MINING, BUSINESS AND STOCKS.

MINING STOCKS INACTIVE TODAY.

Few of the Traders on 'Change Showed a Disposition to Make Any Advances.

TRANSFERS WERE NOT MANY.

The Total Business of Forenoon Sessions Summed Up to Only $4,564.13—Quotations.

Another week has opened with mining stocks dull and inactive. The sales of the forenoon on the Salt Lake Stock and Mining Exchange aggregated 6,575 shares, the same bringing $4,564.13.

Ajax participated at 17 @ 17½ cents. Con. Mercur held firm, the stock being taken are $1.52. Daly-West displayed signs of improvement and was quoted higher. May Day was marked up to 12 cents, assessment paid. Several transfers of New York Bonanza were made around 25 cents.

On the open board an even thousand shares of Keystone was transferred, at prices ranging from 21 up to 23½ cents. Butler-Liberal was offered at 16 cents, while the best bid made for it was 13 cents.

The closing quotations and sales posted just before noon were as follows:

FORENOON QUOTATIONS.

Open board	2,600	633.13
Forenoon totals	6,575	$4,564.13

ARRIVES FROM DELAMAR.

Sidney Bamberger Says Big Mill Will Soon be Treating 500 Tons Daily.

Among the arrivals from the south this forenoon was Sidney Bamberger, who has been making a study of the big Bamberger-Delamar mines at Delamar, Nevada. He reported everything going going along smoothly and the mill will soon be adjusted so that it will be handling the ore from the mines at the rate of 500 tons per day. The plant has been running under 400 tons ,but as is the case with all other new plants it takes some little time to get everything in first class running order.

Mr. Bamberger says the San Pedro railway is preparing to commence pushing the extension towards Los Angeles. During the past few days some big outfits to be employed in building the grades has arrived at Calientes.

Mining Deeds Filed at Provo.

Special Correspondence.

Provo, Aug. 17.—The following mining deeds have been filed for record with the county recorder.

From G. C. J. Simpson et al, of Clover Creek, Tooele county, to Thomas Gundry of Mercur, for an individed two-thirds interest in each of the following mining claims in Camp Floyd mining districts: The Blue Bird, Brooklyn, Thomas Gundry and A. C. J. Simpson, consideration, $2,000.

From R. N. Bennett and Samuel McCauley, of Alpine, Utah, to Lincoln Carlisle, of Alpine an undivided one-half interest in the Gold Bug mining claim, in Silver Lake mining district, consideration, $500.

TINTIC MINING NEWS.

Mammoth Mining Company Will Increase Its Force by 150 Men.

Special Correspondence.

Eureka, Aug. 16.—The shaft at the Dagmar-Northwest mine, located just northeast of Eureka, is now at a depth of 350 feet where a station will be cut. Sinking will be continued in the haft to the 500 level.

Now that the Mammoth Mining company has closed a contract with the American Smelting & Refining company, an additional force of about 150 men will be put on at the mine; but the mill will be kept closed. The ore bins at the mill, which are overflowing with ore, will be emptied and the contents shipped. There is a large amount of low-grade ore at the mine which will average $3.50 to $4.00 per ton, containing copper, gold and silver.

The Bonanza mine, located in West Tintic, has been closed down pending an option held by a well known mining man of Salt Lake.

A shipment made from the Sunbeam mine last week carried values of 55 ounces silver, $2 gold, 10 per cent lead and 25 per cent copper.

ACTIVITY REIGNS IN UTAH'S CAMPS

From Nearly Every District Has Come the News of Unprecedented Prosperity.

MILL AND SMELTER BUILDING.

Wonderful Development in Beaver County—Samuel Newhouse's Opinion of Cactus—$40,000,000 in Sight.

Never before in the history of Utah has such activity been displayed in the mining camps as at the present time. From nearly every district has come the news of unprecedented prosperity. There are some exceptions, of course, but generally speaking this is the case. It is gratifying to note the results being obtained in many of the new camps being opened and explored, and it is equally so to hear of the revival that has been inaugurated in the older camps, particularly Alta, Dry Canyon and Ophir, which were once abandoned, it being said of them that they were played out: that the pay ore bodies had become exhausted.

Of the newer camps those established in Beaver county have probably created as much stir as any, and in the monied centers of the east Beaver county is almost as familiarly known as Park City or Bingham, and the time is not far distant when the copper mines of that portion of the state will cut an important figure in the production of metals.

The Majestic mines will soon be producing regularly; and it will not be many months till the Cactus mine, operated by the Newhouse Mines & Smelters company, will share the fame enjoyed by older mines in the west.

Mr. Newhouse, during his recent visit to the Cactus, declared it to be the best mine with which he was ever connected and that is saying a whole lot, for he has been associated with some of the greatest mines in the country, and particularly of this state.

GREATEST UTAH MINE.

The mining magnate is quoted by the Milford Times as saying:

"You can safely say that Beaver county possesses the greatest mine in the whole State of Utah.

"I do not make this statement for the purpose of advertising or boosting the property, for I have all of the money I need for the enterprise and there is not a share of the stock for sale. It is the simple truth, that this is the greatest mine in the State of Utah, and I except none. I believe that I could go on the witness stand and state under oath that there is $40,000,000 worth of ore in sight at the present time above the 600 level. We know within a few cents what it will cost to handle this ore. The entire cost of mining concentrating, smelting and placing the bullion upon the market will be under $3 per ton of ore. There are about two and a half million tons of ore exposed and the average profit upon this ore will be $12 per ton or better.

"Yes, that means a profit of approximately $30,000,000 upon the ore now in sight. There is no mine in Utah that can make such a showing as this. It cannot be equalled by any individual property in the United States, even the great Calumet & Hecla. The Highland Boy and the Boston Colsolidated are great mines, but they are not a circumstance to the Cactus."

SURPASSED ALL EXPECTATIONS.

The developments in the Cactus mine have considerably more than met Mr. Newhouse's most sanguine expectations. But important strikes and developments have been made right along in other mines and some of them are of immense importance.

In the way of mill and smelter building a great deal is being done and is about to be done. The Utah Consolidated is about to enlarge its plant near Murray and ground may be broken for it within the present month. The Yampa smelter at Bingham is under construction; it will be ready for commission before the close of the year and it is improbable that some definite action will be taken by the directors of the Boston Consolidated before the snow flies, towards the building of a plant somewhere in the Salt Lake valley, if not at Bingham. The Majestic plant near Milford is almost ready for commission; before the end of the month the furnaces will be fired up. Preparations for the erection of the gigantic concentrator and smelter for the Cactus mine are well under way; the Utah Copper company, with Bingham as its headquarters, has commenced its concentrator which eventually will handle an output of 1,000 tons of ore or more daily. The Keith-Kearns mill at Park City will be ready for commission in October; the Ontario, also of Park City, has broken ground for a 125-ton concentrator and the Honerine company at Stockton has made that much of a start on a concentrator of an initial capacity of 100 tons daily. The mill of the Sevier Con., near Kimberly, is nearly ready to start, and other plants are in contemplation. The amount of money to go into mills and smelters in Utah during the present year and next will run up to an enormous sum.

COLUMBUS CON. TUNNEL NO. 2.

The Entire Winze is in Ore and of a Good Grade.

The developments being made in tunnel No. 2 of the Columbus Consolidated mine at Alta are of a nature which astonishes the management. A few days ago, when Manager Jacobson was in camp, the ore across the winze now being sunk was assayed, showing values averaging between 5 and 6 per cent copper, between 15 and 20 per cent copper and 15 per cent iron.

The entire width of the winze is in ore and neither wall has been disclosed. There is no waste to the ore being removed in the course of development. The product is sent to the jigs for concentration and is sent to the valley smelters in that shape. Manager Jacobson says that the company is receiving revenue at the rate of $180 per day from this source, while the cost of development, three shifts working, is about $40 per day. Indeed, there are few properties in the state doing so well with no more development done.

The valley smelters are after the product and it is not improbable that a contract will be made with some of them to ship the ore in the crude, thus doing away with the necessity of a concentrator. The smelting concerns realize that the ores of Alta are of a character badly needed by them, and there is quite a rivalery in evidence as to who will get a foothold first.

SENSATIONAL ORE IN HORSE HEAVEN.

An Important Discovery Reported In Gold Vein Mine, Near Marysvale, Last Saturday.

RUNS INTO THE THOUSANDS.

Ledge Encountered Said to Measure Nine Feet Wide—Property Under Management of G. F. Dalton.

(Special to the "News.")

Marysvale, Utah, Aug. 17.—The largest and most senational strike of gold bearing quartz ever made in this entire section was discovered Saturday in the famous Horse Heaven district, situated about 10 miles southwest from Marysvale, by the Gold Vein Mining company.

The ledge encountered is nine feet in width, and the pay streak about five feet. The quartz fairly bristles with native gold and will run away up in the thousands. Excitement runs high, and as soon as it becomes generally known a stampede will follow. This company was recently organized and is composel of prominent Salt Lake people. G. F. Dalton, the well known mining man of Salt Lake City, has the management of the property, and it was under his personal direction that the big discovery was made.

Shipments will be made as soon as possible. Your correspondent has seveal times referred to this rich mineral section, and the fact that this portion of Utah would prove the Cripple Creek of the state.

The strike in the Gold Vein property near Marysvale was confirmed at the local offices of the company today and while details are still lacking the information has been received from Superintendent Dalton that it is important .The message bearing the news was received by George Romney, Jr., a director in the company, whom Mr. Dalton asked to come to the mine immediately. In response, Mr. Romney departed for the south this morning.

KINNON AS SUPERINTENDEN

Coloradoan May Remain at Head of Majestic Smelting Department.

W. H. Kinnon, an expert metallurgist and smelter man, arrived at Milford this week, says the Milford Times, to superintend operations at the Majestic smelter. He is sent out by the Colorado Iron works, which is under contract to start up the smelter and operate it for a certain period, but it is understood that Mr. Kinnon will remain as permanent superintendent of the smelter. The big strike in the Gomer shaft at the Harrington-Hickory has been the most important event of the week. Two weeks ago there were indications that this shaft, at a depth of 330 feet, was getting into the vein. Last week a solid body of silver-lead ore was cut into, and yesterday the shaft had gone down into it for a distance of 15 feet, with no sign of a foot wall. It is a carbonate ore, with large bodies of crystallized ore, with large bodies of crystallized lead, very beautiful to behold. The great bulk of this ore will carry 30 to 40 per cent lead and as many ounces silver. The ore bins at the Harrington-Hickory have been completed and ore is now being hoisted from the main shaft, to be shipped to the smelter.

SALE OF SNOWSHOE GROUP.

Mrs. Emma Foster, of This City, Named As Purchaser of Montana Property.

Butte, Mont., Aug. 16.—Reports in mining circles of this city confirm the rumors of the sale of the Snowshoe group of placer claims, on Cedar creek, near Missoula. The deal was engineered by William J. Kinney, a well known mining man, who disposed of the property to Mrs. Emma Foster of Salt Lake. James Cowan, E. A. Wolfe, C. Baisdell, W. R. Mortin and Eva L. Hay of Montana. While the consideration is not made public it is understood to be in the neighborhood of $60,000. The Snowshoe group of claims consists of three pieces of placer ground, known as the Daisy, Hidden Treasure and Simmons claims. The placers are among the oldest in western Montana and have produced nearly $1,000,000 of the yellow dust.

Death of a Bingham Pioneer.

Special Correspondence.

The discover of the first lead mine in the camp of Bingham, F. J. P. Pascoe, died at his residence, 1224 Lake street, in this city, yesterday afternoon at an advanced age. In his younger days the deceased was well known in the mining camps of the west. He was born at Hayle Copper House, Cornwall, England, on Feb. 17, 1829. Thirty-one years later, in 1860, he came to Salt Lake City, and has made this city his residence ever since. His wife died about 12 years ago. Of thir family of 13 children, 10 survive, besides grandchildren and great grandchildren.

Beaver County Mining Notes.

The Success shaft is now down 62 feet and has been in good ore nearly all of the way. The bottom of the shaft is in very fine rock, it being filled with copper sulphides, and Manager Lane is greatly encouraged by the showing.

The Horn Silver Tunnel company is driving its tunnel as rapidly as two shifts can do it and some nice ore is coming out.

It is reported that a good strike of copper ore has been made by the Wasatch King company, operating in the north end of Beaver Lake district. At one point there is 20 inches of ore that carries nearly 20 per cent copper, while at another place ore carrying $60 in gold has been found. Development work will be pushed as rapidly as possible.

The law firm of Powers, Straup & Lipman, Salt Lake, has filed a damage suit against the Majestic company in the district court at Baever, in behalf of one Charles H. Camp, who claims that he was injured while working in a mine belonging to the company. He alleges negligence on the part of the company and claims that he was damaged to the amount of $1,999.

Superintendent Bah of the Imperial, who was in Milford last Sunday, reported that the big tunnel, at a distance of 100 feet from its mouth, had gone into a body of fine peacock ore. The strike is an important one, as it was made at a point 350 feet beneath the upper workings, which disclosed the presence of large bodies of copper ore, and it was for the purpose of getting under these workings that the tunnel was undertaken. Burleigh drills are now being used in the tunnel and 36 men are working at the Massachusetts and the Comet.—Milford Times.

Developments at the Dewey.

The developments in the Dewey mine at Thunder mountain continue to be of the highest importance, says the Boise Statesman. The lower level has been driven 100 feet. It is not in the main ore body, as the pitch of the vein is such that it will be necessary to get into the same ore plane opened above, but the face has been in ore all the way, though the values vary greatly from day to day.

The main east level above continues in an unbroken ore body. It has now been driven 530 feet. Only two crosscuts have been made, one of these showed 50 feet of ore and the other 70. Work is still being done on the famous rich chimney found at the surface and more of the rich ore is being found. This work is designed to determine the course of the chimney and it is being followed with great success.

CONCENTRATES.

The shipments made from Park City last week as reported by the Macintosh sampler were, as follows: Daly-West, 3,100,000 pounds; Silver King, 1,767,720 pounds.

Manager D. C. Jackling, of the Utah Copper company, is expected to arrive from Colorado in a few days.

The material for the new power plant of the Columbus Consolidated will be ordered this week.

Manager P. J. Queally, of the Kemmerer Coal company, is in the city looking after some business interests.

Advices from Park City seem to indicate that the recent strike made in the New York Bonanza is of more importance than the officers of the company in this city are willing to admit. There is a good breast of ore reported on the 250 level where the find was made, the pay streak measuring from 20 to 24 inches in width.

Manager Henry M. Crowther, of the Consolidated Alta, is at that Alta property today.

L. A. Jeffs, the well known mining man, has become a benedict. Word has reached Salt Lake of his marriage in Iowa to a former Park City school teacher.

George Moore is expected to return from the east next Thursday.

Secretary Joseph Henshaw departed Saturday night for the Royal properties in Beaver county for a several days' stay.

Mechanical Engineer J. M. Callow, of the Tintic company, is at the Yampa smelter today.

The Con Mercur directors are scheduled to hold a meeting this afternoon. Manager G. H. Dern said this forenoon that no dividend need be expected for at least another month.

The mill at the Bamberger—Delamar mines in Nevada is handling ore at the rate of 360 tons per day.

The Daly-Judge mine is sending out between 300 and 400 tons of concentrates to the smelters weekly.

The shaft at the Irus mine in the Deer Lodge, Nev., district, has reached the 200 level and cross-cutting for the ledge has commenced.

George W. Keel has been made superintendent of the Little Bell and Lucky Bill mines of Park City and entered upon his duties in that capacity today.

President W. B. Mucklow of the Majestic Copper company is expected to arrive from the east this week, and will remain until after the blowing in of the furnaces at the new smelter near Milford.

Chief Engineer A. J. Bettles of the Newhouse mines departed for Beaver county last night. He was accompanied by Joseph Dederich, the contractor, who is building the pipe line from Wah Wah Springs.

It is expected that at least a portion of the Homestake mill, now in the course of erection in the Deer Lodge, Nev., district, will go into commission within the next 90 days. Manager Hackett is making god headway with it.

Dr. W. W. Cook of Frisco is reported to have taken a bond on the Indigo Blue group of claims in the Indian Peak country in Beaver county. The owners are Mortenson Brothers of Burbank, and the consideration named is $30,000.

Secretary Brown of the Erie company visited the property yesterday, accompanied by Messrs. Johnson and Newcomer of Iowa, who are stockholders. They were very well pleased with the conditions at the property, particularly on the 250 level ,where a cross-cut is being run to cut the vein, and from which some fine samples of native copper are now being taken. A cross-cut is to be started on the 150 level. The visitors also visited te O. K. mine and Majestic smelter.—Milford Times.

WHY HE TURNED PALE.

At a shooting range there is usually a telephone from the marksman's stand to the target. The marker is thus in communication with the shooter, and if care is used in no danger. Occasionally, however, accidents happen like the following:

Sir Henry Halford was shooting at a range of a thousand yards. The day was not clear, and it was impossible at such a distance to see surely, even through a glass, the movements of the marker. Thinking the marker must be ready for him to begin, Sir Henry asked through the telephone: "Are you all right?"

The marker replied: "All right, sir, in a minute."

Unluckily, Sir Henry caught the "All right, sir," but missed the last part of the sentence by removing the telephone too soon from his ear.

He lay down and fired a shot. On looking through his telescope he was horrified to see the marker with a perfectly white face, staggering toward his shelter.

Ringing him up on the telephone, Sir Henry cried: "What has happened? Are you badly hurt?"

"No, sir, I'm not hurt," came the reply; "but I had a bucket of whitewash between my legs painting the target, and you put a bullet into it and splashed it all over my face."—London Tit-Bits.

The new Irrigation Law, in pamphlet form, only 10c at the Deseret News Book Store.

Today's Metal Quotations.

Local settling prices as reported by the American Smelting and Refining company:

SILVER,	55⅛
COPPER,	12⅛
LEAD,	$3.50

WERE DISPOSED TO TAKE PROFITS

This Was Considerably Augmented by Heaviness in the London Market.

DECLINE MET BUYING ORDERS.

Macedonian Situation Affected Foreign Bourses and Was Reflected in New York Stocks.

New York, Aug. 17.—The opening stock maret reflected some pressure, the disposition to tae profitsk being augmented by this morning's heaviness in the London market on account of the Macedonian situation. Amalgamated Copper opened with simultaneous sale of 1,200 shares at 47¼ and 46⅝, compared with 48¾ Saturday. Southern Pacific lost 1⅛ and there were large fractional declines in Union Pacific, New York Central, Baltimore & Ohio and Erie. The opening decline met large buying orders and the whole list recovered vigorously to above Saturday's closing level. The advances over that level reached a point or more in Erie, Reading, Wabash preferred, Toledo, St. Louis & Western preferred, Tennessee Coal, Colorado Fuel and Brooklyn Transit. United States Rubber preferred rose 3. Prices then fell back slightly and the activity diminished. The market was rather quiet but there were strong features here and there. Erie was a feature with a rise to 31 and the first preferred gained a point. Amalgamated Copper rose nearly a point over Saturday and there were advances of a point or more in St. Paul, Atchison, Ontario & Western, St. Louis-Southwestern preferred, C. C. C. & St. L. and P. C. C. & St. L. Kansas & Texas preferred rose 2⅜ and North American 1⅞. Rock Island preferred was down a point. Michigan Central rose 12 on one transaction.

At noon bonds were irregular.

A feverish advance of 1¼ in Southern Pacific lifted Missouri Pacific a point in sympathy. Chesapeake & Ohio and Wabash rose a point, the preferred 2½ and Kansas City Southern preferred and Iowa Central preferred 1½ and General Electric 2. North American jumped 7. There was a drop of 3 in Consolidated Gas and Linseed and of 2⅛ in Rock Island preferred.

LIVESTOCK.

CHICAGO.

Chicago, Aug. 17.—Cattle—Receipts, 36,000, including 2,000 Texans, 8,00 western. 10@15c lower. Good to prime steers, 4.90@5.90; poor to medium, 3.75@4.80; stockers and feeders, 2.50@4.00; cows, 1.50@4.10; heifers, 2.00@4.65; canners, 1.50@2.90; bulls, 2.00@4.25; calves, 3.00@6.75; Texas fed steers, 3.00@4.75; western steers, 3.20@6.65.

Hogs—Receipts, today, 42,000; tomorrow, 30,000. 5@15c lower. Mixed and butchers, 5.00@5.65; good to choice heavy, 5.30@5.45; rough heavy, 4.90@5.20; light, 5.30@5.75; bulk of sales, 5.25@5.55.

Sheep—Receipts, 20,000. Shepp and lambs steady to lower. Good to choice wethers, 3.25@3.75; fair to choice mixed, 2.50@3.25; western sheep, 2.75@3.75; native lambs, 3.25@5.75, western lambs, 4.50@5.65.

KANSAS CITY.

Kansas City, Aug. 17.—Cattle—Receipts, 11,000, including 3,000 Texans. Weak to 10c lower. Native steers, 2.75@5.30; Texas and Indian steers, 2.40@3.90; Texas cows, 1.75@2.85; native cows and heifers, 1.50@4.60; stockers and feeders, 2.50@4.15; bulls, 2.00@3.20; calves, 3.00@5.70; western steers, 2.50@4.80; western cows, 1.90@2.90.

Hogs—Receipts, 4,000. Market 5@10c lower. Bulk of sales, 5.25@5.45; heavy, 5.15@5.35; packers, 5.20@5.30; medium, 5.30@5.40; light, 5.40@5.55; yorkers, 5.50@5.55; pigs, 5.40@5.55.

Sheep—Receipts, 6,000. Market steady. Muttons, 2.80@4.75; lambs, 3.00@5.75; range wethers, 2.85@4.70; ewes, 2.80@4.75.

OMAHA.

South Omaha, Aug. 17.—Cattle—Receipts, 7,000. Market 10c lower steady. Native steers, 4.25@5.40; cows and heifers, 3.00@4.25; western steers, 3.00@4.25; Texas steers, 2.50@3.60; western cows and heifers, 2.25@3.00; canners, 1.50@2.25; stockers and feeders, 2.50@4.00; calves, 2.50@5.00; bulls, stags, etc., 2.00@4.00.

Hogs—Receipts, 3,200. Market 5c lower. Heavy, 5.10@5.20; mixed, 5.15@5.20; light, 5.25@5.30; pigs, 5.25@5.30; bulk of sales, 5.15@5.25.

Sheep—Receipts, 15,500. Market steady. Fed muttons, 3.25@3.55; wethers, 3.00@3.30; ewes, 2.50@3.10; common and stockers, 2.00@3.50; lambs, 4.50@6.50.

NEW YORK PRODUCE.

New York, Aug. 17.—Wheat—Receipts, 51,800 bushels. Declined severely this morning as a result of active unloading and decided weakness in the northwest. September, 83⅝@83 11-16.

Butter—Receipts, 10,000 packages. Steady. State dairy, 14@17; creamery, 15@19.

Eggs—Receipts, 10,000 packages. Firm. Western seconds to extras, 16@20.

Sugar—Raw, strong; fair refining, 3¼; centrifugal, .96 test, 3¾; molasses sugar, 3. Refined is firm; crushed, 5.60; powdered, 5.10; granulated, 5.00.

Coffee—Quiet; No. 7 Rio, 5¼.

WOOL.

ST. LOUIS.

St. Louis, Aug. 12.—Wool quiet and unchanged; territory and western mediums, 14½@18½; fine medium, 14½@16; fine, 13½@16.

CHICAGO WHEAT.

Chicago, Aug. 17.—There was weakness at the start, September being off ⅝ to ¾, at 82⅝@82⅞. Later the market received better support and prices firmed up for a time, but the tendency was toward weakness.

Big Horn Basin.

Irrigated lands, including water rights, at $12 to $15 per acre in the Big Horn Basin recently penetrated by the Burlington's new line. A fortune in the future if you buy now.

If you want to get ahead, you can't do better than investigate this fertile country.

Let me send you a folder which tells all about it—it's free.
