BUSINESS NOTES AND TRADE NEWS

Prices Hinder Cotton Goods Trading—Quotations Continue Firm.

There was only a moderate amount of trading in yesterday's cotton cloth markets at firm prices. Most mills have withdrawn their lines pending a more settled condition in the raw cotton market. Selling agents have been instructed not to accept orders without first notifying their mills. On the other hand, buyers are not so anxious to place orders at the new high price levels. They fear that their customers will not readily absorb the advances which must be passed to them if purchases are made at the higher levels. Higher prices for finished cotton goods now are almost inevitable. If manufacturers are to sell without a loss they must revise their figures upward, according to a prominent factor.

Raw Silk Prices Maintained.

Trading continued small yesterday in markets for raw silk, but prices held fairly firm. "While the big purchases of last month have undoubtedly taken care of a considerable part of the immediate requirements of the larger mills," H. L. Gwalter & Co. say, "a steady demand continues from other quarters, making up a fair aggregate of daily transactions in which all sorts participate and which is sufficient to maintain prices on a firm level. Stocks on hand at Yokohama on October 31 consisted of 27,500 bales of white silk and 1,500 bales of yellow silk, compared with a total of 31,000 bales a year ago, plus 42,000 bales held by the syndicate. The position of Japanese reelers is undoubtedly one of extraordinary strength, which is apt to find its expression in still higher values before the season is over."

Wholesale Trade Gains.

Purchasing by jobbers and retailers throughout the country last week increased 1 per cent. over the preceding week, while there was a gain in payments of 1.4 per cent., according to the Credit Clearing House. The Mountain section, with a gain of 9 per cent. over the previous week, leads the country in purchasing activity, which is now greater than it has been in several months. The South agricultural section is buying actively and has considerably reduced its indebtedness. The Pacific coast section continues to show the favorable effect of the excellent fruit crop and the large demand for lumber. The Eastern section still shows the effects of strikes in somewhat restricted purchasing, but indebtedness is much lower.

Poiret Twills Popular.

Demand for woolen and worsted dress goods for next spring is changing from novelties to staples. Business has improved considerably in the last several weeks and the turn in buying to the staple lines has greatly encouraged manufacturers. Recent advances in prices and the likelihood of further advances as a result of the continued strengthening of raw wool values have stimulated buying for the future. Poiret twills continue to enjoy undiminished popularity, while the demand for all wool crepes is growing stronger. Mills are unable to fill any more spot orders for poiret twills because of a limited supply.

Silk Consumption Report.

The Silk Association of America explained yesterday that the reason for the increase in consumption during October was due to the delayed arrival of three steamers carrying a total of about 5,000 bales of silk. As a result of the delay the silk was not included in the stock reported on November 1. The delivery to American mills for October, or the approximate consumption, thus would be reduced to about 37,500 bales.
