COTTON ADVANCES AFTER POOR START

News From Lausanne Conference Helps Upward Movement in Futures.

Cotton prices were irregular in rather narrow limits yesterday, the final result being net gains of 5 to 11 points. At times the market displayed a firm undertone, due to scattered Wall Street short covering and a little new outside demand. Prices were up 15 to 25 points early in the afternoon, but this bulge attracted increased professional long selling, causing a natural reaction near the finish. The market's ability to withstand heavier selling, however, aroused dormant bullish feeling in some circles.

Early in the session pressure from the South, spot houses and locals caused declines of about 10 to 18 points, with December relatively weak. The better feeling probably reflected to some extend the improvement in the news from the Lausanne conference, but there was little inclination to place new commitments of any size just before the Census Bureau's ginnign report and the Government crop estimate to follow a few days later. The Memphis *Commercial Appeal* placed the total crop at 10,086,000 bales. Other private estimates ranged from 9,295,000 bales to 9,703,000 bales. The American Cotton Association placed the amount of cotton remaining to be ginned at 310,000 bales.

The English market opened as expected, but reacted later and at the time of the local call showed net gains of only 7 to 12 points. Small business in spot was reported from abroad, only 3,000 bales changing hands. Manchester advices continued rather pessimistic.

The local spot market was quoted 10 points higher at 24.85 cents a pound for middling. Delivery on local contract was 1,400 bales. The New Orleans market was unchanged at 24.50 cents. Its sales were 840 bales.
