THE EQUITABLE TRUST COMPANY OF NEW YORK

FEELING IMPROVES, LONDON STOCKS RISE

Gilt Edges in Demand When Treasury Predicts Cheap Money.

N. Y. IS BUYING MEXICANS

Advance in Mark Based on the Hope of Better Terms to Be Given to Germany.

Special Cable to THE NEW YORK HERALD.
Copyright, 1921, by THE NEW YORK HERALD.

New York Herald Bureau,
London, Dec. 4.

The stock markets, which began last week in a dispirited mood, became much more cheerful as the days passed and finished up in good form, with prices generally higher in most departments. The feature was a further rise in British funds and home rails. Gilt edges were wanted on the indication given by the Treasury of official expectations of cheap money. A rally in the mark raised hopes of an international adjustment, the effects of which on financial stability and trade prosperity are immeasurable.

Oil shares came back into favor with a rush, and Chinese bonds, which had been notably weak, were firmer on the hope that Secretary Hughes and Mr. Balfour may be able to settle the questions at issue between China and Japan.

New York is still the buyer of Mexican securities.

Rubber shares found a better market and industrials improved, the only fly in the jam being South African mines, which were overshadowed by a strike in the Crown Mines, but which has been settled.

Fluctuations in foreign exchange were not so erratic at the end of the week. Saturday German marks opened nominally at 950 to the pound sterling, but it was not until the rate slipped to below 900 that any business was done. Subsequently there were buyers down to 860. While nothing has happened as the result of the conference between Dr. Walter Rathenau and British authorities, the prevailing idea in financial circles is that feelers are being put out regarding the practicability of arranging large credits and whether the Allies will consent to further repayments by Germany being deferred.

In view of the general situation in Germany it seems a question whether that country can pay the reparations in accordance with the treaty obligations. Leading foreign exchange authorities hold that the crux of the situation is to be found in the depreciation of the mark due to currency inflation. S. Montagu says that to get at the root of that evil it is necessary to go back to a period before the war when Germany issued a loan of £50,000,000 for naval and military expansion, although even at that time she did not attempt to balance current expenditures by taxation.

Then came the war. She did not have a budget for defeat and had to face the accumulated bills. Her Government has not been strong enough to impose adequate taxation to balance the budgets, and, on the contrary, increased expenditures by subsidies aggregating enormous amounts, so that food and transportation have been made artificially cheap.

Thus she attained two objects—low cost of living and cheap wages—and the printing of notes to pay the subsidies depreciated the mark and thus subsidized her exporters to the disadvantage of her workers and the allied countries.

THE WEEKLY CURB MARKET.

WEEK ENDED DECEMBER 3, 1921.
