Speaking generally, and from indications shown in business at this morning's call on the Salt Lake Mining and Stock exchange, the market was improved over the close of last week. Mining stocks sold at better figures and there were more shares allowed to change ownership.

One of the very infrequent sales of Silver King was made today and $8,200 in good, hard money was paid for 100 shares on the open board, meaning that $82 a share was realized. The prices posted on the board were $70 bid and $80 asked, but a bunch of 100 shares could be obtained for no such figures, and the buyer was glad to get it at $82. The gilt-edged nature of this security is such that to coax out the shares one must be possessed of a fat purse and a liberal disposition in its use.

Carisa was out for the money and dipped into the trading for a good lump of it. As the sales were achieved the stock improved in price until it brought 81¼ cents a share, having begun business at 78 cents. There was little hesitation in the swaps and they went along at a merry rate until a total of 22,200 shares had gone under the hammer.

Uncle Sam was a regular dandy, making a debut in the sales at 76¼ and reaching 79 in the very next trade. The upward trend continued until 81¾ was realized and then it lost its foothold and slipped back to a final sale at 80⅞ cents.

California was also better and did a business exceeded only by Carisa, which showed up largest of all. This Park City stock opened at 59½ cents and rose to 61½, presenting a slightly stronger front than in last week.

Most of the stocks that entered into the buying and selling were in better form and there was a more comfortable feeling all through.

Asphaltum in Wayne.

Near the center of Wayne county, 120 miles from the Rio Grande Western has been found an immense asphaltum deposit. It fills the crevices of a sandstone ledge. The deposit has been known of for some time, but its true nature was not understood until resently. The deposit will be worked.

MINING NOTES.

Silver is down to 54¼.

Yankee Con. ore is showing copper contents.

Richmond-Anaconda is now a part of Uncle Sam.

The Ontario's Christmas dividend will be paid on December 20.

The Gemini, of Tintic, is expected to distribute $50,000 for Christmas.

Ten stamps of the sixteen in the Century mill are in operation.

Stockholders' annual meeting of the California Mining company today.

It is likely that the mining exchange will be closed during the holidays.

Rails of the Oregon Short line are being extended to the Star Con, at Tintic.

When the governing board of the exchange adjourned on Saturday it put over action on the "future" rule for two weeks.

Supt. Fleming of the Tesora is taking steps to so improve the mill as to avoid the losses which have hitherto characterized its operation.

Wells, (Nev.), Herald—The King Solomon company evidently means business from the large consignments of machinery arriving daily.

This morning a representative of the news-gathering syndicate, known as the Press Association of Salt Lake City, Utah, began work on the exchange.

F. E. McGurrin is making an inspection of titles of properties in the Iron county fields preparatory to the big deal that is now in negotiation in New York. While no official confirmation of the recently reported sale has been received here there is much reason to believe that it is at least near a consummation.

Price Advocate—A car of machinery reached Thompsons last week for a copper extraction plant that is to be erected at Court House station on the Thompsons and Moab road by Salt Lake parties. The steamboat which left Green River some time ago, bound for Moab, has not as yet made its appearance at that end of the line.

The Butte Oil company has taken in its new 35-horse power boiler and has begun drilling, at its property in the Kintla Lake district. The old boiler had a capacity of only 20-horse power, which was not enough to run the drill, though it will do for the sawmill. Another rig has been brought up from the Beaumont district, of Texas, to the Blackfoot station and it will be taken in over the snow.

The fall in silver threatens to cause depression in the Manchester cotton trade by diminishing exports to China and India, cables the London representative of the Tribune. It is attributed to heavy sales by American smelters rather than to premature rumors that the Chinese government will dump an enormous quantity of silver on the European market in meeting the first installment of the indemnity. Indian trade is, however, favorable and Manchester alarmists are hardly justified in forecasting anything more than a temporary flurry.

Lyon County (Nev.), Times—The Dyer group of copper claims in the south end district of this camp, including the old Daniels copper mine, were bonded this week to J. A. Dyer and mother, R. C. Dyer, of this place, and Robert C. Braun, of San Francisco. There are five claims in all and they have been bonded for $40,0000 for nine months. At present the assessment work is being done on this property, and about the first of the year extensive development work on the group will be commenced. The old Daniels mine has produced considerable high-grade copper ore in days gone by.

Butte Mining World—Both the city council and the board of county commissioners have refused to make any donation whatever towards defraying the expenses of entertaining the next meeting of the International Mining congress, which was designated after a hard fight to meet in Butte next year. This places the matter in the hands of the Butte business men, and it remains to be seen whether they care enough for the honor of the city and those who were instrumental in securing the meeting of such a representative gathering to subscribe the necessary funds to properly entertain the visitors.

Belt, (Mont.), Times—The smaller mines of the camp are running with their usual winter activity. Most of the coal produced in them is used in the home market, which, of course, is limited, though some contracts are filled at Neihart. The Millard mine is employing about six or eight men; Mr. Griffiths, lessee of the Lewis mine, is giving work to a small crew, and the Orr Brothers are busy delivering their product to their many customers. The coal from all these mines is of a superior quality, and a good market would transform them into properties that would furnish work to a large force. They are all in shape to produce largely on short notice.

Great Falls Leader—Montana has the largest and best deposit of corundrum ore in the world. It is in the south end of the Gallatin valley, 23 miles southwest of Bozeman and a short distance south of Belgrade. A company for the purpose of buying and developing it was organized at a meeting held at Bozeman yesterday. The incorporators were Harris Kirk, discoverer of the deposit; Dr. C. E. McCoy, Fred L. Klein, Leverett S. Ropes, a mining engineer, who has made a specialty of corundrum mining. The deposit is a bedded vein ranging from 24 to 34 inches wide and has been traced for a distance of two miles by a series of thirty pits. One shaft has been sunk 30 feet, another 40 feet and the other holes are crosscuts, so that the course of the vein is fully defined.

Sevier Valley Times—The Trapper's ride, on Fish creek, Gold Mountain, contemplate putting up a large mill on their property early next spring. Dr. C. J. Peterson left yesterday morning for Chicago to examine different propositions for furnishing machinery and to see which, in his judgment, is the kind they need, and possibly arrange for the same. This property promises to become a great producer when a mill is erected. Harry Quin and William Harkins have taken a contract to run an extension to the present tunnel, 400 feet further. The present tunnel is in 425 feet and when this contract is finished it will be 825 feet in length. The Golden Reef has nearly 400 sacks of ore ready for shipment. They expect to ship a car about the 15th of next month. The ore is of a high grade and it will no doubt bring the owners good returns.

White Pine News—On Saturday last the Jupiter group of three claims was added to the list bonded to Dix W. Smith for the new company now being organized in the East. This property is one of the most promising on the belt, and the work which has already been done shows it to be valuable, not alone for its gold deposits, but for copper as well. A party consisting of Milan Hibbard, of Elmira, N. Y.; T. P. Ottis, of Wellsville, N. Y.; G. H. Dunham, of Titusville, Pa.; E. W. Campbell and F. R. Campbell, of Dewdrop, Pa., and C. K. Hibbard, of Elmira, N. Y., reached Ely last Friday, four of the gentlemen representing the board of directors of the Chainman, the other two being young men who are accompanying their elders for the purpose of gaining a knowledge of Nevada and its mineral resources. This party will be joined here next week by Dix W. Smith, secretary of the company, who will be accompanied from Salt Lake City by Fred C. Richmond, of the Salt Lake Hardware company, which secured the contract for placing the machinery in the new mill, and it is understood that at the consultation which will follow, the delay in the completion of the plant will be explained, and arrangements made for the development of the property from the lower level again resumed. The party went out yesterday to examine the water right at the old Monitor mill for which the Chainman company is negotiating.

LIST GENERALLY HIGHER.

A Few of the Prominent Railroad Stocks Made Recessions At the Opening.

Unusually Large Transactions in Special Stocks on the Up Grade—Gold Exports Check Prices.

New York, Dec. 2.—Wall Street: A few of the prominent railroad stocks showed slight fractional recessions at the opening, but the majority of this list was higher, especially the industrials. The market was quite active and dealings well distributed. There were some unusually large transactions in special stocks on the up grade, particularly Louisville, which advanced 1½ to 110½. Meanwhile Amalgamated Copper had improved to 76, and Anaconda moved up a point. Long Island was bought heavily and rose 3¼. Liquidation set in in Brooklyn Transit toward 11 o'clock, causing a loss of 1½ and heaviness in the general market. Amalgamated Copper reacted 1½ and some of the leading stocks fell below Saturday's close. The market hardened again.

The announcement of the engagement of $500,600 gold checked the rise, and prices receded rapidly. The leading railroads and specialties fell well below last week's close, the net losses reaching a point or over in the tractions, Canadian Southern, Great Northern preferred, Pennsylvania, People's Gas, N. Y. C., and Union Pacific. There was heavy buying of Amalgamated Copper at the lowest, and when that stock rallied to 76⅝, other stocks hardened again.

Bonds were irregular.

The market was dull and wavering during the noon hour. The recovery was followed by a decline to near the low point when additional gold exports were announced. General Electric fell back 3, being 1½ under Saturday. Rubber Goods preferred lost 2. An advance to 61 in Southern Pacific carried other stocks higher in sympathy.

Trading was sluggish for a time and the only material changes were in minor stocks. An active selling movement broke out in Sugar, dropping it to 123⅝, compared with 126¾ at the opening. Other active stocks also weakened decidedly. The market generally continued heavy near the lowest until the room shorts sought to cover. There were slight improvements but selling was renewed in large volume on the advance, forcing prices lower than before. Amalgamated Copper fell to 72¾ and the low level elsewhere was extended a fraction, except for New York Central, which fell 2¼ under Saturday and St. Paul 2. A flurry in call money emphasized the depression. The closing was rather feverish but about steady on renewed buying by the shorts.

Asthma

The doctors tell us they cannot cure every case of asthma with Ayer's Cherry Pectoral. They say it is the best thing for relief and that it often completely cures. We are willing to take their word for it, are you?

"After having spent hundreds of dollars trying to be cured of my asthma, I now rely entirely on Ayer's Cherry Pectoral for the relief of the severe paroxysms of coughing. It is the best medicine for this I can find."
Geo. W. Stout, Sacramento, Cal.

Burlington Route

Worthy of Their Names.

The sleeping cars on the Burlington's Chicago Special are called Marius, Martius, Maximus and Metellus.

The names are those of Roman Kings and Emperors—men who lived and ruled more than 2,000 years ago.

The cars are worthy of the names they bear. They are as luxurious as the marble palaces of ancient Rome.

Through sleepers for Omaha and Chicago via the Burlington leave the R. G. W. depot daily at 3:15 p. m. Tourist cars Wednesdays and Fridays.

Drop in and let us quote you rates and give you full information about our service, or, if you prefer, see your local ticket agent.
