BUSINESS NEWS AND TRADE NOTES

Buyers Begin Ordering Outerwear for Fall—Fair Stimulates Trade.

Orders for fall outerwear are now beginning to come in larger quantities. The Merchandise Fair is having its effect in stimulating early buying. Purchasers who are in the market are placing fair orders with jobbers. The fact that prices of wool goods have advanced about 10 per cent. and cottons are up from 5 to 10 per cent. at first caused some hesitancy among buyers, but this backward feeling apparently is fast disappearing, as many buyers have begun to place orders to cover about half of their probable requirements.

Increased Linen Demand Ahead.

Linen importers are anticipating an increase in demand in the next two weeks. Their confidence is based on the fact that the last half of August is the customary time for buyers to order linens. A large number of buyers are in the market and are dividing their time between attending the Merchandise Fair and looking over the fall linen lines. Stocks in the hands of most merchants, it is believed, are smaller than those normally carried, and buyers are expected to loosen their purse strings in anticipating their probable seasonal requirements. At the moment there is a steady demand for nearly all classes and descriptions of linens. An advance in the cost of linens in Ireland, coupled with an improvement in the exchange rates, has caused local importers to raise their prices slightly.

Livelier Raw Wool Market.

The raw wool market has become more active in the last few days. Prices are somewhat firmer and there is some likelihood of them stiffening, as stocks of certain descriptions are small. There is a steadier demand from mills, while inquiries have broadened considerably. Some reluctance on the part of buyers to pay prevailing prices is still apparent, and there is considerable shopping around in search of cheaper goods. The tariff question continues to be uppermost in the minds of the dealers. The trade is of the opinion that the tariff bill will not become a law until the fall.

Scottish Woolen Campaign.

The Scottish Woolen Trade Mark Association, Ltd., representing 75 per cent. of the woolen manufacturers of Scotland, which sent a delegation to the United States last November to plan an advertising campaign in behalf of their trade mark, has announced that the campaign has actually begun. The object of the campaign is to familiarize the American public with the trade mark which has been granted by the British Board of Trade, and is a guaranty that any garment bearing the tag is made of cloth manufactured in Scotland of pure wool. The principal object of the association is to make sure that when goods are sold as Scotch product, they shall be the genuine article. F. T. Frazer, representative of the association for North America, stated that he did not believe that the tariff would affect the sale of Scottish goods in this country because of the high quality and distinctive patterns and colorings of the imported article. The association may take steps to prevent any advance of prices based on the tariff.

Silk Neckwear Popular in East.

Results of a neckwear survey in Philadelphia, Baltimore and St. Louis were announced yesterday by the Associated Men's Neckwear Industries, Inc. Returns from Philadelphia showed that 65 per cent. of the men in the survey wore cut silk ties and 25 per cent. knitted ties, while in Baltimore 64 per cent. wore cut silk, 33 per cent. knitted and 3 per cent. miscellaneous. In St. Louis 48 per cent. wore cut silk ties, 43 per cent. knitted, and 9 per cent. miscellaneous. The returns from Philadelphia and Baltimore follow closely the results in New York, while the proportion of knitted ties in St. Louis is much larger. The association assumes from these results that cut silk neckwear is more popular in the East than in the West, although returns from other cities may modify this conclusion.

Men's Wear Worsteds for 1923.

The United States Worsted Company completed yesterday its showings of men's wear lines for spring, 1923. The lines shown consisted of all worsted serges, fancy worsted suitings, gabardines, whipcords, &c., in vigoroaux and compound mixtures, twists and piece dyes. A comparison of the new prices with those of last year could not be made, as many of the lines opened yesterday were different from those of last spring. The new price range is between $1.80 and $4.50 a yard. A large number of buyers were on hand at the opening and a fairly good business was booked. Buyers, however, continue conservative and will not place orders beyond three months. The company will bring its showings for next spring to a close in about two weeks, when it will open its complete line of women's wear fabrics.

Textile Committee Formed.

A textile service committee has been formed by the International Association of Garment Manufacturers to disseminate data on fabric qualities among manufacturers of apparel and garments. The committee is composed of five members of the association whose duties are to supply manufacturers with information as to where certain fabrics may be obtained; to test samples for tensile strength and durability, color fastness and shrinkage; to identify various types of fabrics as to brand, and to be responsible for all activities of the textile service department of the association. A. F. Allison, secretary, announced that the committee will issue semi-monthly a bulletin listing piece goods for sale or exchange, or other items, such as buttons, machinery, &c. Manufacturers constantly find themselves carrying larger stocks of some supplies than they need, while they are short on others, and the purpose of the bulletin, which is an expansion of the one which has been issued by the textile department for years, is to insure interchange of stocks so that manufacturers may exchange their surplus supplies for other goods that they need.

COTTON FUTURES DECLINE $3 A BALE

Favorable Weather and Weak Liverpool Cables Cause Heavy Liquidation.

Reactionary sentiment predominated in yesterday's cotton market. Prices went lower by 52 to 60 points under the influence of the bearish political developments, weak Liverpool cables and more favorable weather in some sections of the South. The market fluctuated nervously all day. After it had opened about 25 to 35 points net lower, it recovered all its early loss. The rally proved short lived, however, as locals renewed their selling operations and forced prices about ½ cent a pound net lower. The closing range was 50 to 58 points net under Saturday.

Much of the selling at the outset was caused by weakness abroad. Liverpool cables, due 14½ to 17½ penny points lower, opened 24 to 25 lower and at the time of the local call were off 38 to 41 points. English interests still moderately all day. Bears stressed the disquieting labor situation and reports of a breakdown of the German reparations conference in London. The opening drop attracted scattered profit taking by shorts and a little Fall River mill demand.

The decline may have been checked for the moment by a rather bullish private condition report, showing a condition of only 66.7 per cent. of normal compared with the end. July Government estimate of 70.8 per cent. of normal. Gossip had it that a prominent New Orleans operator had liquidated 50,000 bales in the last couple of hours. The local spot market was quoted 55 points lower at 20.50 cents a pound for middling. The New Orleans market was 63 points lower at 20.50 cents. Its sales were 105 bales.
