COAL STRIKE CUTS RAILROAD EARNINGS

Some Fuel Carriers Made Poor Showing in July—Others Report Improvement.

Surprises are few in the reports of Class 1 railroads for July, most of the roads being true to predictions of what their earnings would show in that month. Either improvement or loss, compared with July, 1921, depended on railroads' closeness to the coal situation. Some of the coal carrying roads made a poor showing compared with July, 1921, while roads in other sections of the country not affected by the miners' strike gave a good account of themselves.

The reports, which were presented to the Interstate Commerce Commission yesterday, showed a decline in net railway operating income as compared with July, 1921, in the case of the Atchison, Baltimore and Ohio, Illinois Central, Philadelphia and Reading, Pere Marquette, Chicago and Eastern Illinois, Wheeling and Lake Erie and Kanawha and Michigan. Reports showed improvement in the case of the New Haven, Chicago and Northwestern, Big Four, Wabash, Central of Georgia, Western Maryland, Clover Leaf, St. Paul and Rock Island.

The following table shows gross revenues and net railway operating income of a number of roads for the month of July and the seven months ended July 31 last, compared with the corresponding periods of the previous year:

	1922.	1921.
ATCHISON, TOPEKA AND SANTA FE.

DEMAND IN BRITAIN LIFTS WHEAT HERE

Sudden Strength in Liverpool Market Causes Big Rally in Chicago Grain.

CHICAGO, Aug. 28.—An unexpectedly strong market at Liverpool caused a sharp bulge in wheat prices here, and during the day commission houses bought on the breaks in sufficient volume to hold a good share of the rally.

Toward the finish short covering also strengthened the market, and the close was ⅛c. to 1⅝c. up, with September $1.03⅝ to $1.03½ and December $1.04⅝ to $1.04½. Corn was ¼c. lower to ⅛c. higher. Oats were unchanged to ⅝c. up and provisions ranged from unchanged figures to 17½c. advance.

Wheat in the English market was in good demand and the strength there was reflected in the market here at the start, but the best early prices were not maintained because of a lack of aggressive buying. In midsession the commission house tactics and a decrease of 77,000 bushels in the visible supply, an unusual development for this time of the year, formed a bullish influence.

Corn advanced early but more than lost the upturn, later on selling by longs. Receipts were 600 cars, and this took the edge off the demand, especially as it is expected there will be a heavy run all through the week. Commission houses were rather persistent sellers despite the continued drought over a good part of the belt and the expectation of bullish private reports to be given to the trade the latter part of the week.

Oats followed corn and eased off with that grain, but averaged higher.

A lack of support, with scattered selling, made a lower range for provisions despite the strength in hog values.

NEW YORK SHIPBUILDING PASSES ITS DIVIDEND

Last Quarterly Disbursement Was 50 Cents.

Directors of the New York Shipbuilding Corporation passed yesterday the quarterly dividend due on the company's stock at this time. The last disbursement was 50 cents paid on June 1. Previous to that date the company had been paying $1 quarterly.

"The board of directors of the New York Shipbuilding Corporation at their quarterly meeting decided to take no action in the matter of declaring further dividends this year on its capital stock," said a statement issued yesterday by P. A. S. Franklin, chairman of the company's board.

"The corporation has so far this year distributed to its shareholders in cash dividends $300,000, which is $1.50 a share. The directors confidently hope that they will be able to pay an equal amount during the year 1923. The company's cash position is satisfactory, it being practically the same as given in the last annual report, but the directors feel that in view of the existing unsatisfactory conditions in the shipbuilding industry it is to the interests of the stockholders that the present cash position should be very carefully protected.

"The corporation now has on hand a sufficient amount of shipbuilding and other work to insure the operation of the plants for the remainder of this year and all of 1923."

WHOLESALE BUSINESS BETTER DURING JULY

Sales in New York 2.3 P. C. Larger Than Year Ago.

The weighted index of wholesale trade in this district, as computed by the Federal Reserve Bank of New York from reports of 122 dealers in leading commodities, shows that July sales were 2.3 per cent. larger than those of the same month a year ago, according to the bank's monthly review of credit and business conditions.

The review adds that department store sales in the New York Federal Reserve district in July were virtually at the same level as those of July, 1921, while sales by chain store systems were 12.09 per cent. in excess of those of the same month a year ago. With the exception of the five and ten cent stores, says the review, this increase has been due largely to the opening of new stores by the reporting systems.
