COTTON REGAINS PORTION OF LOSS

Relative May Weakness in Contrast to New Crop Steadiness Market Feature.

Latest weather developments, which were favorable, resulted in sufficient local speculative pressure to depress yesterday's cotton market about 10 to 22 points, but part of that loss was regained before the closing. A feature of the session was the relative weakness of May at times against steadiness in the new crops, which after early depression came back to about the level of Saturday's close. Final bids showed October to be a point net higher and other months 4 to 17 points net lower.

Considering the action of Liverpool and the clear weather map, yesterday's market made a good show. The Liverpool futures market broke sharply after early steadiness, probably reflecting old bull liquidation and straddle selling in that market against purchases of new crop positions here. The official weather map was generally clear and seasonable, with only a trace of precipitation anywhere in the belt. Should favorable conditions continue, or even favorable conditions with only slight showers, crop estimates will have to be enlarged, especially in regard to Texas.

It was not surprising that the price of May contracts dropped below tenderable basis in the absence of spot demand of consequence. The premium of May over July was reduced to about 40 points yesterday after having been more than 60 at one time last week. Should there be a revival of spot demand the premium undoubtedly would widen once more. All in all the session was quiet and uninteresting, with price fluctuations narrow.

The local market for spot cotton was quiet, 15 points lower at 17.90 cents for middling. The New Orleans market was steady, net unchanged at 16.63 cents for middling. Its sales in that center were of 1,350 bales.

Range of prices—

	Open.	High.	Low.	Close.	Prev. Close.
May	[illegible]	17.80	17.67	17.72–74	17.89
