READING PLAN IS ATTACKED.

Two Stockholders Intervene to "Protect Their Interests."

PHILADELPHIA, Jan. 7.—Two stockholders of the Reading company asked leave to-day in the United States District Court to intervene in the matter of the aggregation plan for the Reading company and affiliated corporations, which will be submitted to the court as a result of its decision to dissolve the alleged illegal combination.

The stockholders are William B. Kurtz, holding 4,000 shares of second preferred, and Madge Fulton Kurtz, with 1,000 shares of the same stock. They desire to intervene to protect their interests. The court took no action.

"MODERN MILLER'S" OUTLOOK.

Special Despatch to THE NEW YORK HERALD.

CHICAGO, Jan. 7.—According to the *Modern Miller* "snow covering and weather conditions are not seasonal and have led to some apprehension as to the welfare of the new winter wheat crop. No harm to date is indicated, but the condition of the crop is spotted, particularly in soft winter sections. Illinois and Indiana show fly damage. No marked change in the attitude of producers is shown. Interior movement of wheat continues to be restricted."

FINANCIAL NOTES.

R. N. Felter, formerly of the National City Company, is with Bonbright & Co., Inc.

Stroud & Co. have prepared, in condensed form, facts and figures covering United Electric of New Jersey first mortgage 4s, due in 1949.

Independent Warehouses, Inc., has declared a dividend of $2 a share, payable on January 15 to stockholders of record on January 10.

The New York Electrical Society will hold its 388th meeting in the auditorium of the Engineering Societies Building, 29 West Thirty-ninth street, on next Wednesday night. Henry L. Doherty will be the principal speaker.

C. I. Hudson & Co. have prepared a circular on Liberty bonds describing the investment position of the several issues at current price levels.

Charles F. Zeitner, formerly manager of Ervin & Co., is with McClure, Jones & Reed.

FINANCIAL NEWS AND COMMENT

Stocks Continue to Move Forward—Business Sentiment Is Improving.

Under the leadership of industrial stocks, which had been weakest in the liquidating movement of a fortnight ago, the market swept forward again yesterday with much force. The rapidity of the rise of steel and other producing company issues was almost as great as on Thursday, and the turnover expanded substantially. A late reaction on realizing sales caused many of the more active shares to retrace part of the ground gained earlier in the day, but this movement was not extensive enough to prevent a record of net gains running from 1 point to more than 3 points. Northern Pacific and New York Central advanced a point or more, but the rails generally were inclined to hesitate, suffering, apparently, from a lack of trading interest which was concentrated to a degree in such issues as Crucible Steel, International Paper, Mexican Petroleum, Stromberg Carburetor, United States Industrial Alcohol, Steel common and Worthington Pump. The presence of these shares in the forefront of the rise suggests that short covering supplied much of the day's business, and the rapid upbuilding which occurred in them indicated that the short interest was in a hurry to reduce its commitments.

Friday is usually a day in the progress of the market upward which brings out considerable profit taking by traders who had bought at lower prices. The fact that the conventional process was not followed yesterday, in fact was reversed, promotes the thought that a change of conditions outside the market was having an influence upon sentiment. Some phases of an alteration of market factors were discernable during the day as they have been all week, but in all respects the changes were not favorable. Additional information about depressed business in iron and steel is looked for in the forthcoming statement of orders received during December by the Steel Corporation. The copper market has not yet begun to reflect the reported intention of some leading producers to withold offerings until better prices can be obtained. The reopening of mills in several important industries, after year end inventory taking, has evidently been accompanied by only moderate buying of goods for future delivery, and the time elapsed since Christmas business was completed is still too short to show whether replacement of stocks is to be done on a large or a moderate scale. With these conditions in mind, it is easier to believe that the technical status of the stock market has had more to do with the advance this week than speculative measures to anticipate industrial activity in the near future. Nevertheless, sentiment is a real power behind fluctuations of securities and it is certain that sentiment in regard to industry is distinctly improved in contrast to a month ago. The mercantile reviews of the week note that, as *Bradstreet's* puts it, "more confident buying, albeit in small lots and for immediate delivery," has appeared in certain textile lines and the tone of retail trade has been helped by a "better after holiday distribution of heavy wearing apparel." New England cotton mills, it is asserted, are gradually increasing their operations, and collections in various merchandising fields have increased this week.

Investment buying of bonds continued on a broad scale, Liberty bonds again being in as heavy a demand as the day before, and prices rose upward a half point. While money rates have not become quotably easier, it was reported in banking circles that offerings of time funds on collateral were increasing. The demand for acceptances is greater than the supply coming forward from day to day, which seems to foreshadow an easing of discount rates in the near future. The foreign exchange market has acted for the last week as though expectations of improved money conditions were influential in directing rates, despite the quick set back of quotations on Thursday. Sterling yesterday recovered 3½ cents, with a final sight draft rate of 3.63¾, and other markets were firm.
