Your Callable Bonds
If you hold callable bonds selling around their redemption prices, we suggest that you write for our circular containing a list of bonds which, in our judgment, may be advantageously substituted for bonds which are likely to be called in the near future.
Write for Circular No. 1818.

Electric Light Bonds for Investment
Investors who have heretofore overlooked the attractiveness of high-grade Public Utility Bonds and Preferred Stocks are now their staunchest exponents. We should like the opportunity to personally discuss their merits with investors.

FINANCIAL NEWS AND COMMENT

Stocks Irregular in Pre-Holiday Session—Trading Is on Small Scale.

As far as the financial markets were concerned, yesterday was one of the most uninteresting pre-election day sessions on record. Apparently Wall Street cared little which nominee for the Governorship of New York State was successful. The local traction stocks, which usually are sensitive at election time, were strong and trading was fairly large in Brooklyn Rapid Transit certificates, which advanced one point. Interborough Rapid Transit stock, which advanced 1¾ points, and Third Avenue, which gained 1⅝ points. However, as both political parties are committed to the 5 cent fare, there was little basis for speculation in those issues.

The volume of trading in stocks was relatively small and there was no decided trend to prices. At the opening it was expected that there would be some professional selling on the seizure of Constantinople by the Kemalists, but as far as could be observed the European situation was not a factor in the stock market. The effect of the new turn of affairs in Turkey was more pronounced in the foreign exchange market, where there was extreme weakness in francs, a decline of about 1 cent in demand sterling and a new low level for the German mark. The pessimism in that market was further accentuated by the increase of 50 billion marks, the largest yet recorded, in latest Reichsbank statements on circulation.

The wheat market, which advanced sharply during the Turkish war scare in September, was slightly firmer. The cotton market rallied at the close after early losses. In the bond market there was a good deal of irregularity, with foreign issues unfavorably affected by the Near East developments, and certain of the industrial bonds displaying strength.

A feature of the railroad bond list was a break of from 3 to 6 points in the Erie issues. The Erie shares also were sold heavily and declined from fractions to more than 2 points. The break in Erie was accompanied by various unfavorable reports. There was nothing definite nor particularly new in the rumors, which referred chiefly to the company's losses during the coal strike making its ability to cover fixed charges this year doubtful.

Several of the industrial stock issues displayed strength, notably Atlas Powder, Du Pont, General Cigar, Colorado Fuel and Iron, Jewel Tea, Kresge, Kelsey Wheel, Sears-Roebuck, Stewart-Warner, Virginia Carolina Chemical, Woolworth and American Beet Sugar. On the other hand weakness was shown in American Can, American Locomotive, American Tobacco, Continental Can, General Asphalt, Mexican Petroleum, National Lead, P. Lorillard, Republic Iron and Steel and Studebaker.

Some of the public utility stocks were strong, especially Pacific Gas and Electric. Brooklyn Union Gas was an exception, breaking more than 2 points. The rails were unsettled by the break in Erie and losses were sustained by Atlantic Coast Line, Chesapeake and Ohio, Chicago, Milwaukee and St. Paul, Rock Island, Great Northern and Union Pacific.

The agreement between the United States and twenty-seven other nations to establish a world court for arbitration of trade disputes was considered a constructive development in Wall Street and the Department of Labor's statement that business recovery is approaching a boom confirmed the reports that have come from private sources recently.

The investment market was much improved and the unusually large offerings of new bonds made yesterday were in rapid process of distribution. Call money opened and renewed at 5 per cent, and was later marked up to 5½ per cent.
