COTTON ABOVE 26C, IN YEAR END TRADE

Last Session of 1922 Finds Market Resisting Selling by Longs and Shorts.

The final session of 1922 on the New York Cotton Exchange showed the market's growing resistance to continued long selling and increased offerings for speculative account. In the course of rather dull dealings prices eased off about 10 to 15 points at one time, but at the close were off only 2 to 6 points. More pressure was exerted against the market than was shown in its action. At the outset Liverpool interests, spot houses, local traders and commission houses were on both sides of the market, selling coming from the South and New Orleans. Prices at the start were up 2 to 11 points, but the market soon lost all its gains.

Pre-holiday liquidation was a feature in the second hour, but the dip did not go very far before new buying orders came into the ring. There was the customary year end uncertainty in the market, although the volume of trading was at times moderately broad. Sentiment among the floor element and in commission houses was as bullish as ever, although some houses were advising caution during the first week of January. Liverpool's cables reflected the idle character of that market, futures' prices abroad being about as due, 1 to 4 points higher at the time of the local call.

The variety of bullish crop advices from the Belt continued to impress traders. It appeared that the basis was improving daily in some cases. Preliminary reports from the wholesale dry goods trade in Chicago were optimistic, and Fall River reported sales of more than 200,000 prints during the week ended last night. Prices there were firm and mills were not desirous of doing business too far ahead. Weekly statistics were mostly ignored.

The local spot market was quoted 10 points lower at 26.60 cents for middling. Sales of the actual were 400 bales, and delivery on contract, 4,000 bales. The New Orleans market was unchanged at 26.60 cents. Its sales were 117 bales.
