

Greater New York Bill Signed.

ALBANY, N. Y., May 11.—Governor Morton signed the greater New York bill today.

The Scott Jackson Case.

NEWPORT, Ky., May 11.—Judge Hiems said this afternoon the Scott Jackson case would not be submitted to the jury until Thursday. He postponed the trial of Adams Waiting for the murder of Pearl Bryan to May 28.

IMPATIENT FOR WAR

A Spanish Paper Thinks the Sooner It Comes the Better.

THE EXECUTION POSTPONED

Until the Interpretation of Certain Treaty Provisions Have Been Agreed Upon.

WASHINGTON, May 11.—In the Competitor's case, it can be authoritatively stated that at the request of the United States, the Spanish government will postpone the execution of the death sentences upon the American citizens until the views of the United States respecting the application to their cases of the treaty of 1795 and the protocol of 1877 can be considered. The announcement of the postponement of the executions means a delay of some weeks. The matter will be taken up by the diplomatic representatives of the United States and Spain and will be made the subject of an exchange of correspondence on the interpretation to be given the treaty provisions. Meanwhile the effect will be to allay the popular excitement both here and in Spain.

WAR WANTED.

MADRID, May 11.—The Imparcial, referring officially to the strained relations between the United States and Spain, says the United States intend to wear out the patience of Spain or themselves and declare war. It is preferable to hasten the event, as the indemnity of Spain will increase with time.

Captain General Weyler, has not yet replied to the command sent him to result to the supreme court the cases of the men condemned to death for taking part in the competitor's expedition.

WAS A NEWSPAPER CORRESPONDENT.

LAWRENCE, Kas., May 11.—Owen Melton, the young Kansas captured on the Competitor and condemned to death is a nephew of C. H. Jones, proprietor of a dining hall in this city. Melton was born and raised near Vineland, eight miles south of Lawrence. He went about six years ago to Arkansas, where his parents now reside. He was at the time of his capture, it is said, a special correspondent of the Kansas City Times-Union.

ALLEGED FILIBUSTERS CAPTURED

HAVANA, May 11.—It was definitely announced today that on the day the five men captured on the Competitor were tried, Friday last, Admiral Navarro, in accordance with the petition of the prosecutor and the sentence of the naval tribunal, approved and signed the sentence of death imposed upon the filibusters Alfredo Laborie, Dr. Elias Beeds, Wm. Golden, John Melton, and Theodore Mata. The announcement was supplemented by the statement that in view of high state considerations, the cases have been referred for a final decision to the supreme tribunal of war and marine.

Two alleged filibusters, both citizens of the United States, said to have been taken off the Competitor yesterday, have arrived here in custody from Bahia Honda. They were captured by the local guardiles of Palma, some time after their landing. The steamer Triter has brought here a small boat abandoned on the coast by the mayor of Bermeco. The boat is believed to have belonged to a small expedition which landed in the vicinity where the Competitor was sighted and captured.

A CONFERENCE HELD.

MADRID, May 11.—The Spanish premier, Senor Canovas del Castillo, and the United States minister had a conference today, the result of which is not known. It is reported that Captain General Weyler has called the Spanish government that the Spanish authorities are hampered by the irritating meddling of Americans in Cuban affairs. It is understood the United States government has presented fresh claims for heavy indemnities through losses on the sugar plantations belonging to Americans, burned by the insurgents. It is expected these demands will lead to other complications.

WAS NOT PREPARED TO ANSWER.

LONDON, May 11.—J. J. O'Kelly, the Parnellite member of Parliament for North Roscommon, asked the government in the House of Commons today if representations had been made to Spain to obtain a communication of the evidence upon which Ledwidge, an Irish Gildee, a British subject, captured on the American filibustering schooner Competitor, Cuban, parliamentary secretary for foreign affairs, said the matter was an important question of policy and international law and he asked O'Kelly to repeat the question tomorrow.

Business Failures.

NEW ORLEANS, May 11.—Edward Coyle of Jos. Coyle & Son, president of the Independent Oil Co., made a cession of his property for the benefit of the creditors today.

The liabilities are $285,000 and the liabilities $449,000.

The Methodist Conference.

CLEVELAND, Ohio, May 11.—Bishop Walden presided this morning at the Methodist Episcopal general conference. Rev. H. F. Willetson of Southern California presented a resolution declaring that color and caste do not enter into the conference and the election of bishops of African descent should be viewed in the light of ability. It was presented for adoption, but the conference referred it to the committee on episcopacy. The committee on the Fred case all reported on the application of the Delaware conference to change the name to the Southern Methodist society. The report was in favor of retaining the old name. After debate the report was adopted.

Carpenters Strike for Higher Wages.

DETROIT, Mich., May 11.—Over 500 union carpenters assembled in Central Labor Union Hall this morning, agreed of going to work. The strike is for eight hours a day of 25 cents an hour. The bosses are willing to make the minimum 20 cents per hour and promise to concede an eight-hour day on January 1, next.

The Northern Pacific Deal.

WASHINGTON, May 11.—Representative Harmon, of Montana, is circulating in the House a petition to the judiciary committee for immediate report on the joint resolution to authorize the reorganization of the Northern Pacific Railway company. The joint resolution provides that foreclosure proceedings is to be made in June and unless Congress takes action before that proceeding, the reorganization of the company will have to be under the state charter. The resolution, if adopted, will compel the company under the charter to sell all agricultural land within a mile of the track at a price not exceeding $2.50 per acre, and forbid consolidation with any competing lines.

A Roaring Mass of Flames.

BRADFORD, Pa., May 11.—Hemlock Gleaning that escaped last summer's fires has been swept by fire. Flames in the oil field, south of this city. The fire broke out on Saturday afternoon at Dent farm and spread in the thirteen oil wells owned by the Kenny Oil company, the derricks of which were consumed, together with a number of small oil tanks and boiler houses. There still trying to prevent the flames from spreading to the south Pennsylvania coal oil wells in the close proximity. If the fire gets a start in that direction, the loss will be very heavy. Small fires are reported in various parts of the oil field and people are south warned, as everything is so dry as tinder. The Hendricks woods, two miles west of Rinsburg, are reported on fire and threatening the Pennsylvania Tanning company's property. Forest fires are reported in the vicinity of Owego, a small lumber town in Potter county.

UNION OF LABORERS.

A Step Towards Joining in One Federation 3,000,000 Workingmen.

NEW YORK, May 11.—The Herald this morning says: A long step towards a national union between the American federation of labor which together controls about 2,000,000 organized workmen, was taken at last night's meeting of the Central Labor Union, which is a purely local body, representing as it either, but containing unions owing allegiance to both. A letter was received from Samuel Gompers, president, and from Frank Sargent, grand master of the Brotherhood of Railway Firemen, asking the Central Labor union to sink all differences and join the federation. When the letter was read Charles E. Hardley of the electrical workers union, a Knight of labor, warmly endorsed it. The only opponent to Mr. Gompers's proposition was Joly, delegate of the brewers' union, a Knight of L. A. who was his a grievance because the federation once opposed a boycott by the Knights of Labor on a brewery in Rochester. Joly was seconded by Edwards, a third Knight of Labor, to refer President Gompers's request to affiliated unions for a vote, was carried by a large majority.

A letter was received from district assembly No. 75, K. of L. which controls the street railway union of Brooklyn, asking the Central Labor Union Rossiter of the Brooklyn Heights trolley road violated agreements entered into with it by discriminating against unionists. The committee subsequently explained that it did not wish to inconvenience the public by another strike and asked that the members of the Central Labor union patronize street roads.

Peter J. McGuire, vice president of the American Federation of Labor, who is in the city in the interest of Union against John McLoughlin, formerly burgess of Homestead, Pa., who is conducting a fight against the Carnegie company, was present and collecting money from labor unions, the members of Swish are under the impression that he is connected with the amalgamated association of iron and steel workers.

The Bermuda.

NEW YORK, May 11.—A dispatch to the Herald from Panama says:

Report is current here that the Bermuda will arrive at Colon within the next few days from Puerto Cortes in ballast. The Panama government has been informed from Pagets to seize the vessel on her arrival at Colon if war materials are on board. The Columbian gunboat General Cerdova was telegraphed for at Carthagena and has arrived at Colon. General Campo Betsano was on board.

Hot in the East.

NEW YORK, May 10.—The hot wave which prevailed throughout the Eastern states today struck this city at an early hour this morning. At 8 a. m. the thermometer registered 71, and it went up rapidly, touching the 80 mark at 10 a. m., and reached the maximum at 3 p. m., by which time it was 91 in the shade. The humidity was abnormally low, down to 50, and there was a stiff breeze from the northwest, which for a time seemed to be blowing miles an hour. Very few cases of prostration by heat were seen.

IN CONNECTICUT.

NEW HAVEN, Conn., May 10.—The phenomenally warm weather today has eclipsed all previous records for May, and the mercury, which reached 92 degrees, attained the highest point for May ever recorded at the local weather bureau since its establishment in 1870. The highest last May it came within 1 degree of today's record, while previous to that 91 degrees on May 10th was the highest recorded for May.

AT BOSTON.

BOSTON, May 10.—The city has been sweltering today in a dry, record-breaking temperature, which has continued for twenty-four hours. The weather bureau showed the highest at 3:30 this afternoon, when it registered 94.5 degrees.

Death's Harvest.

LONDON, May 11.—Dr. Salmon, the oldest Free Mason in the world, is dead. He was 108 years old.

NEW YORK, May 7.—William Symington Sloan, vice president of the Delaware, Lackawanna & Western Railroad, died today after a protracted illness. He was the son of Samuel Sloan.

A TRIP TO TINTIC.

A Party of Salt Lakers Visit the Bonanza in that District.

ACTIVITY SEEN ON EVERY HAND.

The Day's Wars on the Stock Exchange —News from Surrounding Mining Camps—Dips and Spurs.

A party of eight gentlemen consisting of E. H. Allen, John Helmrich, W. S. Brown of the Mercur company, E. G. Woolley Jr., C. D. Gerhauser, W. R. Walker, W. C. B. Allen and E. R. Roberts, left this city on Saturday afternoon last to "take in" the Tintic mining district.

Upon arriving at their destination they went directly to the famous Bullion-Beck mine, into and through which they were shown by Manager Kirby. The gentlemen report the mine as looking better now than for some time past and an immense slope has just been opened up above and below the 700 level. This slope, which for times even more promising than did that opened up last year and the chances are that very valuable mineral will be taken therefrom. The company is working a large force of men—some two hundred—and the mill is doing splendid work on both ore and concentrates. It is intimated, although nothing official has yet been given out, that the company's monthly dividends amounting to $25,000, will make its appearance on the 15th inst.

On Sunday the party was conducted into the immense vaults of the great Centennial-Eureka mine by Manager Kendall. Here was seen large volumes of splendid looking ore, some of which had recently been uncovered. This company has just resumed active operations with a small force of men, and no larger shift will be put on until the present option on the property is declared off or settled in some way.

The visiting gentlemen also entered the Eureka Hill mine and saw, with the former, a day shift in all that is worked since the closing of the Indian mints. Such is also the case with the Gemini, in the Eureka district which is the biggest in the West, great activity is apparent and sixty stamps are constantly hammering, while machinery for forty more is being set in place, thus making arrangements for a one hundred stamp mill. The stamp mill with the concentrator and amalgamator represents an expenditure of over $200,000. Superintendent Hutchins showed the party through the robust room, where an immense quantity of bullion in 140 pound bars was ready awaiting shipment to Eastern refineries. One carload of this ore will be shipped in the very near future and it will bring to the owners of the property a sum running up into the thousands.

The party, besides visiting the above-mentioned properties, looked over the district in general where they saw activity on every hand. New prospects are daily being located and development work is going on with vim and vigor. They took upon the Tintic district as being the greatest producer of gold and silver of any camp in the State and expect to see its already numerous mines enhanced greatly in number during the coming year. Messrs Kirby and McChrystal of the Bullion-Beck and Eureka-Hill respectively, and other employes of the companies accompanied the visitors to this city for the purpose of being in attendance upon court today when the suits of the former against the latter and vice versa come up for hearing. The Eureka-Hill is bringing a suit against the Bullion-Beck for trespass, alleging that the latter was taking ore from the former's properties, which led the Bullion-Beck people to start in their opponents by commencing similar proceeding against them.

THE TINTIC DISTRICT.

The Eureka Democrat's Report at the Mines in That Camp.

The Godiva is showing larger and richer with every additional shift in depth. The Godiva will be a great mine.

An important strike is reported in the Four Aces, but up to going to press we have been unable to have the report verified.

The Black Dragon has a force of ten men now employed and work is being actively pushed. A shipment is now being prepared and will be marketed in a few days.

On Monday the Gemini loaded 230 tons of select ore for market, running out a train of seven cars from beneath the tram line. We believe this will be a feature of the Gemini in the future.

The mine being sunk from the 400-level in the Emerald Guelphic is very promising ground, and the ledge is of a character that leaves little room for doubt of the near presence of permanent ore bodies.

The contract drift in the Grand Central has been discontinued for the present and the main shaft is being carried down from the 300 and will continue to the 700-level, when the crosscuts will be put to work and a drift run to the vein which it is expected will be reached in less than 1,000 feet. It is the purpose of the management to open this property in a thoroughly systematic manner, and the work to this end is being rapidly advanced.

There is a strong probability that work will be resumed on the Union Pacific Mining company's property over as thirty in the near future.

An important strike is reported on the 500-level of the Bullion-Beck, but we have no particulars. The diamond drill on the same level is now in 400 feet with little or no change in the character of the ground.

The Carissa is now loading a 150-ton shipment for the eastern market, and it is safe to predict that a regular tonnage will be the nature of reports from this property in the future. A vein of 30 inches was now employed at the mine and the employment will be increased as rapidly as opened.

U. C. Howe and Dr. A. J. Lockhart, Colorado capitalists, have been looking over the district the past few days with a view to investment here. These gentlemen were favorably impressed with the property, the Eureka Consolidated company (lying east of the Mammoth, by upon investigation found the ground could not be had and have since directed their attention to properties on this side of the range.

One of the most important strikes that has been made in the district for some time is reported to be with from the 500-level at the Mammoth. The ore is very said to exist there, and from white and yellow quartz has been made, runs very high in gold and silver, and from its general characteristics is a most valuable and distinct find in general. Mammoth ore is being in the very conservative views of the management so far as information is obtainable, not sufficient is known to warrant the assertion that the Mammoth mine has made a great strike at ore that is in all respects similar to the great deposit above into and which to do with making into pocket money.

The work of developing the Wellington-Southwestern properties has begun. On Monday a force of men were put to work on the property, and it is expected that will open the Cleveland group, passing entirely through their group of three veins and into the Whitlaken, lying to the east of the Cleveland. The east there at a depth of about 70 feet from the mouth of the tunnel will be in a little less than 1,000 feet in depth and of a character that it will be pushed ahead as rapidly as possible. Messrs. E. N. Jenkins and associates of the Wonder have met with the little success in disposing their claims for the development of their property, but now that some have been overcome and with a couple sold in different parts, the result is that sales seem to be assured.

PARK CITY MINES.

Camp Connection Twice the Last Issue of the Record.

The new blower for the Daily No. 2 stands at the depot loaded and ready for transportation to the mine, but no effort has yet been made to move it to the mine, hence it cannot be needed so lately as first reports indicated. The Daily No. 2 shaft has reached the 1000-foot level of the Ontario, and a station is being cut.

Work was resumed at the Creole mine Monday afternoon under the direction of Andrew Lindsay, a miner of considerable experience both in Utah and other States. After developing several days in cleaning up and repairing the gangway in which the ledge in the shaft was begun and is now going toward rapidly. The Creole will probably put in a gas hoisting engine for forty more is being set in place, thus making arrangements for a one hundred stamp mill. The stamp mill with the concentrator and amalgamator represents an expenditure of over $200,000. Superintendent Hutchins showed the party through the robust room, where an immense quantity of bullion in 140 pound bars was ready awaiting shipment to Eastern refineries. One carload of this ore will be shipped in the very near future and it will bring to the owners of the property a sum running up into the thousands.

The party, besides visiting the above-mentioned properties, looked over the district in general where they saw activity on every hand. New prospects are daily being located and development work is going on with vim and vigor. (Continued on Page Two.)

BABY HAZEL MOODY

Makes the Journey From Far-Off Simoa to Salt Lake City.

TO A YEAR OLD THIS MONTH.

Her Mother Died on a Mission, Leaving a Babe of Three Weeks—Child Will Go to Arizona.

It is a rare thing for a baby of a year to make a journey over the many thousand miles between Utah and Samoa without its parents, yet that is what little Hazel Moody has done and on Wednesday she will start again for Tempe, Graham county, Arizona, going by way of Colorado and New Mexico to her grandparents' home.

There is a pathetic story in connection with Baby Hazel Moody's life—a story of love and devotion to the cause of Christ. Very many interesting incidents might be recounted in the one year of her life, but in a newspaper the story must be brief.

In October, 1894, Elder William Moody and his young wife, Della Williams Moody, left on a mission to the Samoan islands, there to teach the people the tenets of the Gospel. Sister Moody was at that time in her 22nd year. She was the daughter of Brother and Sister David Williams of Thatcher, Arizona, in which town she lived with her husband, to whom she was married in June, 1894.

Arriving at Samoa, Elder William Moody took up his missionary labors, and as devoted wife also faithfully performed her part. The next spring—on May 2, 1895—Sister Moody became a mother. She had her little one blessed and given the name of Hazel. But when the babe had reached the age of 22 days it was motherless. Sister Moody died on the 24th of May, 1895, and a month later the sad news was received and circulated here.

The babe was terribly sick and tenderly nursed through that critical period of its existence when according to nature it should have had the closest care of a mother, only Providence could have ordained otherwise; and Providence supplied the little one's needs, until it reached nearly a year's existence in the place of its birth. Last month came an opportunity for Elder Moody to send his darling child home, to be cared for by the parents of the departed mother. Hazel was given into the hands of a kind lady who had been engaged to care for it on the long voyage to San Francisco. There was a delay of a week in the vessel which brought the child—the Mariposa—Elder Barton of the Twelfth ward of this city, Elder Joseph A. Hardwick of Heber City, and Elder J. W. Beck of Paris, Idaho, who had supervisory charge over the child.

The babe's birthday—the first anniversary of its advent into mortality—came during the ocean voyage between Honolulu and San Francisco. The Mariposa reached the last named port on Saturday morning, Saturday last, May 9th. The party continued on its way, Elder Barton caring for the babe, which showed such attachment for him that it was with to part from him for those who are to take charge of it hereafter. The party were met at Ogden at 4 o'clock this morning, Elder Joseph A. Williams, Baby Hazel's grandfather, who will take it home, where it will receive the best attention. At 9 o'clock this morning the party reached this city, and Brother Williams and his precious charge are staying at the residence of Brother T. H. Evans, No. 663 west, South Temple street, where the child will remain till Wednesday, when they will leave on the 7:40 a. m. Rio Grande Western train.

On the voyage the little one enjoyed excellent health, and on its arrival in this city was in a better condition than when it left Samoa.

Elder Moody, Sister Moody, remained in the missionary field to continue the work to which he has been engaged for the past eighteen months.

Weather Report.

Observer Smith of the weather bureau gives the following general and local forecast for 36 hours ending at 7 p. m. tomorrow: For Utah, this afternoon and tonight showers; Tuesday, warmer; Salt Lake City and vicinity, showers, stationary temperature.

MINOR MENTION.

A meeting will be held in Calder's hall tonight for the organization of a society to be known as the Native Sons of Utah. It commences at 8 o'clock.

The funeral of Henry Pusey, whose suicide at Fort Douglas was chronicled in Friday's NEWS, took place from the Twentieth ward meeting house yesterday.

The fire and police commission will meet this evening. It is expected that Chief Pratt will give his reasons for dismissing Sergeant Eidinger. Among other important matters to come before the board is the appointment of a desk sergeant.

This evening a social will be given in the Eighth ward assembly rooms, complimentary to the Bishop of the ward, Elder Eldon F. Shields, in celebration of the anniversary of his being called to the Bishopric. Invitations have been given to those who are expected to be in attendance.

James D. Lomax, a veteran of the Mormon war, one of the founders of the Republican party in Utah, a judge in the early days of Montana and a lawyer in Utah, has died at San Francisco at the age of 76. The deceased was well known in Salt Lake a decade ago, when he was engaged here as a practicing attorney. He moved to Ogden, then to Logan, and subsequently to California.
