"Live Books for Live Teachers."

THE NORMAL SERIES

OF

ARITHMETICS : MATHEMATICS,

BY

EDWARD BROOKS, A.M.,

Professor of Mathematics in the State Normal School of Pennsylvania.

Comprising a full course for

Common Schools, High Schools, Academies, Seminaries and Normal Schools.

THE PLAN, SCOPE, THOROUGHNESS and perfect simplicity of this Series commend it to the judgment and approval of all who examine it. It embraces the following works:

BROOKS' NORMAL PRIMARY ARITHMETIC.

Designed for the child's first text-book in the science of Arithmetic. A thoroughly philosophical and original work in its plan and treatment.

BROOKS' NORMAL ELEMETARY ARITHMETIC,

For Primary Schools, is designed to furnish an Introductory Course to Written Arithmetic, and is confined to the rules and problems most used in every day business.

BROOKS' NORMAL MENTAL ARITHMETIC,

A complete text-book upon the subject of Mental Arithmetic, acknowledged to be the most philosophical and exhaustive work of the kind that has yet appeared, is now used as a standard work in the majority of the best schools in Pennsylvania. It contains a few pages of Mental Algebra, showing the use of the algebraic letters in working problems involving unknown numbers.

BROOKS' KEY TO NORMAL MENTAL ARITHMETIC,

A lucid expositor to the above, contains many excellent suggestions and as an assistant to the teacher of Mental Arithmetic, or the private student, will be found of great value. It contains valuable suggestions on methods of Teaching Mental Arithmetic, and also an interesting collection of problems for working up classes during a dull exercise.

BROOKS' NORMAL WRITTEN ARITHMETIC,

Designed to accompany the Normal Mental Arithmetic, is an admirable practical Work for Popular use, contains many new and simplified demonstrations in Geometry and Trigonometry. It presents the practical part of the subject in which more space is usually devoted to it, without breaking the chain of logic, and is regarded as a most valuable addition to our educational literature. A number of Practical Problems are given after each Rule, applying the principles taught in the demonstrations. Theorics for original thought, without demonstrations, are also given, requiring pupils to try their unfledged wings in demonstrating without the aid of the text.

The publishers of the foregoing works, Messrs. Sower, Barnes & Potts, have in their possession letters recommending the entire series in flattering terms from a large number of the most prominent educational magnates in this country, including such names as John S. Hart, LL. D.; James Waters, Principal Academy Department, Union College, Schenectady, Pa.; Thos. C. Porter D.D., Professor Natural Sciences, Franklin and Marshal College, Lancaster, Pa.; Joseph W. Wilson, Professor of Practical Mathematics, Philadelphia Central High School, and many others.

NEW SCHOOL PUBLICATIONS

OF

SOWER, BARNES & POTTS,

No. 27, North Third Street, Philadelphia, Penn.

THE UNDERSIGNED, BY AN ARRANGEMENT with George W. Childs, Esq., the eminent Book Publisher, respectfully announce that they have become sole Publishers of his

Entire List of School Publications,

and that they are now preparing new editions of the following well known and highly appreciated works:

I.

PETERSON'S FAMILIAR SCIENCE

OR

SCIENTIFIC EXPLANATION OF COMMON THINGS;

To which is added Professor John Henry Pepper's popular treatise on Scientific Amusements for Young People; 12 mo., 631 pages, containing 100 illustrations. The vast field covered by the Modern Sciences, and the enormous amount of labor and study required of pupils to attain even a general knowledge of the multitude of absolutely important subjects pressing upon their attention, awakening grave discussions among the best educators concerning the limits of endurance of the youthful mind and causing them anxiously to look round for more condensed works, containing clear, logical, but short and easily understood epitomes of the subjects of which they treat.

It has been the especial aim of Sower, Barnes & Potts to supply this great want in their School Publications, and this work on *Familiar Science* has been accepted by them as admirably calculated to meet the educational necessity above referred to. The immense sale the work has already had is the best evidence of the high estimate in which it is held among those best able to judge of its merits.

II.

FAMILIAR SCIENCE; 18 mo., 305 pages

This small work (an excellent abridgement of the foregoing) has also had an immense sale, and in announcing a new edition the publishers feel assured that the demand for it will be largely increased.

III.

SHEPPARD'S CONSTITUTIONAL TEXT BOOK.

and

IV.

SHEPPARD'S FIRST BOOK OF THE CONSTITUTION

Two Works—the former more comprehensive, the latter small and more condensed—written by one of our eminent Philadelphia jurists, containing the latest amendments to the Constitution, and recommended in the highest terms of approval by the first legal minds of the country, in nearly every State in the Union, North and South, including such names as the late Wm. L. Marcy, Wm. H. Seward, Theo. Frelinghuysen, George M. Dallas, Ellis Lewis, Alonzo Potter, J. R. Ross, John M. Clayton, Beverdy Johnson, Asbury Dickens, Wm. P. Finley, Samuel K. Talmage, T. A. Marshall, Linn Boyd, John M. McLean, Lewis Cass, and many others. No one can read these flattering testimonials without feeling that the Books referred to possess a degree of merit seldom if ever attained by any other educational works. The Publishers would respectfully suggest to intelligent educators throughout the land, that the great events from which our country has just emerged have vastly intensified the importance and value of the information which these works are so well calculated popularly to impart. The late struggle of the nation, and the changes which it has produced, have created a desire and a necessity among all classes of people to know and understand more about the foundation upon which our Government rests, and of the fundamental laws which govern our movements, and this desire is met by the works in question.

V.

BOUVIER'S FAMILIAR ASTRONOMY,

Complete; 8vo., 400 pages.

VI.

BOUVIER'S FAMILIAR ASTRONOMY

Abridged; 8vo., 256 pages.

These elegantly printed and superbly illustrated works have been made Text Books in many of our most celebrated schools and colleges. Their plans, accuracy, and simplified mode of teaching Astronomy, have received the commendations of the learned both in Europe and America. The larger work is divided into five parts. The first treats of the laws which govern heavenly bodies; the second, of the components of the solar system, and the phenomena attending their movements; the third, of the sidereal heavens, embracing the fixed stars, clusters and nebulæ; the fourth, the principal instruments used in the observatory; and the fifth, of the globes, to which are appended two celestial maps and a comprehensive Astronomical Dictionary. In the "Abridged" volume the contents are identically the same, excepting that in the latter all is omitted after Part fourth. This late eminent author and astronomer, Dr. Thomas Dick, of Scotland, in reviewing this educational work says:

"Bouvier's Familiar Astronomy embraces almost everything requisite for imparting to general readers a knowledge of every branch of Astronomical science, and the information is communicated in plain, simple and correct.

"The volume is handsomely got up; the pictorial illustrations are beautiful and accurate, particularly those which exhibit the nebulæ and other phenomena of the sidereal heavens. It is a work which reflects great merit on the accomplished lady who produced it, and will hand down her name with honor to future generations."

In this estimate Dr. Dick is sustained by such eminent compeers as Sir John F. Herschel, Stephen Alexander, Professor of Astronomy, Princeton College; John H. Pepper, Esq., Director of the Royal Polytechnic Institution, London; Dr. J. P. Nichol, Professor of Practical Astronomy, in the University of Glasgow, Scotland; Lieut. M. F. Maury; Rear Admiral W. H. Smith; W. H. C. Bartlett, Professor of Astronomy, Military Academy, West Point; George Bishop, Proprietor of the Regent's Park Observatory, London; Sir David Brewster, Author of Brewster's Optics; and numerous others.

DR. P. H. CARDWELL

HAS THIS DAY EFFECTED AN arrangement by which he will be able in the future to supply all persons who may desire, from a single to a full set of teeth, on the

VULCANIZED RUBBER BASE.

Being the latest improvement in our profession, and having been sufficiently tested to warrant its utility, we take pleasure in recommending it as being far preferable in many respects to any other base heretofore used. It can be used in many instances where all other materials fail. No one need, therefore, despair. Call on me, give me your work and I will demonstrate these facts.

Remember that a full set of teeth on this method cost only half what they would on gold, and yet preferable in all respects.

m8tf Respectfully, P. H. CARDWELL.

GOOD NEWS TO THE TOOTHLESS!

DR. J. FOUCHE HAS SECURED the assistance of a thoroughly competent workman, by which he will be enabled in future to insert Artificial Teeth on Gold, Rubber, and all other substances used for bases, in the most perfect manner and with the greatest despatch, at prices below the regular Cincinnati rates, and greatly below any rates heretofore charged in this locality. Why should any one "Gum it" when teeth can be had so cheap? If you wish the luxury of thorough mastication, give me a call, and if I don't satisfy you both in work and prices, you will be hard to please. mar27tf

MISCELLANEOUS.

TO THE MERCHANTS AND FARMERS OF TENNESSEE.

THE UNDERSIGNED RESPECTFULLY offers you his services as a Purchasing and Selling Agent.

His experience has been acquired by an actual and exclusive purchase and sale, during the past twenty years, of Dry Goods, Clothing, Boots and Shoes, Notions, Groceries, Hardware, Queensware, Stoves, Agricultural Implements, &c., for both the wholesale and retail trade.

During the past year he has spent much time among the Manufacturers of the North, with many of whom he has made arrangements to fill cash orders sent through him at their lowest prices; especially in Boots and Shoes, Umbrellas, Photographs and Ambrotype Materials, Table and Pocket Cutlery, Cane-Seated Chairs, Portable Steam Saw Mills, Horse Powers, Mill Findings, Shingle and Lathe Machines, Railroad Supplies, Buggies and Harness, Cotton Gins of the best make, Agricultural Implements, and Farming Machinery of all kinds, together with all kinds of Machinery necessary for the manufacture of Cotton or Wool.

He has also made arrangements to supply the best Petroleum, Lubricating, and Burning Oils, and Oil Lamps, and will be able to procure anything to be had in New York or New England upon the shortest notice and at the lowest price.

☞ Will also act as Agent to adjust all kinds of debts created before the war, due to parties in any of the Northern Cities, viz:

He will also take great pains to sell all consignments at the best rates to be had in this market, and will make liberal advances upon consignments when in store.
