MINING, BUSINESS AND STOCKS

BULLOCK STRIKE TO MAKE SHIPPER

Bullock Vein Produces Ore That Will be Sent to the Smelter.

EUREKA LILLY FINDS CAVE.

Eagle and Blue Bell to Push Drift Into King William Property—Tintic News.

Among the interesting developments of the Tintic district this week is another strike on the Bullock property and the promise that this property will again be making shipments to the Tintic smelter. Manager Benjamin H. Bullock declares that arrangements are now being made with the smelter for the treatment of the ore which was struck yesterday in the drift off the 210-foot level of the property.

The night shift Wednesday broke into the ore just before going off shift and yesterday the drift was pushed through the Bullock vein which was encountered. The ore taken out is declared to be a rich copper sulphide and of a shipping quality. The vein is 2 feet thick and was struck in the west drift, 103 feet from the shaft. This drift will also be sent on to catch the big railroad vein which is 15 feet further away. In the old workings this vein was about three feet wide, but was not as rich as the Bullock vein.

The catching of the Bullock vein now opens up three veins in the property. The first two encountered are two feet and one foot wide, and contain good ore, which after sorting can be shipped.

The Bullock property has as good facilities for shipping as any in the district. The Salt Lake Route tracks come up to the ore bins, so that there will be no trouble in getting the ore to the smelter. From the old workings in the property seven cars of ore were shipped and Manager Bullock declares that he is confident that there is plenty of ore in the property.

The Bullock property and work is being pushed in a manner that promises some good development work there this summer.

OPEN THREE VEINS.

The encountering of the three veins of ore on the 210-foot level proves that the body is continuous to the surface, and that it extends for a great distance through the property. With systematic mining there is an excellent opportunity of the mine being one of the producers of the district.

At the Eureka Lilly property, which is in the same district, a cave was encountered on the 300-foot level, and also on the 200-foot level. The cave was first struck Wednesday night on the 300-foot level, at a place almost directly beneath the point on which it was encountered on the 200-foot level.

The cave as yet has not been fully explored as the two openings form a direct air passage that will not allow a light to remain long in the opening. This is looked upon as a good indication of ore in sight on this property, as it is in line with the East Tintic Development, where the cave formation brought good ore, and the McKinley, where a good cave was also found.

Superintendent W. M. Owen of the Eagle and Blue Bell property has received instructions to put a force of men to work on the 1,400 foot level and push the drift into the King William property. To reach the King William ground it will require about 280 feet of work and will take about 60 days. As soon as the objective point is reached a raise will be made from the 1,300 foot level of the King William to the 1,400 level.

WORK ON IRON HAT.

The Iron Hat mining company has let a contract to sink 100 feet, to Fred Wahlberg and Conrad Anderson, apd operations were commenced Wednesday. A number of mining men who have visited the property declar that ore will be encountered on the property as soon as the works get below the iron blowout. A meeting of the directors was held at Robinson Tuesday at which the plans for the future of the company were laid out.

The Iron King Mining company has applied for a patent on a number of its claims situated in the east Tintic section.

A. G. Youngston has accepted the position of master mechanic at the Gemini mine, vice T. B. Sullivan, resigned, who has accepted a similar position with the East Tintic Development company.

Superintendent Ralph Kellog of the East Tintic Development Co., reports that he has his michinery in place. He will obtain water from the Bestelmeyers, and will be ready to start the mine up before April 1st.

SLOW DAY FOR STOCKS.

Smaller Securities Hold Sway on the Local Mining Exchange.

Small stocks were the feature of the slow market on the local mining exchange this morning. For several weeks conditions in the east have not been such as to encourage the western operators to continue their work in mining ventures and this combined with the uncertainty of tariff conditions. This morning the smaller stocks were the busiest. They came in to make up the large volume of business, with only a limited amount of money changing hands.

The number of shares of stock sold this morning was 92,606, representing $26,393.82.

The latest strike in Bullock caused the stock to move up on the board today and 5,000 shares changed hands at 9 cents, buyer 60 days. On the regular board 13,500 shares changed hands at 8½ cents, and 2,000 shares were sold on the open board at the same price.

Columbus Consolidated continues in its upward course and on the open board was selling at $2.10 this morning. Prospects of the Yankee Consolidated striking something almost any day has sent the stock up slightly and made it more active. Ohio Copper is beginning to get back to its old level after the heavy slump which sent it slumping down to the lower levels several days ago.

The curb market was more active today than it has been for several days and a large array of stocks were out. Buffalo Consolidated, which hails from the Ophir district, and has aroused considerable talk on account of some of the showings made, sold at 10 cents per share this morning. Ely Witch crossed the rail for 21 cents today and Decker Canyon caused considerable activity at 5 cents a share, which is the par value of the stock. Schwab Consolidated sold in bunches. It was disposed of at 2¼ cents, 2¾ cents and 3 cents. Eureka Lilly was offered at 20 cents and 10 cents was bid. Grutli was offered at 7 cents and 6½ cents was the bid.

COMPANY TAKES UP NOTES.

United Smelters Railway & Copper Co. Makes Payment for Addition.

With the payment of $16,831.67 to the First National bank of Cheyenne, a few days ago, the United Smelters Railway & Copper company, took up more of the notes and indebtedness assumed by it in taking over the property of the Penn-Wyoming Copper company. The indebtedness assumed was $1,390,789.62., principal and interest. Of this amount $67,000 was paid in Denver a week ago, and $125,000 was paid in Pittsburg, Pa., three weeks ago.

This shows that the company is now in absolute control of one of the largest mines in Wyoming. The United Smelters company is capitalized for $10,000,000. The company has in its treasury from $350,000 to $300,000, and this with the best facilities for putting its ore on the market should make the company one of the most influential in Wyoming.

The mines at Encampment will shortly be developed in a manner that has never been seen before in that district and means that new life will be instilled into that camp.

TETRO DECLARES DIVIDEND.

Stockholders Have Opportunity of Taking Either Stock or Money.

Stockholders of the Tetro Mining company may either receive a dividend of 8 cents a share on all the stock of the company, payable April 20, books to close April 16, or take stock in the Plutus company.

According to the proposition offered by the Plutus Mining company, which took over the Tetro property, the stockholders can either accept the dividend or receive share for share in the Plutus company. The property of the Tetro company was sold for $24,000, which on the 300,000 shares of the company would be 8 cents a share. On this same valuation, the Plutus company set aside 270,000 shares of stock with which to purchase the company so that the value if taken up in stock would be 8 8-9 cents a share. The settling of the dividend by taking stock in the Plutus company is only for the individual owners and has nothing to do with the affair of the Tetro company.

The stockholders who do not wish to trade in their stock can secure a cash dividend, after which the affairs of the company will be wound up and the concern disincorporated. That the shareholders are willing to go into the Plutus company is shown by the number who have already signified their willingness to accept stock. Already 200,000 shares of stock have been turned in for transfer. The right to exercise the option expires on April 23.

CONCENTRATES.

A dispatch from Philadelphia yesterday stated that the Tonopah Mining company has posted its regular quarterly dividend of 25 cents and an additional dividend of 10 cents a share.

The pipe line at the Boston-sunshine property has been finished and everything is in readiness for this property to start operations. Manager Wood declares this will not be later than Monday.

An examination of the old Kissard mining property at the head of Dry canyon, between Stocaton and Ophir, has just been completed and there is a strong probability that it will be purchased by the American Mining, Security and Redemption company.

The Niagara tunnel, owned jointly by the Silver shield and United states companies, has been finished to the Gasena shaft workings on the United States ground. This will furnish the United States company with an opportunity to mine by the caving system and carry its ores away by electric haulage.

Perry D. Delmas, manager of the Delmas Copper company, yesterday received word from C. W. Wheelock, a mining engineer from New York that the property at Palisade can now be reached. Mr. Wheelock is examining the Delmas properties for eastern people who have promised to finance the deal. For more than a month it has been impossible to reach the property on account of the deep snows.

At a meeting of the directors of the New Eldorado Mining company, which is operating in the old Ashbrook district in the northwest corner of Boxelder county, it was decided to push work on the property from now on and have it in shape for production this summer. Thomas Sherry is president of the company and he asserts that some of the ore already found there runs 23 per cent lead, 14 ounces silver, and $1.80 in gold. Mr. Sherry declares that two other properties will also be heard from in that district this summer. They are the Nonpareil and friendship.

RICH COUNTRY IS TAPPED BY LINE

"When the Moffatt road is completed into Salt Lake, the distance between this city and Denver will be shortened by 172 miles," said S. H. Babcock, formerly traffic manager of the Rio Grande Western in this city, afterwards connected with the Moffatt road as head of the construction department, and now traffic manager for the Salt Lake Commercial club traffic bureau. "There will be a 15-hour passenger schedule put on between the two cities, and business and social relations between the two types of western towns will become closer and more beneficial to all concerned.

"I have just received an industrial map of the Moffatt road," continued Mr. Babcock, "which shows resources almost immeasurable lying in front of that line. There are hundreds of millions of feet of timber, untold quantities of soft and anthracite coal; the largest gilsonite and asphalt deposits in the world; gold, silver, iron and lead ore; agricultural and fruit lands an empire in themselves; and for scenic beauty, in my mind there is no road in the country to compare with this line. To show something of the ruggedness of the country through which the road was built, one single mile of track in the Egeria canyon, in northwestern Colorado, cost $200,000 to prepare for the ties alone. There is some of the most gorgeous natural scenery between Denver and Steamboat Springs, to which point the road is already completed, it was ever my pleasure to behold.

WHERE MONEY WAS RAISED.

"The money to build the Moffatt line as far as it has been constructed, was put up by a half dozen wealthy men of the Colorado capital, the syndicate being headed by Col. D. C. Dodge, formerly with the Rio Grande in this city, and Mr. Moffatt and others. These western millionaires have proven true to their western homes, and have expended their fortunes in building up the resources of the west. Their number was recently depleted by the death of Gen. Palmer, and I want to say right here," said Mr. Badcock, with much earnestness of manner, "Gen. Palmer did more single handed for Colorado than any other hundred men in the state; and had his plans been carried out, he would have done just as much for the state of Utah. He contemplated extending the Rio Grande road, which he built, into southern California, and through the Colorado Southern he would have possessed the same gulf outlet as now posessed by Hill. The general's plans were interrupted, however, by the purchase of the Denver & Rio Grande by the Gould interests, and his plans were not matured."

In response to a query of the route to be followed by the Moffatt road through Utah, Mr. Babcock followed the line of preliminary survey, which breaks into Utah in a direct line west of Steamboat Springs, the first station reached in this state being that of Jensen. Thence the road passes westward a distance of about 12 miles south of Vernal, and touches at Myton, and Duchesne on the reservation, passing up Currant Creek canyon, thence northwestward to Indian and Daniels pass, through which the town of Heber is reached. The road then passes down through Provo canyon on to Provo and thence to Salt Lake City. When the great tunnel now being bored through the Rockies is completed, the Moffat road will have an easy grade and will be in shape to enter the lists with the rest of the roads for local and through business."

PRICE MOVEMENT WAS UPWARDS

New York, March 26.—The movement of prices of stocks was upward in the opening dealings today, with a few scattered exceptions. The gains were limited to small fractions outside of the Hawley group and Delaware & Hudson. The dealings were quite active.

A number of stocks selling below 50 were bought on a liberal scale with the principal demand for the industrials. The active stocks showed small heaviness for a while, Reading reacting ¾. The general tone was firm at 11 o'clock.

Missouri Pacific was pushed upward 1⅞, but the general list did not respond and receded afterwards. St. Louis and San Francisco second preferred gained 1, and Chicago & Alton and American Smelting preferred declined 1.

Bonds were firm.

The market stopped declining, but theer was no effort made to force a rally.

Outside of a rise in Atchison to 1.04¾ there was no feature. A few selected stocks were a trifle higher. Business grew better as the day advanced.

LIVESTOCK.

CHICAGO.

Chicago, March 26.—Cattle—Receipts, estimated at 1,000; market strong. Beeves, 4.65@7.00; Texas steers, 4.40@5.25; western steers, 4.00@5.50; stockers and feeders, 3.35@5.50; cows and heifers, 2.30@5.00; calves, 5.75@6.50.

Hogs—Receipts, estimated at 13,000; market 10c. higher. Lights, 6.60@6.85; mixed, 6.60@7.45; heavy, 6.75@7.65; rough, 6.70@6.90; good to choice heavy, 6.80@6.85; pigs, 3.50@6.50; bulk of sales, 6.75@6.90.

Sheep—Receipts, estimated at 4,000; market steady. Native, 3.60@6.25; western, 3.60@5.75; yearlings, 6.15@7.25; lambs, native, 5.75@8.20; western, 5.75@8.20.

PRODUCE.

Chicago, March 26.—A decrease of nearly 2,000,000 bushels of the visible supply of wheat in Argentina compared with last week's available stocks prompted considerable buying of wheat on the board of trade here today. Many of those who had gone home short last night were eager to cover such sales and several leading bulls were also fairly active bidders. Offerings were scattered. The market was quite strong early in the session. Prices at the start were a shade to ⅝ higher than the previous close, May being at 1.17⅝ to 1.17¾ and July at 1.03⅞ to 1.04⅛. Later May advanced to 1.17⅞ while July sold up to 1.04⅝.

Ideal weather for farm work caused free selling of corn resulting in moderate weakness following a firm tone at the start. Prices at the opening were a shade lower to ⅛ higher with May at 66⅝ to 67. After touching 67⅛ May dropped back to 66⅝.

Renewed selling pressure on the deferred months caused weakness in the oats market. The selling was inspired chiefly by favorable conditions for seeding in the southwest. May opened a shade lower to a shade higher at 54⅝ to 54¾, and sold at 54⅝, and then receded to 53⅞.

Provisions were firm but the volume of trade was small. A 90c. to 15c. advance in live hogs had a bullish influence. Prices at the opening were unchanged to 5c. higher.

Wheat—Sentiment in the pit was bullish all day, reports of a brisk business belging to strengthen the market late in the day. The high point for May was 1.17⅝ and July 1.04⅝. The close was strong with May up ⅝ @⅞c. at 1.17⅛ and July up ⅝ at 1.04⅝.

Corn—The market was heavy, the balance of the day. The low point for May was 65⅛, which closed easy ⅛@⅜c. lower at 65⅝.

Close—Wheat—May, 1.17⅛; July, 1.04⅛; Sept., 98⅝@98¾; Dec., ⅝.

Corn—March, 65⅝; May, 65⅝; July, 65⅛@65⅜; Sept., 65⅝; Dec., 57⅝.

Oats—May, 54⅞; July, 46⅝; Sept., 39¼.

Pork—May, 17.82½; July and Sept., 17.85.

Lard—May, 10.17½; July, 10.27½@10.30; Sept., 10.40; May, 9.37½; July, 9.52½; Sept., 9.67½.

Rye—Cash, and May, 80c.

Barley—62@63c.

Timothy—March, 3.80.

Clover—March, 9.00.

CHICAGO.

Chicago, March 26.—Butter—Steady. Creameries, 25½@29½; dairies, 25@.

Eggs—Steady, at mark, cases included, firsts, 18½; prime firsts, 19½.

Cheese—Firm. Daisies, 16¾@18; twins, 15; young Americas, 15½; long horns, 15.

Elk Coal

The Perfect Coal For Home Use

A coal that does not keep you busy carrying out ashes all the time; one that does not fill up the pipes with soot; one that is free from sulphur and slate, and does not form clinkers—that is the coal that is to be desired above all others. Most dealers claim their coal possesses these qualities, but ELK COAL is the only one that "makes good" on these claims.
