THE JOHN NICKERSON JR ORGANIZATION

THE financial structure of many public utility companies would be strengthened by a resort to common stock financing for new capital

We have an article explaining why.

STERLING HIGHEST SINCE MARCH, 1919

Rate of Exchange on London Rises to $4.52 1-4, Helped by Economic Factors.

Exchange on London advanced more than 2 cents in the foreign exchange market yesterday, being quoted at $4.52¼ at the high point of the day. At that price demand sterling was at the highest point since the British Government discontinued its supporting operations in the exchange in March, 1919. During the war demand sterling was kept at $4.76¾ by purchases made by the British Government, through its fiscal agents here, of bills in the open market.

With the war ended the British Government withdrew its artificial support and sterling exchange was left to be governed by the natural law of supply and demand. Five days later the rate was down about 10 cents and early the following year sterling sold as low as $3.18. Since that time it has moved upward with but few setbacks. There has been a steady demand for sterling bills in this market for many months, growing stronger in recent weeks as the United States increased its imports from the British Isles.

The balance of trade in England so far this year has shown constant improvement, and as a result sterling bills are in good demand all over the world and offerings have been particularly scarce in this market.

Other factors contributing to the rise in sterling are the improved British Treasury position, indications of a successful outcome at Lausanne and the large increase of gold shipments to this country this year. Moreover, the prospect is that gold will continue to flow over here from England for a long time to come.

Kuhn, Loeb & Co. have been advised that the Cunard Steamship Aquitania, which sailed from England last Saturday, is bringing to them $925,000 in gold. The same firm will receive $750,000 in gold coming on the White Star liner Olympic. These shipments will bring the total of gold imported from England by Kuhn, Loeb & Co. thus far this year up to $50,600,000.

The rise in sterling had a sympathetic effect on guilders and lire, but French and Belgian francs and marks were weak.
