BUSINESS NOTES AND TRADE NEWS

Definite Trend of Clothing Buying Expected to Be Indicated This Week.

Definite buying trends in the clothing market are expected to be foreshadowed in this week's events. Present indications point to an early rush for tweeds, and merchants generally are prepared to play that demand to the utmost. Interest is being centered in what the week's sales will show for serge suitings. The number of new models on display indicate, however, that retailers have fairly definite ideas on what the call will be. Prospects of a late Easter are regarded with optimism rather than otherwise, because it will mean an extension of the spring buying season at a time when it will be most needed.

Sport Wear Makes Simpler Styles.

In the present short clothes craze, of encouragement to manufacturers of women's dress lines is the fact that style has been forced into the background while high colors and novelty designs have become the criterion of sales value. Waist manufacturers have taken advantage of that situation to make all their garments on the same base, but vary their appearance by creating original pattern designs by means of embroideries and bead trimmings. High contrasting colors in plain shades also have been used for that purpose.

Government Sales Retard Trade.

Manufacturers of raincoats and gabardines are placing most of the blame for slack buying on Government sales of those garments. Although the Government gaberdines lack style elements, they are being bought in considerable numbers by men and women looking for serviceable garments irrespective of style. It is on their trade that raincoat manufacturers depend for most of their annual turnovers. Until the Government offerings shall be disposed of manufacturers believe that no new styled garments should be made but that production should be at minimum.

Waist Trade Inactive.

The waist industry is still suffering from lack of buyers' interest. The curtailment is particularly noticeable in domestic products. The limited number of advance orders received are chiefly French importations. The American merchandise lies without buyers. Waists made of crepe de chine are the favorites at this time. Georgettes have been almost discarded for spring showings. For trimming highly colored steel and glass beads are being used exclusively.

Early Interest in Bathing Caps.

Coincident with active spring buying of bathing suits is interest being manifested in novelty bathing caps. First orders received are said to be fully up to expectations in view of the well recognized shortage due to last season's sales. Confidence in the bathing suit, cap and shoe business, however, has not led the average run of buyers to reckless buying. With the first rush of spring business about due merchants, as a rule, are assuming a waiting attitude, to determine not only style and color preferences but also to cast about for summer weather conditions.

Gray Goods Opens Easier.

Slight concessions in prices in several staple print cloths marked the opening of yesterday's local gray goods market. Trading was confined to immediate needs and underselling was apparent. Goods of 64-60s and 68-72 prints were sold in limited quantities at 7¾ and 8¾ cents, respectively. Little business in sheetings was transacted, but prices were generally firm for those constructions. Otherwise the market was without feature. The local burlap market opened with active bidding yesterday and with numerous inquiries for odd constructions. Interest centered in heavy weight goods and business in their constructions at advances of 5 to 10 points from Saturday's closing quotations was done. Prices were 5.25 and 4.05 cents for heavy and light weight goods, respectively, with replacement costs somewhat higher. The Calcutta market was reported as firm.

Aid in Shoe Selling.

Mention of the method used by a local shoe dealer to demonstrate the quality of shoes that he is selling is made by the Retail Shoe Dealers' Association. The dealer has had a shoe cut in half that one may visualize not only its material but the manner of making it. He contends that merely to tell a customer that a shoe which he is examining is of the best materials and constructed properly does not always convince him. The method has been found to be a great selling aid and incidentally saves much argument.

Blame Retailers in Slack Buying.

Garment manufacturers generally are complaining of retailers for curtailed buying. Merchandising men are receiving the major share of the criticism, it being the opinion of manufacturers that the latter's attitude on apportionment is illogical and tends to keep retail stocks below a reasonable level for consumers' needs. Another criticism of buyers is their tendency not to only buy less but to distribute their purchases over a variety of merchandise, which necessitates manufacturers maintaining large stocks.

Installment Men Organize.

A subdivision of the reference clearance bureau of the Associated Retail Credit Men of New York City has been formed by twenty installment firms of this city. The subdivision will be confined to the installment retail trade exclusively and members of the association doing business on any other plan will not be allowed to join the group. A master card for the new service has been distributed and names of all accounts of profit and loss ledgers of installment concerns will form the first batch of information to be registered by the bureau.

ALBANY REPORTS SHOW BUSINESS IMPROVEMENT

Incorporations Since January 1 Reflect Better Conditions.

ALBANY, March 6.—"Indications of a return to better business conditions" were presented by Secretary of State John J. Lyons to-day in a report showing that 504 more companies incorporated and embarked in business during the first two months of 1922 than during the same period in 1921.

"Not only are more companies incorporated than a year ago," said the report, "but they are more widely scattered over the State and far more varied in character."

In the first two months of 1921 a total of 2,627 companies, having an aggregate capitalization of $117,618,555, were incorporated with the Secretary of State. During the same period in 1922 a total of 2,131 companies, with a capitalization of $118,313,350, were incorporated.

Real estate business holds the lead, with 263 companies incorporated. Thirty-one motion picture companies and 112 garment making concerns also began business.
