MINING, BUSINESS AND STOCKS

TRADING DULL, PRICES LOWER.

Such Was the Condition of Mining Stocks Called on the Exchange Today.

DALY - JUDGE KEPT STEADY.

But Nearly Everything Else Shows a Shrinkage - Closing Quotations And Sales.

For the 6,630 shares transferred on the floor of the Mining Exchange this morning, $1,690.37 was paid. There was absolutely no life to the market; the demand for stocks was limited and prices had a tendency to lower. Nearly everything was off color. Daly-Judge maintained its equilibrium and a bid of $6.55 failed to bring out any stock. Star Consolidated opened weak and it closed in no better condition. Tetro fell to 18½ cents in the sales, while 1,000 shares of Victor brought 3¾ cents. On the open board Daly-West and New York Bonanza were the only participants. The latter took to the toboggan and ended up with a transfer at 43 cents. The boom started in Ingot a week or so ago seems to have vanished and some who bought it a few days ago were ready to let go and take a loss. None of the Nevada stocks entered into the trading. The closing quotations and sales were:

TO OPERATE IN NEVADA.

Tri-Metals Mining Company Has Been Formed at Ogden.

Articles of incorporation of the Tri-Metals Mining company of Goldfield, Nev., have been filed with the county clerk. The principal place of business will be Ogden City. It is capitalized for $150,000, divided into 150,000 shares of the par value of $1.00 each. The business pursuit of the company will be the carrying on of a general mining and milling business, to develop and operate mines, to build or lease smelters and refining works. The company owns the following mines and mining claims situated in the Goldfield Mining district, Nev.: The Ouray, Colorado, Highland Boy and Copper Light, which they claim is worth $150,000. The officers elected for the ensuing year are: Joseph L. Carlson, president; C. L. Diffenbaugh, vice president; C. J. Humphries, vice president; S. S. Smith, secretary; B. P. Critchlow, treasurer. They also form the board of directors.

FOR ELECTRIC HAULAGE.

Utah Copper Company Will Soon Let a Contract.

The contract for the electric haulage system, which is to be installed at the Utah Copper company's mines at Bingham, will probably be let within the next few days.

One motor will be put in service as soon as the mine is equipped for it, and others wil be added, no doubt, as the milling facilities are enlarged.

Manager Jackling said today that it had not been decided whether the company would generate its own power or purchase it from the Telluride company. It is quite probable that a satisfactory contract can be made with the latter.

CONTINENTAL MINES.

Big Alta Property's New Tramway Nearing Completion.

Henry M. Crowther, manager of the Contninental Alta mines at Alta, returned last night from a trip to the New York offices of his company, where he spent a week in consultation with associates.

During his absence the construction of the aerial tramway, which is to connect the mine and mill, has gone ahead uninterruptedly and the line is practically completed except for the stringing of about half of the rope and attaching the buckets to it. The last car of rope is expected to arrive today and will be taken up the canyon to where it is to be used as soon as possible. The mill and tramway will probably go into commission within the next two or three weeks.

Manager Crowther reports that shipments of copper ore have been inaugurated and will be kept moving as rapidly as teams can be obtained to haul the product down to the samplers.

The lower tunnel, in which work has been in progress for the past year and a half, is about to make connection with the ore body towards which it has been directed and will greatly simplify the movement of ore from the mine to the tramway loading station.

The Continental Alta mill was erected after a series of experiments with the ores and is so constructed that it is believed a very small percentage of values it contains will escape.

Today's Metal Quotations:

Local settling prices as reported by the American Smelting and Refining company:

SILVER,	61⅜
COPPER, CASTING	14½
" ELECTRO	14 13-16

New York Quotations:

LEAD, easier,	$4.45@$4.55
COPPER, firm,	15½

RICH SIMMERONE.

Wonderful Values Found in This Goldfield Property.

It seems almost unbelievable, but as a matter of fact, what is doubtless the richest or shoot ever encountered in the Goldfield district is now being opened up on the Simmerone, says the Goldfield News. This is stated with full knowledge of the wonderfully rich shoots heretofore found on the January, Jumbo, Florence, Sandstorm and others. Not much has been said, and in fact not a great deal of development work has been done so far, but the showing now on the Simmerone has seldom been equalled in the history of gold mining. The rich shoot has been opened on the surface for 10 feet in length and six feet in depth. The very rich streak which was eight inches wide when first opened is now better than 10 inches in width. This streak—10 inches—will average $20,000 per ton.

In addition to this, there are 26 inches of ore that will average $5,000 per ton.

The above facts alone—big as they are—are not the most encouraging feature of the Simmerone situation. It might possibly be only a surface pocket, but the developments in the shaft which is being sunk to catch the ledge with depth, indicate the contrary. This shaft is now down 40 feet, the ledge has not yet been encountered, but the pannings from the porphyry now in the bottom indicate values of from $50 to $200 per ton. With such values in the porphyry, it seems a cinch that the phenomenal values near the surface will be maintained with depth.

Since the above was written a specimen was handed the writer in which lots of gold can be seen with the naked eye. It needs no assay to know that the value would go way up in the pictures. This rich ore is evidently arousing the cupidity of others than its rightful owners. Several parties have been acting suspiciously about the property of late, and it is believed that there are a number of parties here whose sole object is to steal high grade. These people are spotted and will be carefully watched in the future.

CONCENTRATES.

The Butler-Liberal has two cars of ore at the samplers today.

A lot of Columbus Con. concentrates are at the Pioneer sampler.

Traffic Manager Silas W. Eccles of the A. S. & R. Co. is in the city again today.

The stock of the Utah Copper company will soon be listed on the Boston stock exchange.

Director Clarence McCornick expects to visit the Columbus Con. mine at Alta in a few days.

The Green Copper company of Arizona has declared a dividend of 40 cents a share, or $345,600.

A car of ore from the Oasis mine, located in the Drum mining district has arrived at the samplers.

Manager P. T. Farnsworth of the Horn Silver inspected that Beaver county property yesterday.

General Manager Walter S. Kelley of the Yampa Smelting company is in Denver on a brief business trip.

P. W. Madsen, manager of the Century mine, has returned from an inspection trip to that Park Valley property.

Connections have been made with the winze in the Scottish Chief mine at Park City, by a cross-cut run from the 500-foot level.

The Yellow Jacket group, located in Lemhi county, Idaho, and which is equipped with a 60-ton mill, is said to have been sold to eastern parties.

An important strike has been made in the Standard mine in the Thunder Mountain, Ida., district. The vein is 50 feet wide and caries high grade milling values.

Supt. Raddatz of the Honerine mine at Stockeon, says the drain tunnel has been completed to the length of 7,040 feet and has reached a point just about under the shaft.

In the Friday mine at Sumpter, Or., Consulting Engineer John G. Kirchen reports ore blocked out of the value of $800,000. The company has determined to install a 100-ton mill during the present year.

Visitors to the smelter this week, it mattered not what day or hour, were convinced that there are mines in this district and they are sending their product to the home institution, the evidence being in bins filled almost to overflowing with ore and all available space being utilized for the storage of concentrates.—Sumpter (Or.) American.

A message from Pioche, received at the office of the Columbus Con. Mining company today, announced the death in that place of the mother of Mrs. Jacobson wife of Manager Tony Jacobson. The latter, who went to Alta this morning, was recalled and will probably leave for the Nevada camp tonight. Mrs. Jacobson was with her mother when the end came.

Eastern Oregon will have a special exhibit of cobalt ores at the Lewis & Clark fair, the Standard mine to furnish the ores and prove its claim of being the largest and richest cobalt-gold mine in the world. Manager H. H. Nicholson returned Wednesday from his conference with the state commissioners and reports they have allotted space in the mining building for the special exhibit. He will at once commence the assembling of the exhibit and ship it to Portland in plenty of time to be arranged for the best possible display.—Sumpter American.

NO DIVIDEND FROM TONOPAH

Directors of Company at Meeting Held in Philadelphia Decided Not to Post One.

EARNINGS FROM RAILROAD.

During the Month of December Aggregated $49,000—Line is an Important Asset of Company.

The stockholders of the Tonopah Mining company who expected that company to post its initial dividend this month will suffer a little spell of disappointment. The eastern representatives of James A. Pollock & Co., advise that the directors, at the meeting held in Philadelphia yesterday afternoon, decided to let the dividend pass for the present. It was stated at the meeting that the Tonopah Railroad earned for the company, during the month of December, $49,000. With the railroad broad guaged to Tonopah and the branch line built to Goldfield and other camps the monthly earnings from this source are likely to be increased many times.

The impression prevails among mining men familiar with conditions at Tonopah and who have knowledge of the Tonopah mine and its possibilities, believe that dividends cannot be very much longer delayed.

MEETING TONIGHT.

Mine Owners and Legislators to Gather At Commercial Club.

There will be an important meeting of mining men at the Commercial Club tonight. The leislative committe of the sixth general assembly will also be present in order that the latter can hear the views of some of the best known mining men of the state expressed on the matter of proposed mining legislation.

While the Commercial Club has taken the initiative in the matter, the members of that organization do not want it understood that any attempt is being made to dictate to the legislature in the matters to be considered. The object is merely to assist the legislators, who can better judge the needs of the industry in the way of legislation after hearing suggestions from the mine owners and miners.

A RECORD RUN.

Supt. Janney Expects to Make One at Utah Copper Mill Next Month.

Supt. Frank Janney of the Utah Copper company expects to make a record breaking run in February. Since the big mill at Bingham was started he has gradually increased the output of concentrates, and it is planned to bring the plant up to the maximum next month. Mr. Janney believes he will be able to handle 24,000 tons.

The Utah Copper concentrates carries about 34 per cent copper, besides the associated metals.

Blue Jay Extension Copper.

At the monthly meeting of the directors of the Blue Jay Extension Mining company, held yesterday afternoon Manager Teasdale reported that an important strike of copper ore had been made on the drift west on the 210-foot level. Assays disclosed the fact that the ore goes 29 per cent copper, 37 ounces in silver and $2 in gold. The company's property is located in the extreme southwestern portion of Beaver county.

Nevada Stock Sales.

Quincy Dividend Declared.

Paine, Weber & Company, New York correspondents of James A. Pollock & Company, wired today that the directors of the Quincy Copper company of Michigan had posted a semi-annual dividend of $3 a share, an increase of 50 cents a share over the last one. A seat on the New York Stock Exchange was sold today for $78,000.

WESTERN MARKET LETTER.

Special Correspondence.

Kansas City, Mo., Monday, Jan. 23.—A much larger proportion of the receipts of cattle last week were beef steers than usual, as the S. & S. Packing company doubled their killing here last week, account of the fire in their house at Chicago early in the week. The good supply of beef steers attracted a good many orders from eastern slaughterers, so that the good beef steers closed the week with a gain of 10 to 20 cents, in spite of the heavy run. Medium to common grades were neglected, however, and lost 5 to 15 cents. Quite a number of fed western steers sold from 4.75 to 5.25, and the fair to good ones sold at 4.25 to 4.75. Cows and heifers sold strong and higher each day till Thursday, when there was a slump in cow prices, and all the gain of the week was lost except for the best heifers, which closed 10 to 20 cents higher. Western fed cows and heifers above canners, sold from 2.50 to 3.80. Veal calves brought 5.00 to 6.25, some Idaho bulls sold at 2.50, range stockers and feeders from 2.60 to 3.85, the later price for Colorado feeders, 1,027 lbs. Some 857 lb. Oklahoma steekers sold at 3.80. The run today is 19,000 head and market is 5 to 15 cents lower. It was the opinion of salesmen that buyers were counting on a heavy run tomorrow, and only filled urgent orders today. Should the run be moderate tomorrow, strong prices will rule balance of the week. Stock cattle are 20 to 25 cents lower than two weeks ago, feeders about steady.

It is hard to find a dissatisfied sheep shipper nowadays. Markets are strong and active every day, and although the supply last week was 30,000 head, and run today is 19,000, market is steady and active today. Light weight Monte Vista lambs 65 to 70 lbs., sold today at 7.15 to 7.40. Other sales of western lambs, 75 lbs. and under were made at 7.25 to 7.40. Light Mexican yearlings sold at 6.50 and 6.60 today, and heavy yearlings at 6.25. Some choice western ewes, 104 lbs., sold at 5.15, the same figure as a large string of heavier ewes sold at Friday. Some fair wethers brought 5.50 today, good ones bring up to 5.75. All around the sheep market is in excellent condition.

BUSINESS WAS RATHER RESTRICTED

Was Owing to Disarrangement of Transportation and Telegraph Facilities.

STILL PRICES WERE HIGHER.

Stocks Were Steadily and Quietly Absorbed, Specialties Making Chief Gains.

New York, Jan. 26.—Some restriction in the volume of business on the stock exchange occurred at the opening today owing to the disarrangement of the transportation and telegraph facilities. Higher prices prevailed, especially for the coalers, Amalgamated Copper, St. Paul, and the Pacifics, but the gain did not exceed fractional limits. Northwestern opened 3¼ higher.

Amalgamated Copper displayed the most activity and sold at 72 ex its regular and extra dividends

Stocks were absorbed steadily and quietly, but specialties made the principal gains. There was no pause in the movement at the higher level.

Bonds were firm at noon.

The market's hesitation at midday proved to be only temporary and standard stocks all reached a higher level. Rather more activity centered in the railroad list, especially Union Pacific, and St. Paul, which sold above 118 and 174 respectively. In general the market averaged between 1 and 2 points higher and many stocks exceeded that. Lackawanna jumped 6 points.

Profits were sought at intervals, but the impression on prices was slight and the market rose gradually to the highest again when the selling ceased. Belated advances of a point occurred in Reading, Rock Island and the Atchisons. Great Northern preferred fell off 1½.

LIVESTOCK.

CHICAGO.

Chicago, Jan. 26.—Cattle—Receipts, 8,000 market steady to strong. Good to prime steers, 5.65@7.00; poor to medium, 3.85@5.60; stockers and feeders, 2.30@4.20; cows, 1.25@4.40; heifers, 2.00@5.25; canners, 1.25@2.60; buls, 2.00@3.90; calves, 2.75@7.00.

LOCAL MARKETS.

As soon as the trains get through from San Francisco, there will be a big relief in the fish, winter vegetable and fruit markets, as this morning they are rather bare. Figs in packages are to be had, spinach is selling at 10 cents per pound, and Utah rhubarb has fallen 5 cents, because of the increased supply. The wholesale prices of ranch eggs are weakening, and are today 50 cents per case less than last Monday. The printed prices below show the reduced rates on flours and corn, which will be welcome to the Salt Lake housekeeper. The general prices obtaining in today's markets are as follows:

Japan's Great Fighting Strength

Is due due in no small measure to the healthy stomachs of her hardy little warriors. It's a safe bet that if they could get it they would use

TEA

We drink it for drink; for the taste, for the after glow: a good deal of taste and long-time glow for the money.

Your grocer returns your money if you don't like it.

EDWARD M. ASHTON

Read This Before You Start To The East.

For your trip, no matter where your destination may be in the East, you will find the Burlington the most satisfactory route, because it offers its own thro' service to St. Louis and Chicago. You have choice of going via St. Louis and returning via Chicago, or otherwise varying your trip and remaining always the guest of the Burlington. No other road offers such a choice of routes.

Before you definitely plan a trip, let me know your prospective destination and see if I have not some very valuable suggestions.
