MINING, BUSINESS AND STOCKS

CONDITIONS AT ONTARIO ADIT

Dynamite Used to Open Way to Main Avenue from Parallel Drift.

REMOVING THE LAST CAVE.

Manager Bamberger on the Ground —Much Satisfaction Expressed.

(Special to the "News.")

Park City, May 4.—A huge charge of dynamite touched off yesterday afternoon has practically completed the great task of restoration at the Ontario drain tunnel. By this means the opening between the parallel drift run around the caved section between shafts Nos. 2 and 3, has been widened and the pent-up waters let out. Within a few moments after the shot was fired the flow in the tunnel increased from nine to 23 inches. It was learned from Manager Ernest Bamberger who is on the ground today that the water is now nearly five feet below the 1,500 level.

It may be a day or two before the last obstruccion is removed, but this work is in progress and Manager Bamberger expects to remain at the helm until the avenue is cleared.

There is much satisfaction expressed in camp today over the situation at the Ontario. It seems now that it will be but a short time until the district will take on its old time appearance of activitiyy.

ON MINING EXCHANGE.

Week Opened With Trading Fairly Brisk—Closing Quotations.

A week opened with business brisk on the floor of the mining exchange. Tunnel, Black Jack, Colorado, Mammoth, Sioux Consolidated and Seven Troughs were all stronger and in good demand. New York weakened slightly while Zenoli remained at about Saturday's quotations. Among the unlisteds, Mason Valley was a seller at $1.20; East Tintic Co., at 4½ and 4¾, Cedar at 11½ and 12, East Crown Point at 2 and 2⅛ and Federal Ely at 13. The closing quotations and sales were:

SIOUX CONSOLIDATED.

Progress Being Made With Development of This Property.

The Sioux Con. is making good progress in developing its property, says the Eureka Reporter. Since the installation of the plant in September, the shaft has been sent down a depth of 280 feet and drifting and cross-cutting to the extent of 600 feet has been done; besides this a winze has been sunk on an incline 130 feet. This makes a total of over a thousand feet of work. The ground is more or less mineralized and some low grade ore has been encountered. Manager Holdaway feels confident that the Colorado ore body will break off and become lost at its present level and southerly strike, but that it will eventually change its position and continue on a strike of several degrees east of south and then at a greater depth. The object of the incline now being sunk on the 280 level is to reach this ore body and it is already down about 130 feet. Hoisting is being done in this incline with a donkey engine and compressed air is the power used.

Mr. Holdaway claims that the strikes in the Bullock mine bear him out in his contention that the ore body will change its course which is only a few degrees to the east and says: "The change will occur in the Colorado ground and near the line."

The Sioux company will furnish water for the East Crown Point hoist.

BULLFROG MINE A DISAPPOINTMENT

Engineers Sent to Examine the Montgomery Shoshone Render Unfavorable Report.

WHAT CAUSE STOCK TO DROP

Looks Like Staff of Charles M. Schwab Had Become Over Enthusiastic.

Another failure may be charged up to Charles M. Schwab the steel king. The noted easterner, a few years ago, was a conspicuous figure in Nevada mining affairs and his name has been associated with the floatation of the Montgomery Shoshone at Rhyolite, which until a few days ago had been generally regarded as a proposition of great value. But according to advices received from the east, the engineers sent out to examine the property, A. Chester Beatty and Henry Krumb, have rendered unfavorable reports, which is the cause of the sudden decline in the stock last week in the eastern markets.

"On Tuesday information of the most enthusiastic kind was circulated that a pool of large proportions was forming to advance the stock, says the New York Commercial of the 30th inst., so that the break yesterday threw consternation into the ranks of those who had been led to believe that a favoraable report was forthcoming. In the light of the unfavorable report, many who are interested in the stock assert that there seems to be no excuse for the so-called tips that have been circulated recently suggesting an advance in the stock.

"At least 30,000 shares of the stock were dealt in and more would have been sold had not a bid been lacking.

"The official statement states that a meeting of the executive committee of the company was held yesterday morning to receive the report of the expert selected in accordance with the unanimous vote of the stockholders at their recent annual meeting to examine the company's properties.

"As there are several maps accompanying the report, and about two weeks will necessarily elapse before copies of the report can be prepared for mailing to the stockholders, the secretary has been authorized to give out the following facts:

"The report is much less favorable than was hoped. It shows that, while there are large ore reserves, the developments of the last six months have been disappointing, and that much of the ore is below commercial grade. The future value of the mine will largely depend upon the developments in the sulphide zone, to which the company is now sinking a shaft as rapidly as possible.

"In addition, Charles M. Schwab, who has personally advanced $400,000 to the company, made a statement in which he was quoted as saying that the report by no means meant that the property was worthless, but, its future was a matter that additional development alone could determine.

"Montgomery-Shoshone represents a consolidation of a number of the large Bullfrog properties and the stock, when first listed, was quoted at $23 a share, since then the decline has been continued though slow, the low price of $1⅛ a share being reached yesterday. The property and its developments represents another link in that unfortunate mining chain that the Schwab interests have been connected with in Nevada during the past three years. While there still is hope of good results, the outcome begins to convince many that Nevada has not proved to Schwab what his personal staff had held it out to him.

REPORT UNFAVORABLE.

A. Chester Beatty, the Guggenheim expert, has reported to the Shoshone company directors, says an exchange. This report was based on the examination of the mine just made by Engineer Crum, who has been sent by Beatty to Rhyolite for that purpose.

Details are not public. It is, however, officially announced that the report is distinctly unfavorable; that it declares no ore of commercial value has been opened up in six months, and that the future depends on what may be disclosed by the shaft now being driven to the sulphide zone.

The report virtually admits that outside of the very limited amount of ore blocked out, which, according to local authorities cannot exceed one year's supply at most, the future of the Shoshone mine is totally prospective.

JUDGE MARSHALL'S DECREE

Written Opinion Has Been Filed in Court Clerk's Office.

The written decree of Judge Marshall, suspending the injunction against the United States Smelting, Refining & Mining company, has been filed in the office of the clerk of the court and covers the ground indicated by the court orally last March.

Briefly stated the conditions agreed to between the attorneys of the farmers, who brought the original suit, and the smelting company are as follows:

(1) No more than 1,500 tons of ore can be treated daily at the smelter. This is to be entirely lead ore, no copper being allowed. The sulphuric acid in this ore must not exceed 10 per cent.

(2) All sulphuric acids must be neutralized by introducing zinc oxide gas before reaching baghouse so that no sulphuric acid shall exist in free state.

(3) All smoke, fumes and gases shall be filtered by being passed through the gas bag apparatus to remove all solid matter.

(4) All gases escaping from the smokestack shall not at any time exceed 75 per cent of 1 per cent in the amount of sulphuric acid contained.

(5) The plaintiffs may at any time send a committee to inspect the smelter and its methods of opreation. These committees shall be conducted through the plant and every method explained thoroughly.

(6) If any one of the complainants discovers that the operation of the smelter is still a menace to his farm and crops he must make known the fact to the manager of the smelting company.

The title of the case was James Codfrey, et al., vs. American Smelting & Refining company, Utah Consolidated Mining company, United States Smelting, Refining & Mining company, and Bingham Consolidated Mining & Smelting company. The injunction was issued on Nov. 12, 1906, and the hearing to modify came up and the order suspending the injunction under restrictions last March.

UINTAH TREASURE HILL.

R. B. Andrew, Sueprintendent, Goes To Park City to Start Work.

Supt. R. B. Andrew left for Park City this morning to organize his forces and start up work at the Uintah Treasure Hill mine, the control of which is now vested in "Uncle" Jesse Knight and associates. It will probably take several days to get everything in shape, but by the end of the week he will have things moving under a full head of steam.

ANOTHER MODIFIED DECREE.

Modified decrees in the smelter smoke case of S. M. Whitmore et al. vs. the United States Smelting, Refining & Mining company and the Bingham Copper & Gold Mining company have been handed down by Judge Marshall. The restrictions and arrangements under which the companies can operate smelters are identical with those included in the decrees handed down Saturday afternoon.

CONCENTRATES.

Samuel Newhouse is expected to reach home from New York on Wednesday.

General Manager L. Hanchett of the Newhouse mines is at the Cactus property in Beaver county today.

A. J. Davis, who is interested in mining in the Seven Troughs district, says two leases have been let on the Seven Troughs Gold Coin property.

The ore and bullion settlements last week amounted to $352,000. Saturday's proportion being $52,000, divided as follows: Crude ore and concentrate, $17,000; base bullion, $35,000.

Mine Manager E. L. Godbe of the Prince Consolidated and Ohio Kentucky Mining companies, has gone to Pioche on an inspection trip. He was accompanied by Murray Godbe and several shareholders.

The Phonelite News is the name of a new newspaper just launched at Phonelite, Nev., a camp that has been attracting considerable attention of late, and in which Utah capital is interested. Harry S. Hamilton is the editor.

George W. E. Dorsey, one of the state's prominent mining men, who is known to followers of the mining industry throughout the country, is in Reno. Mr. Dorsey is favorably impressed with this city and may decide to make his home here.—Reno Gazette.

H. Lipson Hancock, general manager of the Walleroo & Moonta Mining & Smelting company, of Moonta, South Australia, has been looking over the mines at Bingham and the big concentrating mills and smelter at Garfield. Mr. Hancock is making a general tour of the United States and Canada studying ore dressing methods.

STOCKS GIHHER, CLOSING DULL

New York, May 4.—Prices of stocks showed uniform small declines at the opening today. Canadian Pacific fell ⅝ and Louisville and Nashville and St. Louis and San Francisco second preferred advanced 1.

The market reversed its course temporarily and advanced a fraction above Saturday's closing. The whole list weakened again sharply. The principal western stocks were the leaders in the decline, but there were large sales elsewhere, Northern Pacific, Southern Pacific, Union Pacific, Baltimore & Ohio, Third Avenue and Pressed Steel Car receded 1, Great Northern preferred and Canadian Pacific 1¼, St. Paul and Manhattan 1⅜ and New York Central and Westinghouses Electric 1½.

Colorado Fuel preferred sold at 35, compared with 40¼ in April.

The rise of 1⅝ in Missouri Pacific caused the general list to harden only moderately and prices receded again later. Chicago Great Western debentures rose 4 and American Locomotive and American Ice 1. Atchison and Pacific Mail declined 1 and Atlantic Coast Line 1¼.

Bonds were irregular

The market grew gradually firmer in tone in sympathy with the increasing demand for Southern Pacific which was bid up to 82¾. Reading and St. Paul also recovered to near their high prices of the morning and there was a large demand for the copper stocks. Bethlehem Steel preferred gained 4 points and National Lead and Central Leather 1.

Trading became quiet and dull in the afternoon but the tone continued firm with prices ruling generally at about Saturday's level. Denver & Rio Grande preferred advanced 2½ and Colorado and Southern second preferred and American Smelting 1.

The market closed dull and irregular. An advance of 1⅛ in Amalgamated Copper did not hold the market and prices yielded to the lowest of the day. Union Pacific was carried down 2⅛, St. Paul 2, and there were fractional rallies from the lowest.

LIVESTOCK.

CHICAGO.

Chicago, May 4.—Cattle—Receipts, 20,000. Market strong to 10c higher.

PRODUCE.

CHICAGO.

Chicago, May 4.—The local wheat market opened strong today and trading was active. An advance of one penny at Liverpool brought out liberal buying orders from commission houses. The May delivery was erratic, the price ranging between 104½, the opening price, and 101½. July opened ⅝ to ⅞ higher at 89¾, to 90⅛, and sold at 90⅜.

The corn market was strong on active demand for the July delivery by shorts, firm cables and wet weather in the corn belt were the chief bullish influences July opened ⅛@¼ to ⅜@½ higher at 64½ to 64¾, and for a time held within that range.

Commission houses were active bidders for oats, but offerings were light. Wet weather and the strength of wheat and corn were the chief reasons for the urgent demand. July opened ⅜@½ higher at 47⅜ to 47½ and sold at 47⅝.

Provisions were weak because of a 10 to 15c decline in live hogs. July pork was off 5 to 10c at 13.30 to 13.35. Lard was down 2½ at 8.42½. Ribs were 5c lower at 7.17½.

Reports of heavy rains in Kansas and Nebraska forced the price of July down to 85⅝. Later the market rallied because of a heavy decrease in the visible supply and the close was strong with July 1⅝c higher at 90⅝.

The corn market was strong all day. Prices reacted slightly with wheat, but the close was strong with July ⅝ higher at 64⅞@65.

Close—Wheat—May, 1.03⅝; July, 90⅝; Sept., 86.

Corn—May, 70@70⅛ to 70¼; July, 64⅞@65; Sept., 63.

Bar silver, 52⅞.

Mexican dollars, 47c.

Government bonds irregular; railroad bonds irregular.

INDIA SOURCE OF UNEASINESS TO ENGLAND

London, May 3.—India is a source of considerable uneasiness to the British government at the present moment. The difficulties with the Mohamads seemed on the eve of settlement, when ,on Saturday, according to reports received here, a new danger threatened. An attempt was made by a large Afghan force, numbering from 13,000 to 20,000, which went across the border divided into two bodies, to seize the blockhouse of Khyber pass, near Landi Ksol. The attack was repulsed with trifling casualties among the British, but the Afghans remained in front of Landi Ksol and another body is reported to be moving into the Bazar valley by way of Lisote pass.

Gen. Wilcox, who is in command of the forces, recently despatched to quell the troubles, has gone to Jamrad, a few miles west of Peshawr, at the entrance of Khyber pass, and is hastening forward his troops to meet the new development.

All frontier telegrams are carefully censored at Simla. From Calcutta comes news of the discovery of a plot to murder Europeans by means of bombs. The conspiracy appears to be of an extensive character, and many arrests have been made. The responsibility for the plot is placed on the natives, a number of incriminating documents having been seized together with a supply of bombs and other explosives.

The discovery of the plot was made through the arrest and confession of the author of the bomb outrage at Almocufferpur, the capital of the province of the same name in Bengal, in which two Europeans were killed.

The morning newspapers referring to the Indian news generally concur that there is no cause for alarum or for grave anxiety, if, as is hoped, the ameer is not directly responsible for the attitude of the Afghan border tribes, but they point out that until the ameer's attitude is definitely known, it behooves the government to be alert and prepared for eventualities.

NOTICE TO CONTRACTORS.

Notice is hereby given that sealed bids will be received by the undersigned up to 1 p. m. May 14th, 1908, for the material and labor required in the erection of an addition to the Gymnasium Building at the University of Utah, at University site, Salt Lake City, also for the erection of a shop building for the Branch Normal at Cedar City, Utah, for the University of Utah ,and according to plans, specifications and drawings which are open for inspection of the bidders at the office of Dallas & Hedges, Architects, in the Deseret National Bank Building, at the corner of Main and First South Streets, in Salt Lake City, Utah, and all bids and proposals at the above time will be opened publicly and read in the regents' office at the Deseret National Bank, in said city.

All bids must be addressed to "University of Utah, Salt Lake City, Utah," and marked in the lower left hand corner, "Bids," or such bids can be delivered to the Board of Regents at the said time and place.
