NATIONAL CITY FOREIGN STAFF CHANGES MADE

Second National Merger Also Affects City Forces.

The National City Bank announced yesterday the following elections in its English and European staff to be effective after completion of details in taking over the Paris branch of the Farmers Loan and Trust Company:

"George K. Weeks, European representative of the National City Company and a vice-president of that institution, elected a vice-president of the bank; Paul Grosjean, in charge of the Brussels branch, also elected a vice-president. Paul F. Fatzer, manager of the Paris branch of the Farmers' Loan and Trust Company, retained, will manage its Paris branch.

It was announced also that the Second National Bank will complete its merger with the National City Bank at the close of business on December 31. Beginning Tuesday, January 3, the branch of the National City Bank at Broadway and Twenty-sixth street, will be consolidated with its Fifth avenue branch at Twenty-eighth street and plans are under way to provide for the Second National.

The bank has announced the following elections and appointments: "Arthur L. Burns and Edward H. Peaslee elected vice-presidents, Charles W. Case and William Pabst appointed assistant vice-presidents, and Edward H. Webb, John H. Hoverman and Robert E. Shotwell appointed assistant cashiers. They were formerly officers of the Second National Bank.

COTTON CLOTH EXPORTS DROP.

Decrease in American Shipments In November 17 Per Cent.

WASHINGTON, Dec. 30.—Exports of cotton cloths from the United States decreased 17 per cent. in November compared with those of October, while exports of that commodity from Great Britain increased about 21,000,000 yards, according to a statement issued to-night by the Commerce Department.

Exports of cotton cloth from this country to such markets as the Philippine Islands, Central America and Haiti, however, showed greater activity.

November exports of cotton cloths from this country totaled 53,000,000 yards, against 64,000,000 in October, while similar exports from the United Kingdom during November amounted to 364,000,000 yards, against 343,000,000 in October.

CANADA'S COMMERCE FALLS.

Decline Heavy in Last Fiscal Year, Report Shows.

OTTAWA, Dec. 30.—Canada's commerce declined heavily in twelve months ended on November, 1921, as shown in a report just issued by the Dominion Bureau of Statistics. Her exports were $880,458,548, in contrast to $1,289,536,450 in the preceding year, and in imports $825,226,585, against $1,345,592,300. Her customs fell to $124,184,941 from $207,412,639 in the last corresponding period. Her imports from the United States were valued at $579,427,941 and her exports to the United States $359,016,167.

CUDAHY DEFICIT $1,569,563.

The report of the Cudahy Packing Company for the year ended October 29 shows a deficit of $1,569,563 after expenses and interest charges, which compares with a net profit in 1920 of $624,238. Gross receipts were $173,695,000, compared with $288,802,000, and expenses, interest, &c., $175,264,563, against $288,177,712. No dividends were paid, the final deficit charged against surplus being $1,569,563, compared with $859,846 a year ago, when $1,484,134 was paid in dividends.

FINANCIAL NEWS AND COMMENT

Stock Market Easily Absorbs Heavy Selling—Prices Have Underlying Strength.

The stock market absorbed yesterday's output of year end sales with ease and the underlying strength of prices was sufficient to meet news of a large brokerage failure without any reflection. A feature of its business was a substantial increase of transactions on the New York Stock Exchange for cash and entailing immediate delivery of stock bought. Presumably much of that business was brought forth by the desire of stock owners to record losses in depreciated securities, as sales in the regular way would not be completed until the first business day of 1922. But a great many issues in which cash sales were noted on the ticker were ones which stood far above their lowest quotations of the year, indicating that the effort to conserve tax money, to say the least, had been strangely delayed. Call money went from 5 per cent to 6 per cent. in the afternoon, that rise being about the only evidence of the effect of January 1 demands upon the money market seen this week.

The market for stocks was at times quite irregular, and in bonds much the same condition prevailed. Victory bonds went to new high prices for the year at the same time that railroad issues were firm and foreign bonds inclined to sag. A rally of more than 4 points in Sears, Roebuck & Co. shares showed that the short interest had been rounded up, following the unusual procedure taken by the president of that company to carry it through its period of readjustment after a year of falling prices and sluggish goods' sales. There were net gains of a point to more than 4 points in such shares as Allis-Chalmers, American Ice, Houston Oil, Railway Steel Spring, Standard Oil of New Jersey, Standard Oil of California and several specialties, and as the larger part of those advances occurred in the afternoon, the stock list looked its strongest near the closing. The trading area was broader than it was on Thursday, a result of the incentive of holders to close out their commitments before the end of the year.

The wheat market was unable to understand for a time why futures should be under pressure, especially as the Government's winter wheat report on Thursday had indicated a condition usually described as bullish, but with announcement of the failure of a New York Stock Exchange house, which had been a large factor in the grain futures market, some light was thrown on the decline that had extended from 2¾ to more than 4 cents a bushel during the morning. A moderate rally occurred in the final hour of business. Cotton options were firm, although inactive, final quotations being 15 to 29 points higher than they were on Thursday. Spinner's takings for the week, amounting to 210,467 bales, were 53,400 less than they were in the preceding week, but they had no appreciable effect on sentiment.

The foreign exchanges continued to advance, especially those of Western Europe. Sterling went forward more than a cent to the pound, and a moderate rally of Italian exchange seemed to show that fears of wide ramifications of the failure of the Banca Italiana di Sconto had been allayed. There was light business in all the exchanges, offerings of sterling and franc bills being rather scarce. It is the period of the year when European holiday making tends to restrict financial undertakings.
