Why the Rails Must Improve

Better business—lower costs—more efficient operation. Other good, hard reasons indicate rails are undervalued.

Will they prove the Market Leaders?

Seems likely they will—with more optimism prevailing.

A special article analyzing the PRESENT and FUTURE STATUS OF THE RAILS—also analysis of BALTIMORE & OHIO.

SABIN IS CHAIRMAN OF GUARANTY BOARD

Potter Succeeds Former President as Executive Head of Trust Company.

Charles H. Sabin, who was elected president of the Guaranty Trust Company in the second week of January, 1915, was elevated yesterday to the chairmanship of the board of directors at a meeting of the directors and at the same time William C. Potter, who had been chairman of the board for a few months, was placed in active executive charge of the institution as president. This action was decided upon before Thomas W. Lamont, chairman of the executive committee, started for Mexico last Friday, but no announcement was made until the proposal was ratified by the entire directorate.

An increase in the amount of stock of the Guaranty Trust Company owned by J. P. Morgan & Co., as well as an augmentation of that firm's degree of control of the Guaranty was indicated by the addition to the directorate of Edward R. Stettinius and George Whitney, both being members of the Morgan house. The action taken was announced in person by Mr. Sabin before he left to attend the initial game of the world series, but he would add nothing to the following formal statement:

"At to-day's regular meeting W. C. Potter was chosen president to succeed Mr. Sabin, and Mr. Sabin was unanimously elected chairman of the board. Two new directors were elected—Edward R. Stettinius and George Whitney, both of J. P. Morgan & Co.

"Mr. Potter was actively associated with the management of the company for many years, and his ability and judgment were real factors in helping in its upbuilding. He is thoroughly familiar with its affairs, and as president his recognized capacity as an executive will have a wider field of activity. As chairman of the board I shall continue to devote my entire time to the management of the company and shall maintain close touch with its affairs and its customers."

Mr. Potter had been associated with the management of the Guaranty Trust Company for a long time before leaving that institution to go with the Guggenheims in mining undertakings. After the death of Alexander J. Hemphill, who had been chairman of the board since 1915, there was no chairman for several months until Mr. Potter was induced to return to active executive capacity with the Guaranty as chairman of the board.

Charles H. Sabin was 46 years of age when he first assumed the presidency of the Guaranty after an unusually rapid rise in the banking world. Starting in 1887 in the National Commercial Bank of Albany, he was made cashier of the Park Bank in Albany in 1898, cashier of the Albany City National Bank from 1898 to 1902 and vice-president of the National Commercial Bank when the latter consolidated with the Albany City National. In 1907 Mr. Sabin was elected president of the National Copper Bank of this city and after its merger with the Mechanics National Bank in 1910 he was made vice-president of the consolidated institution. He was elected a vice-president of the Guaranty Trust Company in July, 1910.

405,051 SHORT TONS OF COPPER AVAILABLE

Survey Includes Pig at Smelters and Refined for Market.

WASHINGTON, Oct. 5.—A survey of copper stocks as of September 1 showed a total available supply of 405,051 short tons, including pig copper at the smelters and refined metal ready for the market, George O. Smith, director of the Geological Survey, announced to-day. Nearly half of that tonnage, however, was held in trust for the Copper Export Association "for export alone," the statement said.

"These figures do not include the working stocks of copper in transit and in process of refining, which are now much lower than at the beginning of the year and apparently are reduced to a minimum," Mr. Smith added.

DIVIDEND IS PASSED BY SUMATRA TOBACCO

Rate on Common Was Cut From $2.50 to $2 in May.

Directors of the American Sumatra Tobacco Company decided yesterday to omit the quarterly dividend on the common stock due at this time. The company has been paying quarterly dividends of $2 a share on the common stock since last May, prior to which time the rate was $2.50 a share quarterly.

In 1919 and 1920 10 per cent. was paid on the common shares. In 1918 the total dividend was 8¾ per cent. in addition to 15 per cent. in stock, paid in December. The initial payment of 1 per cent. was made on August 1, 1917, the total dividends paid on the common for that year being 2½ per cent.

CONSOLIDATED EXCHANGE.

Heavy liquidating sales in the Pan-American oils outweighed the favorable influence of 4½ per cent. call funds and gave rise to general unsettlement in all industrial groups in the final half period on the Consolidated Stock Exchange yesterday, Mexican Petroleum falling 6 to 94¾ and Pan-American 5 to 41¾. The rails were also in liberal supply at lower figures. Other feature changes were declines of 1¾ in General Asphalt to 51¾, 2¼ in Burns Bros. to 104¾, 1¾ in American Sugar to 53¼, 1¾ in Sears-Roebuck to 68½ and 1¾ in International Harvester to 77.

Retail Stores yielded 1¼ to 51, American Woolen 1 to 74½, Central Leather to 27½, United States Rubber 1 to 48, International Paper 1 to 47⅝, United Fruit 1 to 108¾, Adams Express 1¾ to 48¼, Crucible 1¼ to 62⅝, United States Steel to 78⅝ and Bethlehem Steel B 1⅜ to 54.

Baldwin Locomotive was offered down 1¼ to 85¾, Studebaker 1¼ to 71¼, Pierce Arrow 1¼ to 9¾, Atlantic Gulf to 26⅝, Southern Pacific 1½ to 78¾, Lehigh Valley 1⅝ to 57, Reading 1 to 71¼ and Rock Island 1¼ to 33¼. Famous Players rose 2½ to 56½, American Sumatra 2 to 40 and Royal Dutch 1 to 46⅛.

OUTPUT OF PIG IRON IS INCREASED AGAIN

Steel Industry on 40 Per Cent. Basis of Operation and Is Gradually Improving.

The improvement noted a month ago in the production of pig iron has continued, the September output having totalled 985,528 tons, or 32,850 a day, compared with 954,193 and 30,780, respectively, in August.

"Fourteen blast furnaces were blown in in September," says the *Iron Age*, "and two went out. The daily capacity of the 82 furnaces active on October 1 is estimated at 35,650 tons, against 30,770 for the 70 furnaces in blast one month previous. The Steel Corporation blew in six furnaces last month, in view of the increased steel production required by recent large orders in sheets and wire products.

"September showed a gain of over 900 tons a day, or 19 per cent. in the output of blast furnaces making iron for the market, in distinction from the steel companies' product, this gain following a steady succession of declines since the opening of the year. A further pig iron gain is indicated for October, seven blast furnaces being scheduled to blow in in the first half of the month."

The *Iron Trade Review* says:

"Improvement in the iron and steel situation is now so diversified that 50 per cent. operations are in sight for the first time in about eight months. At present the industry is approximately on a 40 per cent. basis. The sheet division with better than an 80 per cent. average output and with the largest maker 89 per cent. active this week, leads all other lines followed by tubes, tin plate and wire. Some independent pipe mills for the moment are up to 90 per cent. operations.

"Independent sheet mills on September 30 had orders for 324,000 tons of equipment equal to seven weeks of full rolling. Three small Western roads have closed for 25,000 to 30,000 tons of rails. The Baltimore and Ohio placed orders for 2,000 car bodies and the Pittsburgh and Lake Erie for repairs to 1,000 cars; miscellaneous orders totalled 500 tons; Denver and Rio Grande is negotiating for 2,000 gondolas; the Western Pacific for 2,000 of a similar type and the St. Paul for 2,500.

"So many individual structural awards have not been brought forth in months as in the last week. The total definitely announced is about 30,000 tons. Reappearance of apartment house contracts in the metropolitan district is a feature.

"The weekly composite price in the iron and steel market compiled by the *Iron Trade Review* was stationary this week at $35.52, which compares with $34.88 two weeks ago and $35.34 for September.

"The leading cast iron pipe maker, it is learned, has placed orders in the southeast and in other districts totalling 30,000 to 50,000 tons.

J. R. SUTHERLIN BANKRUPT.

Kansas City Man's Assets Top Liabilities by Over $1,000,000.

KANSAS CITY, Mo., Oct. 5.—A voluntary petition in bankruptcy was filed to-day in the Federal Court by James R. Sutherlin, head of the Sutherlin Security Company. Liabilities amounting to $1,080,736 are listed in the petition and the company's assets are estimated therein at $36,994. Included in the list of assets is Sutherlin's home, valued at $25,000, which he asserts is exempt from creditors' claims. Sutherlin has been a large dealer in securities here during the last few years.

Among the creditors listed in the petition is the National Surety Company of New York, which holds Sutherlin's note for $95,000.

AMOSKEAG MILLS SHOW LOSS.

Report $1,250,953 Deficit for Last Fiscal Year.

The Amoskeag Manufacturing Company reports for the year ended on May 28 its net profits as $1,272,647, after allowing for expenses and inventory adjustments in contrast to $4,368,918 in the preceding year. Its sales were $31,287,074 and its cost of manufacturing $28,984,549 in the former period, in contrast to $6,319,933 and $52,467,645 respectively in the latter one.

A revision of $1,029,878 in its inventory valuation reduced its balance available for its dividend to $1,272,647, and a deficit of $1,250,953 was disclosed after the payment of $2,523,600 in dividends on its capital stock.

NOW LISTED ON BIG BOARD.

The New York Stock Exchange has admitted to its trading the following securities: The Cuba Cane Sugar Corporation's $25,000,000 of certificates of deposit for its ten year 7 per cent. convertible debenture bonds, $14,122,140 of the Kansas and Gulf Company's capital stock of $10 par value, and $3,000,000 of the Brooklyn Edison Company's 7 per cent. general mortgage bonds of series D.

$100 COUNTERFEIT FOUND.

Treasury Finds Well Made Fake U. S. Gold Certificate.

The Treasury Department reports through the local Reserve Bank that a new counterfeit $100 gold certificate is in circulation. The check letter is A. The note bears reproductions of the signatures of Lee McClung, Treasurer of the United States, and W. T. Vernon, Register of the Treasury.

The counterfeit is described as well made and from engraved plates on two pieces of paper, between which silk threads have been distributed. The seal is deep carmine, and the portrait of Benton, which the note bears, is too heavily printed on the right side, giving the face the appearance of being narrow.

PHILADELPHIA CUTS RATE.

PHILADELPHIA, Oct 5.—The Federal Reserve Bank of the Third district to-day reduced its rediscount rate on all classes of paper from 5½ per cent. to 5 per cent.

PENNSYLVANIA OIL MARKET.

OIL CITY, Pa., Oct. 5.—Credit balances, $275; runs, 28,005; average, 15,625; shipments, 52,489; average, 38,143.
