FINANCIAL NEWS AND COMMENT

Unfavorable Advices Cause Little Stock Selling—Money Returns to 7 Per Cent.

In view of the accumulation of unfavorable news and events, the feature of yesterday's dealings in stocks was the absence of really extensive selling pressure. Prices of active issues receded a point to 2 points, but the fact that the turnover on the New York Stock Exchange was the smallest of the year for a full five hour trading period indicated that little business was done outside of professional speculative transactions. The labor situation in England as reported by cable was sufficiently serious to have caused by itself heavy selling had the market not been in a well liquidated condition. In addition to the depressing influence of a general strike call in England, the market had to consider another run up of the call loan rate to 7 per cent. and the possibility of a lengthy Senatorial investigation of the railroads. Inasmuch as the proposed inquiry, sponsored by Senator Cummins, is certain to overlap hearings before the Railroad Labor Board on wages, the Street feared that complications were approaching in a situation which needed a single line of procedure and as much speed as possible.

The foreign exchanges took a very real interest in what was going on in England, pushing out of the state of relative poise which it had maintained since the miners stopped work. Sterling receded more than 2½ cents to the pound. Naturally, the London rate was more affected than were those of the continent, but there was a greater unsteadiness in francs, guilders, pesetas and lire than had been seen before this week. Quite likely there was reflection in the exchanges, as well as among stocks, of the return of demand money to the level which ruled during most of last month, and the 6½ and 7 per cent. quotations of the afternoon altered most preconceived ideas of a money market in which quotations of pre-war credit conditions could prevail. Yesterday's borrowing carries over until Monday morning, a fact which in the past has often tended to bring stiff rates for late loans on a Friday. But the consensus of banking opinion was that less in the way of an urgent demand than of a real, though probably temporary, scarcity of offerings caused the firmer tone. The bank statements of to-day will come in for a great deal of study, for the reports at the end of last week seemed to forecast an easement of rates which has not been borne out.

There was no change in the quality of stocks affected by the day's pressure excepting a decline of more than 3 points in General Electric. The others to fall back were comprised in the array of automobile, steel and railroad issues that have fluctuated rather rapidly in the last fortnight. The significance of an advance of certain steel products by the Republic Iron and Steel Company was not altogether clear, although it will be recalled that another independent producer raised some of its prices a month ago after they had been lowered below the Industrial Board's level of 1919. Supplementing the week's trade surveys, which noted on Wednesday that pig iron was turned out in March at a rate 60 per cent. less than in the active war years, the American Iron and Steel Institute's record of ingot production, issued yesterday, showed that the March ingot outturn was less than half the amount made in March of last year.

Cotton held up well in the face of threatened industrial paralysis in England. Wheat receded 1¼ to 2 cents a bushel. As the deterioration of the spring wheat growth, allowed for in Government calculations on an average basis, has evidently been less than normal this year, the futures market will be interesting to examine as reports of crop condition come from time to time.

CONSOLIDATED EXCHANGE.

An advance in the rate on call funds to 7 per cent. and disquieting cable advices on the British labor situation combined as influences adverse to prices during the final half period of yesterday's Consolidated Stock Exchange trading. Losses in active industrials averaged a point to 3 points and in rails fractions to more than 1 per cent. There were fairly moderate rallies at the end from extreme lows. Declines of 3¼ in International Harvester to 32⅝, 3 in Mexican Petroleum to 137½, 2¾ in General Asphalt to 58⅝ and 2¾ in General Electric to 133¾ were feature changes.

Crucible Steel was offered down 2⅝, at its minimum, to 82; United States Steel to 80½; Republic, 1 to 63½; Midvale, 1½ to 25¼; Baldwin Locomotive to 86¼; Texas Coal and Oil, 1¼ to 27; Pacific Oil, 1⅝ to 34¾; Studebaker, 2¼ to 74¾; Chandler, 2 to 78; Atlantic Gulf, 1⅛ to 33⅞; American Smelting, 1 to 37½; American Woollen, 1¼ to 70⅝, and United States Rubber, 1¼ to 71.

Northern Pacific yielded 1⅝ to 74¾, Texas and Pacific to 19¼, Rock Island to 25⅛, Lehigh Valley to 48⅝, Pennsylvania to 34½, B. R. T. to 11⅞, Kelly-Springfield to 39⅞, Punta Allegra to 43, Corn Products 1⅛ to 72¾, International Paper 1 to 56, Virginia Chemical 1¾ to 29½ and Keystone Tire to 13⅝.
