12 Selected Dividend Payers

We have prepared a special booklet analyzing 12 diversified listed stocks, which we consider the outstanding purchases on the market today.

These securities combine a high degree of safety with liberal income, strong probability of appreciation and ready marketability

The yield on the combination averages more than 8%

This booklet will be found of value not only to investors seeking attractive investments, but also to those desiring to switch from unsatisfactory holdings to high grade dividend paying issues.

FRENCH INVESTORS UNEASY OVER CREDIT

Fear Bank Troubles Pending Settlements With U. S. and Britain.

FALL IN MARK HITS PARIS

Deflation in Paper and Increase of Gold Reserves Good Signs.

Special Cable to THE NEW YORK HERALD.
Copyright, 1921, by THE NEW YORK HERALD.
New York Herald Bureau,
Paris, Oct. 23.

With all branches of the Bourse showing a decided depression last week, the hesitation of the financial division is seriously increased by rumors, said to be well founded, that two important banks are likely to submit in the near future to the same fate as the Banque Industrielle de Chine. Until the situation develops clearer lines it seems certain that month-end liquidations will feel the repercussion of these reports, and it is generally prophesied that French credit organizations are about to undergo a period from which only the fittest will survive, unless unforeseen financial settlements are reached with the United States and England which will enable the economic factor to overbalance purely monetary considerations.

The uneasiness of investors last week was somewhat influenced by these rumors, but the general fall of all quotations is ascribed to two causes easier to analyze—first, continued depreciation of the Mexican eagle, which has for months been the guide for French investors, and, second, the worthlessness of the German mark.

Economically, however, the country's condition is considered satisfactory and is providing a basis for confidence in commercial restoration which will improve the status of purely French issues.

Although the balance of trade is still heavy on the side of imports it is noticeable that raw materials necessary for industries form the greater part. Hitherto this rarely exceeded eight hundred millions a month, but September showed more than a billion two hundred million.

The conclusion of peace with Angora is also taken as a good sign for the future, and this will enable the withdrawal of French troops from Syria and diminish considerably the War Ministry's budget.

The severity of the action by the Budget Commission of the Chamber of Deputies in demanding that the Government provide more workable foundations for the budget before it will be presented in the Chamber is generally lauded, and although the problem is difficult it seems certain that the deputies now appreciate that the era of "hand to mouth" financing can be permitted no longer.

With the failure of the proposal to float a Chinese loan in France for the benefit of the Banque Industrielle de Chine, the latter institution will be compelled to submit to judiciary liquidation.

The weekly balance of the Bank of France shows 100,000,000 reduction in advances to the state and double this in deflation, while gold reserves have increased 275,000,000. The bank's discount rates are 4½ per cent. for paper, while cash is at 4 per cent.
