STANDARD OIL TO LEND $1,000,000 TO PERSIA

U. S. Company May Gain Advantage in Exploitation.

Negotiations are pending between the Standard Oil interests in this country and the Government of Persia under which, if completed, that Government will borrow at 7 per cent. from the oil interests 13,000,000 Persian krans, equivalent to more than $1,000,000.

It is believed that through the negotiation of such a loan the Standard interests will gain an advantage over the British and French oil people. The Persian oil lands are tremendously valuable, according to information obtained here.

FOREIGN MARKETS.

LONDON, March 31.—Buying in the Stock Exchange was active and mainly on speculative account to-day. Gilt edge securities were strong, British industrials firm and oil shares quiet. Quotations follow:

Bar silver, 34½d. an ounce.
Bar gold, 95s.
Money, 3¼ per cent.
Discount rates: Short bills, 2⅞ per cent.; three months bills, 2¾-16 per cent.
2½ per cent. consols, 56½.
British 5 per cent. war loan, 99¼.
British 4½ per cent. war loan, 95½.
De Beers, 10¾.
Rand Mines, 2¼.

CHANGES IN SENECA COPPER.

J. Parke Channing has resigned as president of the Seneca Copper Company and Walter Lewisohn has resigned as director, it was announced yesterday. The general offices are to be removed from 11 Broadway, the offices of Lewisohn Brothers, to 120 Broadway. Until a successor to Mr. Channing is appointed Robert Linton, first vice president, will act as president. F. R. Kennedy has been named treasurer.

FINANCIAL NEWS AND COMMENT

Stocks and Bonds Show Great Strength—New Highs in Liberty Group.

The bond market was more consistent in its performance yesterday than was the stock market, but together they supplied one of the most vigorous demonstrations of price strength seen this year. It was evident that speculation played a considerable part in gains of a point or more among bonds of the Louis and San Francisco, the Missouri, Kansas and Texas, the St. Louis, Iron Mountain and Southern, the Southern, the Seaboard Air Line and other companies. Such a development was entirely logical in the present state of sentiment toward railroad earnings and in view of the easy situation of money, as the future of many second class rail issues is likely to be determined by operating results in the next few months. A wide list of bonds which sells below mortgage securities makes, moreover, a sufficient interest return to enable traders to carry them with less expense than stocks that pay no dividends.

While railroad bonds were much more active than others, there was a heavy turnover in all parts of the market, and the Second and Fourth Liberty 4¼s reached new high points. The effect of Government withdrawals of funds on Thursday was seen in a hardening of the call loan money rate from 4½ per cent. to 5½ per cent., with a late easement to 5 per cent., but time funds were in fair supply at 4½ per cent. The temporary burden on the demand loan reserves evidently was increased by this week's large purchases of securities to be carried on credit.

The familiar process of crowding the shorts in Studebaker, Chandler Motor, Baldwin and several closely held specialty stocks lifted them with much force in the morning, helping the general array of industrial stocks forward, but realizing sales expanded as the day advanced and the major part of early gains was lost. In fact, the price front disclosed much irregularity at the close. The day's fluctuations were in keeping with conventional procedure during a speculative campaign for the rise. Traders had profits of 2 to 5 points for the week at the day's best levels, and it has been found advantageous when the market is moving rapidly to insure profits near the week end by taking part of them on Friday instead of waiting until Saturday.

The stock market was as completely dominated by internal factors as it was on Thursday. The same encouraging news from steel making centers was considered as on Friday and the copper situation was discussed anew in the light of directions to managers of several porphyry mines to renew production to-day. In the nature of things, it will be many weeks before mines closed for months are brought back to normal output. But the announcement of plans for an enlargement of production seemed to be the signal for increased offerings of metal from existing stocks, and the current moderate demand was reflected in a slight easement of copper prices.

Speculative activity was seen in German marks for practically the first time since the new reparations program was announced, the rate going up to .35 cent, to contrast to .31½ cent on Thursday. The closing quotation was under the best price. The only explanation for the movement lay in cabled reports that steps would be taken by the Reparations Commission to assist Germany in making an international loan. If such a plan is receiving serious attention it will be interesting to see how investors in other countries react to a proposed bond offering before something is done to check the Reichsbank's currency output. Sterling and other European exchanges gained a little ground.

Wheat and cotton lost part of the advantage gained in Friday's sharp upturn.
