BUSINESS NOTES AND TRADE NEWS

Imperial Silk Syndicate, Japan, Is Dissolved Following Price Stabilization.

The Imperial Silk Syndicate of Japan was dissolved on December 1, according to information received from Japan by a foremost local raw silk importer. The syndicate was formed in 1921, following one of the worst business crashes in Japan, when raw silk fell to 1,300 yen. Backed by the Japanese Government, a group of the largest silk dealers organized the syndicate, whose main purpose was to artificially stimulate raw silk prices by purchasing and withdrawing from the market the huge surpluses of raw silk which glutted the market during 1920. The syndicate fixed the minimum price at 1,500 yen. With raw silk prices now fairly well stabilized, the members of the syndicate feared that if they continued their operations they might interfere with the normal trend of the industry, and decided to dissolve the syndicate.

Purchasing at High Rate.

Buying by retailers and jobbers throughout the country continues at a high rate, as shown in the Credit Clearing House's weekly report. Buying last week was 2 per cent. greater than the preceding week, 4.7 per cent. ahead of the same week a year ago and 6.2 per cent. in advance of two years ago. That the ultimate consumer also has begun to buy actively, after the long delay due to warm fall weather, is evident from the fact that payments show a marked increase in all sections but one. As a result of good payments indebtedness is less throughout the country. The North agricultural section showed the most active purchasing, the gain over the previous week being 4 per cent.

Heavy Underwear in Demand.

Manufacturers of fleece underwear who opened their fall 1923 lines a few days ago are well pleased with the response from jobbers. Although the new prices are from 5 to 10 per cent. higher than in the 1922 openings, selling agents reported that buyers are anxious to place orders. Certain factors are said to have enough orders on their books to take care of production through the second half of the new year.

Hope for Lower Fur Prices.

A prominent raw fur merchant says that prices for the new season's catch of raw furs must recede to more reasonable levels if the general trade is to expect a good season. The high prices of fur garments this fall, he said, led to a large increase in remodeling work, which has militated against the sale of new garments to some extent. Relatively lower values will provide a much needed stimulus, according to the factor. The raw fur trade has entered its new season. Dealers are beginning to slowly absorb the initial quantities of furs and skins that have been sent in to the market. The merchants are holding off buying to a great extent, in an effort to force prices down.

Raw Silk Trading Broadens.

Raw silk markets were fairly active yesterday, with prices holding firm. "At the advance in the local market," H. L. Gwalter says, "buyers are returning in increasing numbers and the demand is broadening, reaching a fair daily total of sales in Japan and Canton silks. Though prices are still showing some irregularity, offerings below replacement are fast disappearing and holders, as a rule, are very firm in their views. Stocks here are a trifle larger than last month, but are compensated by the fact that there is less silk on hand on the place a year ago. In Yokohama holders are offering sparingly, expecting further advances."

Electrical Business Good.

Improving business in appliances, motors and lamps is reported by *Electrical World*. Holiday purchases of flatirons, toasters, novelties, vacuum cleaners and washing machines are heavier. Central station buying has fallen off noticeably during the last week and little further activity for the next two months is expected. Conduit stocks, particularly in the far Western sections, are very low. Radio sales are said to be proceeding at the rate of from fifty to sixty million dollars a year.
