Investment Service

Changing financial and business conditions make necessary a frequent and careful examination of your list of investments.

As part of our investment service, we wish to offer our aid in making these analyses with the view of submitting such recommendations as may be advisable, with reports of the financial position of the companies concerned.

For this purpose we have prepared a record sheet for the listing of your securities, copies of which we shall send on request.

AGWI'S NET INCOME SHOWS LARGE GAIN

Operating Revenue Is Much Decreased, as Also Are Operating Expesnes.

The Atantic Gulf and West Indies Steamship Lines and subsidiary companies report for 1921 gross revenue of $40,717,774, a decrease of $14,657,430. After charging off for operating expenses, interest, loss on Liberty bonds, &c., there remained a net income of $1,781,337, against $149,231 in 1920. The company deducted from its surplus $3,833,014 advanced to French companies, loss on sale of vessels and discount on bonds. The following table gives comparisons:

	1921.	1920.
Operating revenues	$40,717,774	$54,983,504
Operating expenses	35,650,446	52,541,307
Net operating income	5,067,328	2,442,197
Other income	492,639	1,204,745
Gross income	5,559,968	3,646,942
Interest, loss on Liberty bonds, &c.	3,778,631	3,498,711

Comparisons in the consolidated balance sheet are:

	1921.	1920.
Cash on hand	$2,735,462	$2,853,200
Accounts receivable	6,692,056	2,537,618
Inventories	502,180	707,694
Current assets	9,929,699	13,864,808
Notes payable	1,508,135	2,007,353
Accounts payable	6,182,787	4,568,548
Current liabilities	8,595,054	9,979,895
Surplus	22,301,182	24,456,990

Franklin D. Mooney, president, in his statement says:

"Of the fourteen tankers originally contracted for, twelve have been completed and two were sold before completion for $3,383,160, resulting in a loss of $1,777,879. This loss is reflected in the consolidated profit and loss account. At present nine of the completed tankers are in operation, while three are tied up.

"Your company during the last year has paid off all commitments and claims arising from the abandonment of this enterprise, except $236,398, represented by notes outstanding, which are to be paid soon. There still remains some salvage material to be sold on which a substantial sum is expected. In 1921 $1,108,857.41 representing the balance of the entire investment, was written off."

FOREIGN MARKETS.

LONDON, May 5.—The general tone was firm on the Stock Exchange to-day with the exception of oil shares, which were irregular. Quotations follow:

FINANCIAL NEWS AND COMMENT

Stocks Irregular at Close—Exchange on London Gains to 4.44 5-8.

The stock market situation was unchanged yesterday from its condition during the earlier days of this week, speculative endeavor for the rise veering from one group of stocks to another throughout the session. The reaction which occurred in petroleum issues was natural in view of their recent rapid upturn. Buyers of such prominent railroad shares as Southern Pacific, New Haven, New York Central and Union Pacific found offerings rather light and their bidding carried prices forward from fractions to nearly 2 points. Public utility shares, especially gas company issues, advanced easily, scoring the day's largest gains. Although the list was irregular at the close, there were far more stocks with gains than with reactions and an easement of the call loan rate from 4½ to 3½ per cent. in the afternoon helped to support the market against a moderate output of realizing sales.

The feature of the day's financial markets was not in securities but in the further improvement of sterling exchange. The London rate emphasized the indifference which it had displayed to events in the Genoa conference with ½ cent rise to 4.44⅝, a level higher than had been reached since June, 1919. At its best quotation it stood about ¼ cent higher than this year's previous maximum, reached on March 1, and showed that more fundamental influences than those displayed in political bickerings in Genoa had been at work all along. Sterling has been in demand since the recent announcement of plans to reduce British taxation in the next fiscal year. The tax program, following figures showing that the Government had succeeded in balancing its budget with a margin over, has proved to the world that effective grappling with its fiscal problems had brought England to a position in which her exchange could be counted on for normal and stable fluctuations. At the same time the ease of money in London has brought that market forward again as a leading participant in financing world trade and industry.

The other European exchanges were fairy steady—none has shown any marked tendency to lose ground during the conference period—but the question as to what is likely to happen to the German rate if further increases of circulation, comparable to that in the week of April 29 occur may be raised. The expansion reached the tremendous total of 7,800,000,000 marks, approximately equal to the record inflation of the first week of April. The third week of April saw a moderate contraction. The Reichsbank's paper currency has increased no less than 26,000,000,000 marks this year, or more than 20 per cent., and nothing through taxation plans or a bond issue has been brought forward as a medium for checking the manufacture of notes. yesterday's decline of call money to 3½ per cent., occurring immediately after the Reserve Bank report had noted a large flow of gold away from New York, suggested that member banks held unusually large deposits. They, probably, are connected with payments for new securities, including the recent $100,000,000 Canadian Government loan, supplies which are more or less temporary in their lodgment at this center. But the plans of underwriting bankers for further bond issues denote no fears of tightening money rates. Bankers' acceptances, at a bid quotation of 3¼ per cent., were yesterday back to the year's minimum basis, first reached a month ago.

Wheat prices dropped sharply, affected by better weather news from the spring wheat country where planting is under way. Cotton futures backed and filled, leaving off with trifling changes.
