SOUTH ABETS WEARY COTTON LONGS' DRIVE

Liquidation Drops Prices, January and December Breaking Through 17 Cents

Continued liquidation by disgusted longs, combined with pressure from Southern interests, drove yesterday's cotton market still lower. Prices declined 50 to 70 points, January reaching 16.55 cents and December 16.89 cents. Pre-holiday profit taking from shorts developed near the close, with the result that final bids were somewhat up from the bottom—33 to 59 points net lower.

A decided change in prevailing sentiment occurred, due entirely to the revision of certain preconceived notions as to the size of this season's crop. A local concern of some prominence estimated the crop at 8,000,000 bales, and so confirmed official bearish indications of the final yield. In the last five weeks, or since the Government crop estimate of 6,537,000 bales was issued, the market has experienced a drop of more than 500 points. March, which this season sold up to 22.12 cents, dropped as low as 16.55 cents yesterday.

Should the trade enter the market as a real buyer, and it is felt in many quarters that mills have covered only a small portion of their requirements, the market could easily recover a few cents a pound.

Indications are that the 1921-22 crop will be at least 7,500,000 bales. Some place the figure at nearer 8,000,000 and a few of the more speculatively inclined bears at even more.

The market made a brave effort to resist the heavy liquidation at its opening, and in the first hour succeeded in advancing slightly over its previous final prices. Support came mainly from Western and local shorts, who, having profits after the sharp break, did not care to hold their position over the holiday. After the opening hour, however, the market gave ground steadily, stop loss liquidation accelerating the decline.
