BUSINESS NOTES AND TRADE NEWS

Holiday Sales of Men's Wear Exceptionally Large—Silk Buying Improves.

One of the larger dealers in men's wear reports an exceptionally good holiday trade, with sales exceeding in volume those of last year. The outstanding features of holiday business in this store in sales of silk mufflers and a great number of pipe sales. The more popular priced items of linen novelties also are reported as having large sales. A decided falling off in sales of walking sticks for men is noticeable. Indications, according to the dealer, point to a fair volume of business being done in the spring lines of men's wear.

Anticipate Big Silk Business.

Cables received from Japan yesterday reported an active silk market with firm prices. Improvement in buying is noticeable in the local market, advanced prices seeming to have a stimulating effect on purchasing. Although jobbers' prices have been advanced in conformity with the raw silk market they are still lower than replacement quotations. January, February and March are expected to be the busiest months in several years from the jobbers' viewpoint, because of the present attitude of buyers. Little hope for a break in price of the raw silk produce before next summer, possibly not until fall, is held out. Surpluses are low.

Hand Made Trimmings for Spring.

A continuation of the present hand made trimmings for ladies' hats is expected for the spring millinery trade, according to a representative dealer who just returned from a Western trip. Braids made of hair, visco and cellophane material, in narrow widths, are the most popular trimming for spring wear. Broad braids are not expected to play an important role for more expensive hats. The predominating colors, as evidenced by the sales, appears to be for all shades of brown, particularly of henna, pheasant and mulberry. Buying at the moment is confined to immediate requirements among the millinery trade, but with the close of the holiday period a more active buying period is expected to develop.

Fine Chemicals Firmer.

An advance of 40 per cent. in two weeks in hydroquinone is noted by the *Drug and Chemical Market* in a report issued to-day. Aspirin also has advanced and cod liver oil is firmer. A cut in cream of tartar is noted, but its prices are still higher than buyers wish to pay. Manufacturers of chemicals have cut quinine 10 cents an ounce, owing to jobbing competition, which brought foreign prices down. Dutch manufacturers have been holding out for excessively high prices and thereby have given the Japanese inducements to enter the field and make large profits. The heavy chemical market is reported as dull and crude drugs are practically at a standstill, but prices are firm, due to reduced stocks. Phenol is reported as firm on an increasing export demand, and foreign exchange has forced up palm oils. A general feeling of optimism is apparent and prices generally are holding steady and shading is negligible.

Ribbon Prices Up With Raw Silk.

A decided increase in the prices of ribbons is being felt in the millinery trade, due to advancing raw silk prices. Demand for ribbons, however, is gaining in strength and a very good season during the early months of the year is anticipated. Some curtailment of buying is looked to develop if raw silk prices continue at their present high level. Jobbers find big buyers coming into the market, which indicates that spring demands will be of good proportions. Futures are receiving most attention, but spot business is weaker. Manufacturers, according to dealers, are curtailing on production, due to uncertainty respecting spring prices.

Heavy Influx of Raw Furs.

Although great inroads have been made into the new season's catch of raw furs present indications point to an unusually large number of skins being on hand at the beginning of 1922. The skunk catch is reported as being particularly heavy and large consignments of it have been made, it is said, with the result that American fur men believe that the offerings of the auction houses within the next month or two will be unusually large. Shipments of merchandise to sales houses have been heavy and many representatives of large houses apparently are not over anxious to give large advances.

No Change in Gray Goods.

A fair volume of business was reported in yesterday's local gray goods market, printcloths selling in fair demand at Tuesday's closing market prices of 8¼ and 9¾ cents for 64-60s and 68-72s respectively. Sheetings of 6.15 yard were quoted at 6* cents, but only a moderate sized business passed over the counter. More activity was apparent in specialities, particularly shirtings, which sold extensively. No change was noticeable in the burlap market, prices for spots being unchanged at 4.10 and 4.90. Goods were offered more freely, but few buyers were in evidence, due probably to the near approach of the holidays, which are holding purchasers to spot requirements. The first of the year is expected to develop a decided change in the attitude of buyers.

Household Motion Pictures.

A new motion picture camera for household purposes, which retails at popular prices, recently put on the market, is having good sales. Its lens is of special design and requires no focusing. Pictures can be taken by it under any light conditions and its film is of half size to project a picture on a small frame canvass. The educational possibilities of such instruments are emphasized and one of them has been placed in one of the large Eastern universities as a means of showing crew candidates the right and wrong ways of rowing.
