"For the purpose of accommodating the citizens of the State"

From the Charter of The Farmers' Loan and Trust Company, 1822

TO many investors a Transfer Agent means a rather preoccupied man behind a grill. Consider the goodwill accruing to a corporation whose stock transfers are handled in the *spirit of accommodation.*

$2.50 A BALE ADDED TO COTTON VALUES

Strong Demand for Futures Absorbs Long Liquidation and Southern Selling.

A brisk demand developed in the cotton market yesterday with the opening call and increased later in the session, with the result that prices were lifted about 25 to 50 points. The close was within a few points of the top, or 41 to 47 points better than on Wednesday. Considering the volume of profit taking from local longs and Southern hedge selling the market exhibited a remarkably strong undertone.

Most of the buying came from Liverpool, Wall Street and trade interests and was based on such bullish factors as firm cables, the continued betterment of securities prices and exchange and overnight advices reporting a stiffening spot basis in the South.

There was little of special feature in early dealings. Business was moderately active and there was no inclination to sell the market short. On the other hand, many prospective buyers held back, believing that a technical reaction was not far off. The firmness of the Liverpool market at the time of the local opening was reflected in the starting gain of 8 to 14 points. After that buying increased in strength and it was not long before the market was up over ½ of a cent a pound.

Weather developments in the South aroused scant attention. There were no further October delivery notices. The export movement, which exceeded 30,000 bales, was again a bullish factor.

The local spot market was quoted 45 points higher at 21.25 cents a pound for middling. Delivery on contract here was 200 bales. The New Orleans spot market was 25 points better at 20.50 cents for middling. Its sales totaled [illegible] bales.
