FINANCIAL NEWS AND COMMENT

Coppers Lead in Stock Market Advance—Bank Reserves Drop Sharply.

While dull, stocks showed yesterday consistent strength in the prices of the more active issues, led by the copper group. An advance of 25 cents a barrel in mid-continent crude petroleum quotations helped the oils to higher levels, and whatever week end profit-taking there was among automobile, railroad and steel shares was absorbed, with nothing more than an occasional softening of prices. A gain of 2 points in Lehigh Valley indicated that a speculative following had been built on hopes of favorable terms in the company's coal segregation plan when it is filed with the Federal court in a few days.

The upturn of more than a point in Anaconda, Utah Copper, American Smelting and Refining, Ray Consolidated and Kennecott, with fractional advances among other metal shares, reflected the increased attention that has been paid to the copper market for ten days. The metal is not moving into consumption in any really large amounts, but a slight hardening of prices last week showed that manufacturers were adding to their stocks in a more active fashion than they were during the summer. That market has felt severely the absence of Germany as a buyer—and there is no sign that that country will participate on a broad scale for considerable time to come. But the producing companies have been shaping their output for more than a year to fit a demand more sluggish than was the case before the war, and it is not improbable that if American electrical goods makers and brass foundries expand operations this winter, the copper situation will enter a stronger position than it has occupied since the armistice.

The reports of 142 railroads for August present an excellent picture of the entire railway result in that month, but as the net income of approximately $70,000,000 was based largely on savings in maintenance and other costs, a comparison with a deficit of $132,500,000 in August, 1920, loses much of its force. The rail reports of the current month will be more to the point as showing what the autumn business is to bring forth, as they will show more clearly than did August the effect of the 12 per cent. wage cut of July, when net operating revenue is compared with September of last year, a month containing fewer charges than did August on account of retroactive wage accounts.

Because of an unexpectedly large expansion of loans and deposits at the same time that reserves carried with the Reserve Bank declined sharply, the New York Clearing House banks showed last week a deficit of $10,898,000 in reserves. Loans were enlarged more than $55,000,000, a process that aided in growth of $44,800,000 in demand deposits. It looked as though correspondent institutions in other cities and towns had drawn heavily on their deposits in New York, coincident with a broadened demand for accommodation here, possibly connected with new security offerings. As the average bank statement noted a decline of no more than $5,725,000 in reserve credits at the central institution, while the statement of actual condition on Friday showed an expansion of more than $37,000,000, it was evident that the member banks rediscounted heavily in the closing days of the week.

SILVER MARKET.

Official bar silver in New York, domestic, 99¾c. an ounce, unchanged; foreign 70⅝c., up ⅛c.; London, 43½d., up ¼d.; Mexican dollars, 54⅝c., unchanged.

The range of silver prices this year:

	Highest.	Lowest.
London	43½d. Sept. 27	30¾d. Mar. 5
New York	71⅝c. Sept. 27	53c. Mar. 5

SUGAR.

The raw and refined sugar markets were without fresh developments yesterday and few buyers were down, some of the brokers and refiners sales offices being closed for the half holiday.

The demand for refined sugar has not been up to expectations, but an improvement is looked for next week.

Outside raw sugars have been pretty well cleaned up by recent purchases, which leaves Cuba sugars to fill whatever refiners' requirements will be. The Cuban price was unchanged at 2⅝ cents, cost and freight.

The range of prices in yesterday's sugar futures market was as follows:

	Open.	High.	Low.	Close.	Close.
October	....	....	....	2.65	2.65
May	2.41	2.41	2.41	2.41	2.40
